Therapeutic Interventions in Three Sentences Stefan Hammel, 2019-10-21 Following tenets set out by Milton Erickson *Therapeutic Interventions in Three Sentences* Reshaping Ericksonian Hypnotherapy by Talking to the Brain and

Body presents an array of short effective commands which have been developed for use in connection with a wide range of mental and psychosomatic disorders Examining in detail the basic building blocks which must be in place in order for someone to send an effective command to his or her sub conscious mind the book presents an elegant way of using informal variations of Ericksonian hypnotherapy in awake states and transferring these principles to a variety of therapeutic settings The methods described follow specific rules derived from hypnotherapy but can be integrated into any other form of counselling or therapy and can be used in short sessions in telephone consultations and with patients in critical states as well as conversations of a therapeutic nature by non therapeutic professionals The book explains why and how these interventions work their general structure and how they can be used to tackle specific needs such as trauma depression and anxiety disorders The book will be of great interest to counsellors doctors and therapists of different orientations who are looking for therapeutic methods that can be used in short sessions or with patients in critical states as well as non therapeutic professionals who engage in conversations of a therapeutic nature such as social workers pastors nurses carers and teachers including SEN teachers
