The Teacher's Role in Implementing Cooperative Learning in the Classroom Robyn M. Gillies, Adrian Ashman, Jan Terwel, 2007-09-26 Cooperative learning is widely endorsed as a pedagogical practice

that promotes student learning Recently the research focus has moved to the role of teachers discourse during cooperative learning and its effects on the quality of group discussions and the learning achieved However although the benefits of cooperative learning are well documented implementing this pedagogical practice in classrooms is a challenge that many teachers have difficulties accomplishing Difficulties may occur because teachers often do not have a clear understanding of the basic tenets of cooperative learning and the research and theoretical perspectives that have informed this practice and how they translate into practical applications that can be used in their classrooms In effect what do teachers need to do to affect the benefits widely documented in research A reluctance to embrace cooperative learning may also be due to the challenge it poses to teachers control of the learning process the demands it places on classroom organisational changes and the personal commitments teachers need to make to sustain their efforts Moreover a lack of understanding of the key role teachers need to play in embedding cooperative learning into the curricula to foster open communication and engagement among teachers and students promote cooperative investigation and problem solving and provide students with emotionally and intellectually stimulating learning environments may be another contributing factor The Teacher s Role in Implementing Cooperative Learning in the Classroom provides readers with a comprehensive overview of these issues with clear guidelines on how teachers can embed cooperative learning into their classroom curricula to obtain the benefits widely attributed to this pedagogical practice It does so by using language that is appropriate for both novice and experienced educators The volume provides an overview of the major research and theoretical perspectives that underpin the development of cooperative learning pedagogy outlines how specific small group experiences can promote thinking and learning discusses the key role teachers play in promoting student discourse and demonstrates how interaction style among students and teachers is crucial in facilitating discussion and learning The collection of chapters includes many practical illustrations drawn from the contributors own research of how teachers can use cooperative learning pedagogy to facilitate thinking and learning among students across different educational settings

Planning and facilitating group learning Marcus Witt,Ben Knight,2025-02-28 This is an innovative text for teacher educators exploring detailed research and information that novice teachers need to know about group work in school settings There is more to learn about group work than simply sitting children together and letting them get on with it Group work across schools is very common and trainee teachers will step into classrooms where small groups are a predominant structure Research has suggested that there is a great deal more to understand about group work however there is a tacit presumption in ITE that trainee teachers will simply pick up the expertise associated with organising and managing group work This book aims to fill in the gaps and educate trainee teachers on the subtleties and complexities of group work to ultimately make their teaching more impactful and effective In this accessible and informative guide the authors delve into the existing research on how children learn in collaborative groups and what trainee teachers need to learn and understand about planning and executing group learning It examines the skills teacher educators should aim to develop in pre service teachers to help them build expertise in this important area Following other books within the series this book is packed with case studies and opportunities for critical thinking

Team-Based Learning Larry K. Michaelsen,Arletta Bauman Knight,L. Dee Fink,2002-12-30 Team learning is an especially powerful way of using small groups Different authors have used different terms when writing about small groups learning groups collaborative learning cooperative learning and team learning Despite the varying terminology all refer to the same idea putting individual students in a class into small groups for the purpose of promoting more active and more effective learning By creating a course structure that involves small groups in the initial acquisition of course content in learning how to apply that content and in the assessment of student learning the procedures of team learning offer teachers an extremely powerful tool for creating several kinds of higher level learning The

key to using this tool successfully lies in understanding a few key principles of team dynamics and then learning how to apply those principles to specific subject matter and in a variety of teaching situations This book explains those principles and shows how team learning transforms the structure of the course transforms small groups into teams and transforms the quality of student learning Teaching Cooperative Learning Elizabeth G. Cohen, Celeste M. Brody, Mara Sapon-Shevin, 2012-02-01 Winner of the 2004 Critics Choice Award presented by the American Educational Studies Association Teacher educators from ten institutions and programs in the United States Canada and Germany describe the ways in which they have changed teacher preparation to more fully incorporate cooperative learning concepts Analytical commentaries on the programs highlight the learning experience of these programs as well as underlying issues of needed reforms in teacher education Included among best practices in education cooperative learning may require a shift in program philosophy and disciplinary areas to meet the challenge of complex organizations and diverse student populations As the essays in the volume demonstrate a new alignment of field experiences to provide support for novices to implement cooperative strategies and to receive timely and effective supervision for these attempts may also be required
