*The British Coal-mining Industry During the War* Sir Richard Augustine Studdert Redmayne, 1923 ***The British Coal Trade* Herbert Stanley Jevons, 2013-09** This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1915 edition Excerpt cases of the owners selling the pit rather than face the loss of a prolonged strike The buyers have either had to make profit possible by expensive improvements of machinery or to face a long strike in reducing the price list Presumably they will have taken into account the possibility of much expense in reducing the price list when valuing the colliery for purchase It is indeed becoming more and more difficult to effect any change at all in price lists once established and it is also becoming more difficult to fix a price list in the first instance An interesting case is that of the Gelli pit belonging to Messrs Cory Brothers in South Wales The pit was a comparatively new one which Messrs Cory Brothers had taken over and wished to open The price list they offered proved unacceptable to the men who went out on strike in October 1910 After some months the executive of the South Wales Miners Federation took control of the case and they furnished the strike pay In spite of various attempts and negotiations neither side has seen its way to offer sufficient for the parties to meet and make a bargain with the result that the pit has remained closed for more than three years and there is still no prospect of its being opened The men on strike gradually drifted away to find employment in other pits and in September 1913 the Miners Federation ceased payment of strike pay The result is that the pit is practically of no commercial value because no member of the South Wales Miners Federation can be got to work there and as this includes practically all the experienced men the company has no prospect of opening the pit at the price list it offers 1 The negotiation of a price list is indeed a most dramatic event in the ***The British coal trade* H.
