theoretical construct provides a way to think about the kind of care doulas offer women across the reproductive spectrum Doulas negotiate boundaries and often blur the divisions between communities and across public and private spheres in their practice of intimate labour This book weaves together three main threads doulas and mothers doulas and their community and finally doulas and institutions The lived experience of doulas illustrates the interlacing relationships among all three of these threads The essays in this collection offer a unique perspective on doulas by bringing together voices that represent the full spectrum of doula work including the viewpoints of birth postpartum abortion community based adoption prison and radical doulas We privilege this broad representation of doula experiences to emphasize the importance of a multi vocal framing of the doula experience As doulas move between worlds and learn to live in liminal spaces they occupy space that allows them to generate new cultural narratives about birthing bodies

Community-based Maternity Care

Geoffrey Marsh, Mary Renfrew, 1998-10-22 This important book makes the case for placing maternity care in the community It has been written by a multidisciplinary group The first section considers the role and function of the participants in community based maternity care the woman the midwife and the GP The second section discusses four major contemporary issues the radically changing social background the economics of care audit and education of the carers Next the major clinical challenges in maternity care are tackled how to reduce the differences in morbidity and mortality which are associated with differences in age social class and ethnicity the care of disadvantaged groups prematurity and low birth weight and their prevention technology used in childbirth and the fetal origins of adult disease Finally all aspects of the clinical care carried out by Gps and midwives are covered The editors hope that after reading this book midwives Gps and obstetricians should find the theory underpinning their work has been sharply defined and that their work will be more effective and evidence based The editors a GP and a midwife anticipate the resolution of the current tensions between midwife GP and obstetrician and look forward to a responsive effective and sensitive service for mothers and babies in the next millennium

Caesarean

Rosemary Mander, 2007-05-21 This book critically analyzes the place of caesarean in childbearing at the beginning of the twenty first century It questions the changes that are taking place in childbirth and in particular the effects and implications of an increase in caesarean births This controversial work by a practising midwife and researcher includes discussion of the context of the operation and description of it health systems around the world and their caesarean incidence rates decision making and cultural medical constraints the short and long term implications of caesarean for baby and mother Using up to date research Rosemary Mander bases her argument on a firm evidence base and argues that the rapidly rising caesarean section rate may not be for the benefit of either the woman giving birth or her baby Rather the beneficiaries may actually be those professionals whose investment is in extending the range of their influence and thus increasing the medicalization of normal life
