society highlighting the diverse interests and assumptions that defined and shaped the literary canon An indigenous canon of letters Ross argues had been both the hope and aim of English authors since the Middle Ages Early authors believed that promoting the idea of a national literature would help publicise their work and favour literary production in the vernacular Ross places these early gestures toward canon making in the context of the highly rhetorical habits of thought that dominated medieval and Renaissance culture habits that were gradually displaced by an emergent rationalist understanding of literary value He shows that beginning in the late seventeenth century canon makers became less concerned with how English literature was produced than with how it was read and received By showing that canon formation has served different functions in the past *The Making of the English Literary Canon* is relevant not only to current debates over the canon but also as an important corrective to prevailing views of early modern English literature and of how it was first evaluated promoted and preserved It is widely accepted among literary scholars that canon formation began in the eighteenth century when scholarly editions and critical treatments of older works designed to educate readers about the national literary heritage appeared for the first time In *The Making of the English Literary Canon* Trevor Ross challenges this assumption arguing that canon formation was going on well before the eighteenth century but was based on a very different set of literary and cultural values Covering a period that extends from the Middle Ages to the institutionalisation of literature in the eighteenth century Ross's comprehensive history traces the evolution of cultural attitudes toward literature in English society highlighting the diverse interests and assumptions that defined and shaped the literary canon An indigenous canon of letters Ross argues had been both the hope and aim of English authors since the Middle Ages Early authors believed that promoting the idea of a national literature would help publicise their work and favour literary production in the vernacular Ross places these early gestures toward canon making in the context of the highly rhetorical habits of thought that dominated medieval and Renaissance culture habits that were gradually displaced by an emergent rationalist understanding of literary value He shows that beginning in the late seventeenth century canon makers became less concerned with how English literature was produced than with how it was read and received By showing that canon formation has served different functions in the past *The Making of the English Literary Canon* is relevant not only to current debates over the canon but also as an important corrective to prevailing views of early modern English literature and of how it was first evaluated promoted and preserved

Uncommon Readers Christopher J. Knight, 2003-01-01 Impressive in scope and erudition Christopher Knight's *Uncommon Readers* focuses on three critics whose voices mixing eloquence with pugnacity stand out as among the most notable independent critics working during the last half century The critics are Denis Donoghue Frank Kermode and George Steiner and their independence a striking characteristic in a time of corporate criticism is reflective of both their backgrounds Donoghue's Catholic upbringing in Protestant ruled Northern Ireland Kermode's Manx beginnings and Steiner's Jewish upbringing in pre Holocaust Europe and their temperaments Each represents a party of one

a fact that has on the one hand made them the object of the occasional vituperative dismissal and on the other contributed to their influence and remarkable longevity Since the 1950s Steiner Donoghue and Kermode have each maintained a highly public profile regularly contributing to such influential publications as Encounter New Yorker New York Review of Books Times Literary Supplement and the London Review of Books This aspect of their work receives particular attention in Uncommon Readers for it illustrates a renewed interest in the role of the public critic especially in relation to the genre of the literary review essay and signals a sustained conversation with an educated public namely the common reader Knight makes the argument for the review essay as a serious and still viable genre and he examines the three critics in light of this assumption He expounds upon the critics separate interests Kermode's identification with discussions of canonicity Steiner's with cultural politics and Donoghue's with the persistent claims of the imagination while also revealing the ways in which their work often reflects theological interests Lastly he attempts to adjudicate some of the conflicts that have arisen between these critics and other literary theorists especially the post structuralists and to discuss the question of whether it is still possible for critics to work independently Original and deliberative Uncommon Readers presents a renewed defense of the tradition of the common reader

Post-War British Women Novelists and the Canon Nick Turner, 2010-02-11 With the increasing number of books on contemporary fiction there is a need for a work that examines whom we value and why These questions lie at the heart of this book which by focusing on four novelists literary and popular interrogates the canon over the last fifty years The argument unfolds to demonstrate that academic trends increasingly control canonicity as do the demands of genre the increasing commercialisation of literature and the power of the literary prize Turner argues that literary excellence demonstrated by style and imaginative power is often missing in many works that have become modern classics and makes a case for the value of the universal in literature Written in a jargon free style with reference to many supporting writers the book raises a number of significant cultural questions about the arts fashions and literary reputations of interest to readers in contemporary literary studies

Darwin and the General Reader Alvar Ellegård, 1990-05-15 Drawing on his investigation of over one hundred mid Victorian British newspapers and periodicals Alvar Ellegård describes and analyzes the impact of Darwin's theory of evolution during the first dozen years after the publication of the Origin of Species Although Darwin's book caused an immediate stir in literary and scientific periodicals the popular press largely ignored it Only after the work's implications for theology and the nature of man became evident did general publications feel compelled to react each social group responded according to his own political and religious prejudices Ellegård charts the impact of this revolution in science maintaining that although the idea of evolution was generally accepted Darwin's primary contribution the theory of natural selection was either ignored or rejected among the public
