The Cambridge Colloquium 1916 American Mathematical Society. Colloquium, 1918 *The Cambridge Colloquium 1916* ... American Mathematical Society Staff, 2004-01 **The Cambridge Colloquium, 1916** Oswald Veblen, American Mathematical Society, Griffith Conrad 1887- Functional Evans, 2015-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *The Cambridge Colloquium 1916* , 1918 *The Cambridge Colloquium* Griffith Conrad Evans, Oswald Veblen, 1918-12-31 The 1916 colloquium of the American Mathematical Society was held as part of the summer meeting that took place in Boston Two sets of lectures were presented Functionals and their Applications Selected Topics including Integral Equations by G C Evans and Analysis Situs by Oswald Veblen The lectures by Evans are devoted to functionals and their applications By a functional the author means a function on an infinite dimensional space usually a space of functions or of curves on the plane or in 3 space etc The first lecture deals with general considerations of functionals continuity derivatives variational equations etc The main topic of the second lecture is the study of complex valued functionals such as integrals of complex functions in several variables The third lecture is devoted to the study of what is called implicit functional equations This study requires in particular the development of the notion of a Frechet differential which is also discussed in this lecture The fourth lecture contains generalizations of the Bocher approach to the treatment of the Laplace equation where a harmonic function is characterized as a function with no flux Evans terminology through every circle on the plane Finally the fifth lecture gives an account of various generalizations of the theory of integral equations Analysis situs is the name used by Poincare when he was creating at the end of the 19th century the area of mathematics known today as topology Veblen s lectures forming the second part of the book contain what is probably the first text where Poincare s results and ideas were summarized and an attempt to systematically present this difficult new area of mathematics was made This is how S Lefschetz had described in his 1924 review of the book the experience of a beginner attracted by the fascinating and difficult field of analysis situs Difficult reasonings beset him at every step an unfriendly notation did not help matters to all of which must be added most baffling of all the breakdown of geometric intuition

precisely when most needed No royal road can be created through this dense forest but a good and thoroughgoing treatment of fundamentals notation terminology may smooth the path somewhat And this and much more we find supplied by Veblen s Lectures Of the two streams of topology existing at that time point set topology and combinatorial topology it is the latter to which Veblen s book is almost totally devoted The first four chapters present in detail the notion and properties introduced by Poincare of the incidence matrix of a cell decomposition of a manifold The main goal of the author is to show how to reproduce main topological invariants of a manifold and their relations in terms of the incidence matrix The last fifth chapter contains what Lefschetz called an excellent summary of several important questions homotopy and isotopy theory of the indicatrix a fairly ample treatment of the group of a manifold finally a bird s eye view of what is known and not known mostly the latter on three dimensional manifolds **The Cambridge Colloquium 1916. Pt. I.** American Mathematical Society.

Colloquium,1918 **The Cambridge Colloquium: 1916** Griffith Conrad Evans,2023-07-18 This collection of essays on mathematical theory and practice was originally presented at a colloquium held in Cambridge in 1916 Featuring contributions from some of the leading mathematicians of the day the Colloquium remains a valuable resource for scholars in the field This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant The Cambridge Colloquium 1916. The Cambridge Colloquium, 1916 Oswald Veblen, 1922 **The Cambridge Colloquium 1916: Analysis situs, by O. Veblen** American Mathematical Society. Colloquium, 1922 *The Cambridge Colloquium, 1916* American Mathematical Society, 1918 **Analysis Situs** Oswald Veblen, 1976 *The Cambridge Colloquium 1916* Griffith Conrad Evans, 1918 *The Cambridge Colloquium 1916, Vol. 2* Oswald Veblen, 2017-11-25

Excerpt from *The Cambridge Colloquium 1916 Vol 2 Analysis Situs* It will be seen that aside from this one question which has to be dealt with in order to give significance to the combinatorial treatment we leave out of consideration all the work that has been done on the point set problems of Analysis Situs and on its foundation in terms of axioms or definitions other than those actually used in the text We have also been obliged by lack of space to leave out all reference to the applications We have not even given a definition of an n cell by means of a set of equations and inequalities or the discussion of orientation by means of the signs of determinants These are to be found in very readable form in Poincare's first paper where they are given as the basis of his work They belong properly however to the applications of the subject For in nearly all cases when Poincare or anyone else has proved a theorem of Analysis Situs he has been obliged to set up a machinery which is equivalent to a set of matrices
