The Cambridge Region And British Archaeology:

The Cambridge Region and British Archaeology M. D. Cra'ster,P. L. Carter,D. W. Phillipson,1984 *The Archaeology of the Cambridge Region* Sir Cyril Fox,1923 **The Cambridge Region** H. C. Darby,2013-01-03 This 1938 survey of the district of Cambridge provides an overview of physical and human geography within the Cambridge area *Understanding the Neolithic* Julian Thomas,2002-02-07 This book employs contemporary theoretical perspectives to investigate the Neolithic period in southern Britain It is a fully reworked edition of the author's *Rethinking the Neolithic* 1991 **Side-by-Side Survey** Susan Alcock,John Cherry,2016-10-02 Twenty years ago John Cherry looked forward to the day when archaeological survey projects working around the Mediterranean region the Frogs round the pond would begin to compare and synthesize the information they had collected He anticipated researchers tackling big questions of interregional scope in new and interesting ways working at a geographical scale considerably larger than that of the individual survey Was his optimism misplaced Despite the extraordinary growth of interest in field survey projects and regional analysis and despite the developments in survey methodology that have been discussed and implemented in the past two decades few scholars have attempted to use survey data in a comparative mode and to answer the broad scale questions confronting social historians In this volume which is the outcome of an advanced Workshop held at the University of Michigan in 2002 a number of prominent archaeologists return to the question of comparability They discuss the potential benefits of working in a comparative format with evidence from many different Mediterranean survey projects and consider the practical problems that present roadblocks to achieving that objective From mapping and manuring to human settlement and demography environment and culture each addresses different questions often with quite different approaches together they offer a range of perspectives on how to put surveys side by side Contributors include Susan E Alcock John Cherry Jack L Davis Peter Attema Martijn van Leusen James C Wright Robin Osborne David Mattingly T J Wilkinson and Richard E Blanton The Roman Impact on the Economy of the Lower Germanic Limes Region Erik Timmerman,2023-09-25 The remarkable economic performance of the Roman Empire is now widely acknowledged Yet there is still much debate about its interpretation Although this debate is mainly conducted at the empire wide level regional syntheses are indispensable to its further advancement This book contributes to that purpose by providing a comprehensive account of the Roman impact on the economy of the Lower Germanic Limes region By drawing on a large number of scattered publications and archaeological datasets the work demonstrates that Roman rule also led to important economic developments in a part of the empire that was remote from its Mediterranean heartland **Once Upon a Rock in Doggerland** Jeanette Kroese Thomson,2015-01-20 *Once Upon A Rock In Doggerland* encourages dialogue about the story of the Earth Part one goes back 200 million years ago when the last super continent Pangaea began to break up The Atlantic Ocean was created as North America and Europe became separate continents In part two the Marsupians are traveling anytime anyplace anyspace Part three takes the reader

