The Campanile of Florence Cathedral Marvin Trachtenberg, 1971      *A History of Florence, 1200 - 1575* John M. Najemy, 2008-04-15 In this history of Florence distinguished historian John Najemy discusses all the major developments in Florentine history from 1200 to 1575 Captures Florence's transformation from a medieval commune into an aristocratic republic territorial state and monarchy Weaves together intellectual cultural social economic religious and political developments Academically rigorous yet accessible and appealing to the general reader Likely to become the standard work on Renaissance Florence for years to come      Giotto's Arena Chapel and the Triumph of Humility Henrike Christiane Lange, 2023-02-09 In this book Henrike Lange takes the reader on a tour through one of the most beloved and celebrated monuments in the world Giotto's Arena Chapel Paying close attention to previously overlooked details Lange offers an entirely new reading of the stunning frescoes in their spatial configuration The author also asks fundamental questions that define the chapel's place in Western art history Why did Giotto choose an ancient Roman architectural frame for his vision of Salvation What is the role of painted reliefs in the representation of personal integrity passion and the human struggle between pride and humility familiar from Dante's Divine Comedy How can a new interpretation regarding the influence of ancient reliefs and architecture inform the famous Assisi controversy and cast new light on the debate around Giotto's authorship of the Saint Francis cycle Illustrated with almost 200 color plates this volume invites scholars and students to rediscover a key monument of art and architecture history and to see it with new eyes      **Giotto the Painter. Volume 1-3** Michael Viktor Schwarz, 2023-04-17 Vol 1 Life Giotto 1334 is the first European artist about whom it is possible to write following the schema of life and work The situation of the sources however is complicated On Giotto's life there are on the one hand biographical accounts from the mid fourteenth century onwards that responded to various ideological requirements patriotism humanism Renaissance ideology cult of the artist on the other there is extensive documentary material from Giotto's lifetime which seems to reflect less the biography of an artist than that of a bourgeois businessman resolutely climbing the social ladder The present volume focuses on this second aspect of the Giotto figure's double life relating it to the form of existence of the pre-modern artist Vol 2 Works The paintings examined and contextualised in this volume are those secured for Giotto through early written sources These sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while Giotto was spiritually and intellectually formed in the sphere of the Florentine Dominicans his artistic path began in Rome in the shadow of the Curia The breakthrough to his own artistic concept came immediately before and during his work in Padua In addition to prominent churchmen ecclesiastical institutions and the King of Naples his clients were predominantly members of Italy's urban and financial elites The adoption and further development of his inventions by other especially Sienese painters pressured him in his later years to try new approaches again Vol 3 Survival Giotto is considered by many to be the founder of

modern painting This thesis is discussed and modified in the present volume on an empirical basis What emerges is that Giotto's impact cannot be reduced simply to the introduction of the study of nature Rather his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences The new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of great complexity outside the media of language and text which not only changed the face of European art but certainly contributed to the intellectual opening of Western societies *Giotto the Painter. Volume 2: Works* Michael Viktor Schwarz, 2023-04-17 The paintings examined and contextualised in this volume are those secured for Giotto through early written sources These sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while Giotto was spiritually and intellectually formed in the sphere of the Florentine Dominicans his artistic path began in Rome in the shadow of the Curia The breakthrough to his own artistic concept came immediately before and during his work in Padua In addition to prominent churchmen ecclesiastical institutions and the King of Naples his clients were predominantly members of Italy's urban and financial elites The adoption and further development of his inventions by other especially Sienese painters pressured him in his later years to try new approaches again

**The Noisy Renaissance** Niall Atkinson,2016-09-16 From the strictly regimented church bells to the freewheeling chatter of civic life Renaissance Florence was a city built not just of stone but of sound as well An evocative alternative to the dominant visual understanding of urban spaces The Noisy Renaissance examines the premodern city as an acoustic phenomenon in which citizens used sound to navigate space and society Analyzing a range of documentary and literary evidence art and architectural historian Niall Atkinson creates an acoustic topography of Florence The dissemination of official messages the rhythm of prayer and the murmur of rumor and gossip combined to form a soundscape that became a foundation in the creation and maintenance of the urban community just as much as the city s physical buildings Sound in this space triggered a wide variety of social behaviors and spatial relations hierarchical personal communal political domestic sexual spiritual and religious By exploring these rarely studied soundscapes Atkinson shows Florence to be both an exceptional and an exemplary case study of urban conditions in the early modern period

Diakité, Matthew T. Sneider, 2022-02-07 Giovanni Villani s New Chronicle traces the history of Europe Italy and Florence over a vast sweep of time from the Tower of Babel to the great earthquake of 1348 In the eleventh and twelfth books Villani depicts a particularly eventful period in the history of Florence whose grandeur is illustrated in several famous chapters describing the city s income expenses and magnificence The

dramatic account follows Florence's internal affairs as well as its conflicts with powerful lords like Castruccio Castracani and Mastino della Scala. The chronicler's perspective however ranges beyond his city as he documents such events as the imperial coronation of Louis of Bavaria, the penitential pilgrimage of Venturino da Bergamo and the first campaigns of the Hundred Year's War.

**Titian & Tragic Painting** Thomas Puttfarcken, 2005-01-01 Late in his life Titian created a series of paintings: the Four Sinners, the poesie for his patron Philip II of Spain and the Final Tragedies that were dark in tone and content, full of pathos and physical suffering. In this major reinterpretation of Titian's art, Thomas Puttfarcken shows that the often dramatic and violent subject matter of these works was not, as is often argued, the consequence of the artist's increasing age and sense of isolation and tragedy. Rather, these paintings were influenced by discussions of Aristotle's Poetics that permeated learned discourse in Italy in the mid sixteenth century. The Poetics led directly to a rich theory of the visual arts and painting in particular that enabled artists like Titian to consider themselves on equal footing with poets. Puttfarcken investigates Titian's late works in this context and analyzes his relations with his patrons, his intellectual and humanistic contacts and his choices of subject matter, style and technique.

**A Bridge to the Sky** Glaire D. Anderson, 2024 A Caliphal Daedalus examines connections between science and visual culture during the early Islamic scientific revolution of the caliphal age 650-1250 CE. It takes as its point of departure the figure of Abbas Ibn Firnas, d. 887, the most famous scientist and polymath of early Islamic Spain. The book considers his scientific activities as these intersected with design and craft, culminating in the aeronautics experiment for which he is best known today, as these are recounted in the Muqtabis, the chronicle compiled by the Cordoban court historian Ibn Hayyan, d. 1076. It calls into question notions that medieval Islamic artisans and designers were anonymous individuals working outside elite social and intellectual circles. The key passages from the chronicle are presented in English translation, including the oldest and most authoritative source for the aeronautics experiment. The Arabic texts are examined in tandem with the earliest Islamic scientific instruments, especially astrolabes, and illustrated Arabic treatises of astronomy and engineering preserved in museums and libraries around the globe. The book argues for a medieval Islamic court culture in which design and making were central to scientific intellectual pursuits and which may have shaped the culture of the Italian Renaissance.
