Far From the Truth Michiel van Groesen, Johannes Müller, 2023-12-28 Information and knowledge were essential tools of early modern Europe s global ambitions This volume addresses a key concern that emerged as the competition for geopolitical influence increased how could information from afar be trusted when there was no obvious strategy for verification How did notions of doubt develop in relation to intercultural encounters Who were those in the position to use misinformation in their favour and how did this affect trust How in other words did distance affect credibility and which intellectual and epistemological strategies did early modern Europe devise to cope with this problem The movement of information and its transformations in the process of gathering ordering and disseminating makes it necessary to employ both a global and a local perspective in order to understand its significance The rise of print leading to various new forms of mediation played a crucial role everywhere inspiring theories of modernization in which media served as agents of new connections and eventually of globalization Paradoxically during the entire period between 1500 and 1800 the demise of distance through various strategies of verification coincided with constructions of otherness that emphasized the cultural and

geographical difference between Europe and the worlds it encountered Ten leading scholars of the early modern world address the relationship between distance information and credibility from a variety of perspectives This volume will be an essential companion to those interested in the history of knowledge and early modern encounters as well as specialists in the history of empire and print culture The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Entwisted Tongues George Lang, 2023-12-18 Cultural creolization m tissage hybridity and the in between spaces of postcolonial thought are now fundamental terms of reference within contemporary critical thought Entwisted Tongues explores the sociohistorical and cultural basis for writing in creole languages from a comparative framework The rise of self defining literatures in Atlantic creoles offers parallels with the development of national literatures elsewhere but the status of creole languages imposes particular conditions for literary creation After an introduction to the history of the term creole Entwisted Tongues surveys the history of the languages which are its focus the Crioulo of Cape Verde Sierra Leone Krio Surinamese Sranan Papiamentu spoken in the Netherlands Antilles and the varieties of French based Kreyol in the Caribbean The chapter Deep Speech turns around a trope ubiquitous in creoles one conveying the sense that their authentic registers are at the furthest remove from the high cultures with which they are in contact Diglossic Dilemma explores the contradictions inherent in this trope The remaining analysis explores numerous nooks and crannies of these marginal but fascinating literatures submitting that creoles and literature in them are prima facie evidence of the human will to articulate speech and verbal art even in the face of slavery oppression and penury
