The Burning of Moscow Alexander Mikaberidze, 2014-02-11 A comprehensive account of the fiery destruction of Moscow during the Napoleonic Wars and the Russians motives for starting the blaze As soon as Napoleon and his Grand Army entered Moscow on 14 September 1812 the capital erupted in flames that eventually engulfed and destroyed two thirds of the city The fiery devastation had a profound effect on the Grand Army but for thirty five days Napoleon stayed making increasingly desperate efforts to achieve peace with Russia Then in October almost surrounded by the Russians and with winter fast approaching he abandoned the capital and embarked on the long bitter retreat that destroyed his army The month long stay in Moscow was a pivotal moment in the war of 1812 the moment when the initiative swung towards the Tsar's armies and spelled doom for the invading Grand Army yet it has rarely been studied in the same depth as the other key events of the campaign Alexander Mikaberidze in this third volume of his in depth reassessment of the war between the French and Russian empires emphasizes the importance of the Moscow fire and shows

how Russian intransigence sealed the fate of the French army He uses a vast array of French German Polish and Russian memoirs letters and diaries as well as archival material in order to tell the dramatic story of the Moscow fire Not only does he provide a comprehensive account of events looking at them from both the French and Russian points of view but he explores the Russians motives for leaving then burning their capital Using extensive eyewitness accounts he paints a vivid picture of the harsh reality of life in the remains of the occupied city and describes military operations around Moscow at this turning point in the campaign Praise for *The Burning of Moscow* Important Fascinating A book that you must read The Napoleonic Historical Society Although authored by an academic this book is written in an easy to read style without recourse to the overly academic language that can so often bore the reader Overall this title wholeheartedly deserves a five out of five star rating and should occupy a space in the library of anyone interested in the Napoleonic Wars Mark Simner author of *The Lion and the Dragon* *The Burning Ones* Jerame Nelson,2011-09-20 *Burning Ones* is a call to action Christians will be encouraged and motivated to consider seriously stepping in the role of burning ones and dread champions to spread the Kingdom of God in the earth Vivid and detailed descriptions of these champions are given throughout the book supported with biblical examples and modern day personal experiences including real life healings worldwide Each of the seven chapters concludes with Burning Questions designed to stimulate thought and action followed by a space for the reader to record Your Response A Prayer to Get You There connects the reader with the Lord in a genuine way that caps the vital issues covered in the chapter **The Burning of the Bibles: Defence of the Protestant Version of the Scriptures** John Dowling,2024-04-22 Reprint of the original first published in 1843 *The Burns Calendar* Anonymous,2025-07-20 Reprint of the original first published in 1874 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage *American Association for the Surgery of Trauma 75th Anniversary 1938-2013* Martin A. The Burning Question reveals climate change to be the most fascinating scientific political and social puzzle in history It shows that carbon emissions are still accelerating upwards following an exponential curve that goes back centuries One reason is that saving energy is like squeezing a balloon reductions in one place lead to increases elsewhere Another reason is that clean energy sources don t in themselves slow the rate of fossil fuel extraction Tackling global warming will mean persuading the world to abandon oil coal and gas reserves worth many trillions of dollars at least until we have the means to put carbon back in the ground The burning question is whether that can be done What mix of politics psychology economics and technology might be required Are the energy companies massively overvalued and how will carbon cuts affect the global economy Will we wake up to the threat in time And who can do what to make it all happen
