Matter of the Mind John Teixeira, 2025-03-11 The Matter of the Mind focuses on the mind body problem. Such a problem should be viewed not as a philosophical or metaphysical problem but as a cognitive one. What needs to be accounted for is a representation of how the interaction of the mind and brain can become more intelligible. The author proposes that science can provide such a representation especially the contemporary physics of string theory. String theory offers a new conception of matter allowing a passage of matter to the mind without the difficulties imposed by a traditional common sense corpuscular conception of material objects. In other words, string theory will enable us to conceive of a continuum between matter and the mind. There is no discontinuity between them once we abandon the visual perception based description of matter depicting it as solidity, impenetrability, and extension in space. *Elements of Theology* Luther Lee, 1863
