## **The Candidate:**

*The Candidate* Antonio Grimaldi, 2013-04-05 For decades businesses have been happy to lose millions of dollars in order to protect hiring methods that have proven ineffective Somehow businesses have persistently allowed untrained or corrupt managers select candidates based on their own bias and personal preference This practice is so engrained in business practice that candidates are encouraged to build a network specifically intended to exploit or circumvent the corrupt hiring manager Both the hiring manager and the candidate are completely distracted from their purpose to place the most qualified candidate in a position that can bring success to both the company and the individual Dr Antonio Grimaldi has developed a system that solves this problem He presents a method in which the hiring managers ask quantified questions that highlight qualities that every good employee should have and provides a framework for asking and quantifying talent that is needed for a particular job After careful examination three managers score the candidates answers can choose the best candidate according to their qualifications and depth of experience and not their personal network education or charm Businesses lose money when they hire the wrong person who is often unhappy and misses too much work is inefficient and perhaps even a liar and a thief When a company takes control over its hiring practices productivity increases candidates are happier and more successful and the company insulates itself from theft and sabotage In the current economy businesses cannot continue to throw away their money by failing to identify good candidates Dr Grimaldis quantitative method is needed now more than ever when businesses are hiring fewer people they need to be hiring the best people When businesses who use this process grow they can continue to surround themselves with the best candidates in the market *The Candidate's Dilemma*

Elisabeth A. Kramer, 2022-06-15 In *The Candidate's Dilemma* Elisabeth Kramer tells the story of how three political candidates in Indonesia made decisions to resist engage in or otherwise incorporate money politics into their electioneering strategies over the course of their campaigns As they campaign candidates encounter pressure from the institutional rules that guide elections political parties and voters and must also negotiate complex social relationships to remain competitive For anticorruption candidates this context presents additional challenges for building and maintaining their identities Some of these candidates establish their campaign parameters early and are able to stay their course For others the campaign trail results in an avalanche of compromises each one eating away at their sense of what constitutes moral and acceptable behavior *The Candidate's Dilemma* delves into the lived experiences of candidates to offer a nuanced study of how the political and personal intersect when it comes to money politics anticorruptionism and electoral campaigning in Indonesia

Belenky,2012-04-25 This is the first book on the U S presidential election system to analyze the basic principles underlying the design of the existing system and those at the heart of competing proposals for improving the system The book discusses how the use of some election rules embedded in the U S Constitution and in the Presidential Succession Act may cause skewed or weird election outcomes and election stalemates The book argues that the act may not cover some rare though possible situations which the Twentieth Amendment authorizes Congress to address Also the book questions the constitutionality of the National Popular Vote Plan to introduce a direct popular presidential election de facto without amending the Constitution and addresses the plan s Achilles Heel In particular the book shows that the plan may violate the Equal Protection Clause from the Fourteenth Amendment of the Constitution Numerical examples are provided to show that the counterintuitive claims of the NPV originators and proponents that the plan will encourage presidential candidates to chase every vote in every state do not have any grounds Finally the book proposes a plan for improving the election system by combining at the national level the one state one vote principle embedded in the Constitution and the one person one vote principle Under this plan no state loses its current Electoral College benefits while all the states gain more attention of presidential candidates
