Hybrid Fictions Daniel Grassian, 2015-09-11 Since the 1960s academics have theorized that literature is on its way to becoming obsolete or at the very least has lost part of its power as an influential medium of social and cultural critique This work argues against that misconception and maintains that contemporary American literature is not only alive and well but has grown in significant ways that reflect changes in American culture during the last twenty years In addition this work argues that beginning in the 1980s a new allied generation of American writers born from the late 1950s to the early 1970s has emerged whose hybrid fiction blend distinct elements of previous American literary movements and contain divided social cultural and ethnic allegiances The author explores psychological philosophical ethnic and technological hybridity The author also argues for the importance of and need for literature in contemporary America and considers its future possibilities in the realms of the Internet and hypertext David Foster Wallace Neal Stephenson Douglas Coupland Sherman Alexie William Vollmann Michele Serros and Dave Eggers are among the writers whose hybrid fictions are discussed

The Control of Biblical Meaning George Aichele, 2001-02-01 This provocative book pursues a series of questions associated with canons of the Bible Aichele draws deeply on the insights of poststructuralist literary theory as he pursues these questions He also engages in close readings of specific biblical and nonbiblical texts to demonstrate ways that canon controls the meanings of its texts

Reading Matters Joseph Tabbi, Michael Wutz, 2018-05-31 The convergence of twentieth century narrative and technology is one of the most important developments in current literary study A decade after the founding of the Society for Literature and Science and the appearance of such influential books as Kathleen Woodward s Culture of Information and William Paulson s The Noise of Culture Joseph Tabbi and Michael Wutz have edited a landmark volume to summarize this still emerging field Twelve original essays and the editors introductory overview show how these theoretical concerns can contribute to the practical study of narrative Reading Matters covers the range of contemporary literature from the canonical novels of high modernism and postmodernism through subjects new to the academic agenda such as cyberpunk and hypertext fiction In an age that has proclaimed the death of the novel many times over the contributors argue persuasively for the continued vitality of literary narrative By responding in ingenious ways to the capabilities of other media they assert the novel has enlarged and redefined its territory of representation and its range of techniques and play while maintaining its viability in the new media

assemblage **Infectious Rhythm** Barbara Browning, 2013-06-17 Barbara Browning follows the trail of infectious rhythm from the ecstatic percussion of a Brazilian carnival group to the eerily silent video image of the LAPD beating a man like a drum Throughout she identifies the metaphoric strain of contagion which both celebrates the diasporic spread of African culture and serves as the justification for its brutal repression The essays in this book examine both the vital and violent ways in which recent associations have been made between the AIDS pandemic and African diasporic cultural practices including religious worship music dance sculpture painting orature literature and film While pointing to the lengthy and complex history of the metaphor of African contagion Browning argues that in its politicized life affirming embodiment the figure might actually teach us to respond to epidemia humanely **Constructing Objectivity: Emotions in Legal**

Decision-making Stina Bergman Blix, Sharyn Lee-Anne Roach Anleu, Mojca M. Plesnicar, Louise Victoria Johansen, 2025-08-28 The field of Law and Emotion originated in discussions that disputed the bifurcation of emotion and law In the past decade these discussions have inspired socio legal research on the dynamic and social dimensions of court work The field has grown exponentially in diverse disciplines such as sociology law philosophy anthropology and criminology At the core of legal decision making lies the fundamental principles of objectivity impartiality and independence The Research Topic Constructing Objectivity Emotions in Legal Decision making addresses the dialectical processes of translating these principles into everyday judicial practice across a wide range of legal systems Building on empirical research including observations interviews shadowing vignettes and workshops with legal professionals this collection engages with objectivity in the making It addresses such questions as What role does court architecture and material objects play in the emotional dynamic of the legal procedure How do judges manage victims emotional statements or evaluate their credibility How do judges make independent decisions in a collective setting What role does extra legal lay specialist expertise play in co constructing legal knowledge of relevance to decision making How do judges embrace the idea of objectivity How is all this influenced by the growing digitalization of courts and hearings In so doing it investigates the complexity of objectivity as an ideal a judicial value requiring performance promoting courtroom atmosphere and as sometimes feigned *Metaverse Communication* Prasanna Bhattathiri, 2025-01-03 Metaverse Communication Redefining Connections delves into the transformative potential of the Metaverse This book explores whether the Metaverse can truly become a space for life changing experiences and interactions surpassing the current Internet We define the Metaverse as a shared 3D virtual space that combines elements of the digital and physical worlds This book examines whether technology can overcome infrastructure challenges corporate greed and physical limitations to create a continuously shared virtual universe We highlight key industry insights such as Facebook s rebranding to Meta and its significant investment in the Metaverse With predictions like Bloomberg s estimate of an 800 billion Metaverse market by 2024 the book discusses the enormous economic and social potential of this new frontier Metaverse Communication Redefining Connections provides a clear authoritative

guide to understanding the Metaverse its applications and its implications for the future of communication and interaction

Cyberculture, Cyborgs and Science Fiction William S. Haney, 2006 Addressing a key issue related to human nature this book argues that the first person experience of pure consciousness may soon be under threat from posthuman biotechnology In exploiting the mind s capacity for instrumental behavior posthumanists seek to extend human experience by physically projecting the mind outward through the continuity of thought and the material world as through telepresence and other forms of prosthetic enhancements Posthumanism envisions a biology machine symbiosis that will promote this extension arguably at the expense of the natural tendency of the mind to move toward pure consciousness As each chapter of this book contends by forcibly overextending and thus jeopardizing the neurophysiology of consciousness the posthuman condition could in the long term undermine human nature defined as the effortless capacity for transcending the mind s conceptual content Presented here for the first time the essential argument of this book is more than a warning it gives a direction far better to practice patience and develop pure consciousness and evolve into a higher human being than to fall prey to the Faustian temptations of biotechnological power As argued throughout the book each person must choose for him or herself between the technological extension of physical experience through mind body and world on the one hand and the natural powers of human consciousness on the other as a means to realize their ultimate vision **The Cambridge History**

of Science Fiction Gerry Canavan, Eric Carl Link, 2018-12-31 The first science fiction course in the American academy was held in the early 1950s In the sixty years since science fiction has become a recognized and established literary genre with a significant and growing body of scholarship The Cambridge History of Science Fiction is a landmark volume as the first authoritative history of the genre Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past Science fiction as a literary genre is the central focus of the volume but fundamental to its story is its non literary cultural manifestations and influence Coverage thus includes transmedia manifestations as an integral part of the genre s history including not only short stories and novels but also film art architecture music comics and interactive media **Blockchains in 6G** Mischa Dohler, Diego R. Lopez, Chonggang Wang, 2024-06-14 Based on work done