back to Mesolithic times when human beings moved close to the glaciers of Northern Europe The people learned to adapt as the earth began to warm with the last ice age We are still experiencing this ice age today *Farmsteads and Funerary Sites: The M1 Junction 12 Improvements and the A5-M1 Link Road, Central Bedfordshire* Jim Brown,2020-01-31 Extensive excavations by MOLA Museum of London Archaeology near Houghton Regis and Toddington in south Central Bedfordshire provide a detailed multi period dataset for regional and national comparison Evidence ranges from middle late Bronze Age pits to medieval settlements *Iron Age and Roman Settlement at Highflyer Farm, Ely, Cambridgeshire* James Fairclough,2021-09-02 This volume presents the results of archaeological work carried out by MOLA Museum of London Archaeology at Highflyer Farm in 2018 Remains dating from the Neolithic to the post medieval period were recorded with most of the activity occurring between the early Iron Age and late Roman periods Farming Transformed in Anglo-Saxon England Mark McKerracher,2018-02-21 Anglo Saxon farming has traditionally been seen as the wellspring of English agriculture setting the pattern for 1000 years to come but it was more important than that A rich harvest of archaeological data is now revealing the untold story of agricultural innovation the beginnings of a revolution in the age of Bede Armed with a powerful new dataset Farming Transformed explores fundamental questions about the minutiae of early medieval farming and its wider relevance How old were sheep left to grow for example and what pathologies did cattle sustain What does wheat chaff have to do with lordship and the market economy What connects ovens in Roman Germany with barley maltings in early medieval Northamptonshire And just how interested were Saxon nuns in cultivating the opium poppy Farming Transformed is the first book to draw together the variegated evidence of pollen sediments charred seeds animal bones watermills corn drying ovens granaries and stockyards on an extensive regional scale The result is an inter disciplinary dataset of unprecedented scope and size which reveals how cereal cultivation boomed and new watermills granaries and ovens were erected to cope with and flaunt the fat of the land As arable farming grew at the expense of pasture sheep and cattle came under closer management and lived longer lives yielding more wool dairy goods and traction power for plowing These and other innovations are found to be concentrated at royal aristocratic and monastic centers placing lordship at the forefront of agricultural innovation and farming as the force behind kingdom formation and economic resurgence in the seventh and eighth centuries *Perceptions of the Prehistoric in Anglo-Saxon England* Sarah Semple,2013-10 Represents an unparalleled exploration of the place of prehistoric monuments in the Anglo Saxon psyche and examines how Anglo Saxon communities perceived and used these monuments during the period AD 400 1100 Kingdom, Civitas, and County Stephen Rippon,2018-04-19 This book explores the development of territorial identity in the late prehistoric Roman and early medieval periods Over the course of the Iron Age a series of marked regional variations in material culture and landscape character emerged across eastern England that reflect the development of discrete zones of social and economic interaction The boundaries between these zones appear to have run through sparsely settled areas of the landscape on high ground and

corresponded to a series of kingdoms that emerged during the Late Iron Age In eastern England at least these pre Roman socio economic territories appear to have survived throughout the Roman period despite a trend towards cultural homogenization brought about by Romanization Although there is no direct evidence for the relationship between these socio economic zones and the Roman administrative territories known as civitates they probably corresponded very closely The fifth century saw some Anglo Saxon immigration but whereas in East Anglia these communities spread out across much of the landscape in the Northern Thames Basin they appear to have been restricted to certain coastal and estuarine districts The remaining areas continued to be occupied by a substantial native British population including much of the East Saxon kingdom very little of which appears to have been Saxon By the sixth century a series of regionally distinct identities that can be regarded as separate ethnic groups had developed which corresponded very closely to those that had emerged during the late prehistoric and Roman periods These ancient regional identities survived through to the Viking incursions whereafter they were swept away following the English re conquest and replaced with the counties with which we are familiar today

The Origins of Britain Lloyd and Jennifer Laing,2023-08-10 The Origins of Britain 1980 follows the path of man s occupation of Britain from the scattered pockets of habitation in the earliest Palaeolithic period through to his growing domination of the landscape and his capacity to mould his environment evident in the late Bronze Age Among the many subjects which the book discusses in detail are the extent of knowledge of astronomy and mathematics in Neolithic and Bronze Age Britain and the extent to which the pattern of life in the Iron Age was already set by the end of the preceding Bronze Age **The Anglo-Saxon Fenland** Susan Oosthuizen,2017-06-30 Archaeologies and histories of the fens of eastern England continue to suggest explicitly or by implication that the early medieval fenland was dominated by the activities of north west European colonists in a largely empty landscape Using existing and new evidence and arguments this new interdisciplinary history of the Anglo Saxon fenland offers another interpretation The fen islands and the silt fens show a degree of occupation unexpected a few decades ago Dense Romano British settlement appears to have been followed by consistent early medieval occupation on every island in the peat fens and across the silt fens despite the impact of climatic change The inhabitants of the region were organised within territorial groups in a complicated almost certainly dynamic hierarchy of subordinate and dominant polities principalities and kingdoms Their prosperous livelihoods were based on careful collective control exploitation and management of the vast natural water meadows on which their herds of cattle grazed This was a society whose origins could be found in prehistoric Britain and which had evolved through the period of Roman control and into the post imperial decades and centuries that followed The rich and complex history of the development of the region shows it is argued a traditional social order evolving adapting and innovating in response to changing times Sentient Archaeologies Courtney Nimura,Rebecca O'Sullivan,Richard Bradley,2023-07-15 Archaeology in the past century has seen a major shift from theoretical frameworks that treat the remains of past societies as static

