EDI and Data Networking in the Public Sector Kim Viborg Andersen, 2012-12-06 When researching teaching or working with information systems in the public sector one is left with few or often no textbooks that provide useful case studies or surveys on the implementation and effects of integrating information technologies in the organizations operations This is surprising since in most first world countries the public sector consumes a substantial part of the gross national product Even more astonishing is the vast amount of financial and organizational resources that are spent developing and implementing various information systems We decided to write this book to provide information for those studying information systems at business schools information and computer departments at colleges universities and for those working hands on with EDI and data

networking in public administration Thus our primary target groups for this book are professionals training MA courses computer science MBA MP A and political science EDI has been seen as a means to wire the various policy areas in the public sector Those included are not limited strictly to the public organizations but extend to their trade partners Also government has sought ways to stimulate the usage of ED I in the private sector beyond those transactions involving direct communication with the public sector In this book we have contributors from eight countries and a total of 14 chapters reporting on issues of importance when developing and implementing EDI when government wants to stimulate the diffusion of EDI in society and when organizations want to address the impact of their investments in ED