snapshots of particular moments in time to interpretations that prioritize change and variability Though established analytical concepts such as typology remain key parts of the archaeologist s investigative toolkit data gathering strategies and interpretative frameworks have become infused progressively with the concept that archaeology is living in the sense of both the objects of study and the discipline as a whole The significance for the field is that researchers across the world are integrating ideas informed by relational epistemologies and mutually constructive ontologies into their work from the initial stage of project design all the way down to post excavation interpretation This volume showcases examples of such work highlighting the utility of these ideas to exploring material both old and new The illuminating research and novel explanations presented contribute to resolving long standing problems in regional archaeologies across Africa Asia Australia Europe and Oceania In this way this volume reinvigorates approaches taken towards older material but also acts as a springboard for future innovative discussions of theory in archaeology and related disciplines

Post-glacial Communities in the Cambridge Region Christopher Y. Tilley,1979 *Territoriality and the Early Medieval Landscape* Stephen Rippon,2022

An exploration of small early folk communities prior to the eleventh century showing their development and sophistication All communities have a strong sense of identity with the area in which they live which for England in the early medieval period manifested itself in a series of territorial entities ranging from large kingdoms down to small districts known as pagi or regiones This book investigates these small early folk territories and the way that they evolved into the administrative units recorded in Domesday across an entire kingdom that of the East Saxons broadly speaking what is now Essex Middlesex most of Hertfordshire and south Suffolk A wide range of evidence is drawn upon including archaeology written documents place names and the early cartographic sources The book looks in particular at the relationship between Saxon immigrants and the native British population and argues that initially these ethnic groups occupied different parts of the landscape until a dynasty which assumed an Anglo Saxon identity achieved political ascendancy its members included the so called Prittlewell Prince buried with spectacular grave good in Prittlewell near Southend on Sea in southern Essex Other significant places discussed include London the seat of the first East Saxon bishopric the possible royal villas at Wicken Bonhunt near Saffron Walden and Maldon and St Peter s Chapel at Bradwell on Sea one of the most important surviving churches from the early Christian period

Collared Urns of the Bronze Age in Great Britain and Ireland Ian H. Longworth,1984 *Grahame Clark* Brian Fagan,2018-07-03

The British archaeologist Grahame Clark was a seminal figure in European and world archaeology for more than half of the twentieth century but at the same time one whose reputation has been outshone by other more visible luminaries His works were never aimed at a wide general public nor did he become a television or radio personality Clark was above all a scholar whose contributions to world archaeology were enormous He was also convinced that the study of prehistory was important for all humanity and spent his career saying so For this he was awarded the prestigious Erasmus Prize in 1990 an award only rarely given to archaeologists This intellectual biography describes Clark s remarkable career

and assesses his seminal contributions to archaeology Clark became interested in archaeology while at school studied the subject at Cambridge University and completed a groundbreaking doctorate on the Mesolithic cultures of Britain in 1931 He followed this study with a magisterial survey *The Mesolithic Settlement of Northern Europe* 1936 which established him as an international authority on the period At the same time he became interested in the interplay between changing ancient environment and ancient human societies In a series of excavations and important papers he developed environmental archaeology and the notion of ecological systems as a foundation of scientific multidisciplinary archaeology culminating in his world famous excavations at Starr Carr England in 1949 and his *Prehistoric Europe The Economic Basis* 1952 Clark became Disney Professor of Public Archaeology at Cambridge in 1952 and influenced an entire generation of undergraduates to become archaeologists in all parts of the world He was also the author of the first book on a global human prehistory *World Prehistory* 1961 *The Mysteries of Stonehenge* Nikolai Tolstoy, 2016-09-15 The mythic foundations of the world's greatest archaeological mystery
