Anafa: The Hellenistic and Roman pottery ,1994 *Morgantina Studies, Volume VI* Shelley C. Stone, 2015-01-25

Excavation of the ancient city of Morgantina in southeastern Sicily since 1955 has recovered an extraordinary quantity and variety of pottery both locally made and imported This volume presents the fine ware pottery dating between the second half

of the fourth century BCE when Morgantina was a thriving inland center closely tied to the Hellenistic east through Syracuse and the first half of the first century CE when Morgantina had been reduced to a dwindling Roman provincial town that would soon be abandoned. Bearing gloss and often paint or relief, these fine ceramics were mostly tableware and together they provide a well defined picture of the evolving material culture of an important urban site over several centuries. And since virtually all these vessels come from dated deposits, this volume provides wide ranging contributions to the chronology of Hellenistic and early Roman pottery. An introductory chapter sketches out a comprehensive history of the city, discusses the many well dated archaeological deposits that contained the excavated pottery and defines the major fabrics of the ceramics found at the site. The bulk of the volume consists of a scholarly presentation of more than 1 500 pottery vessels, analyzing their shapes, fabrics, chronology, decoration and techniques of fabrication. This rich ceramic material includes significant bodies of Republican black gloss and red gloss vases, Sicilian polychrome ware and Eastern Sigillata A as well as early Italian terra sigillata with numerous examples imported from Arezzo and other Italian centers along with regional versions from Campania and elsewhere on Sicily. The relief ware includes important groups of third century BCE medallion cups and hemispherical moldmade cups of the second and first centuries BCE. Morgantina was also an active center of pottery production and the debris from several workshops has been recovered, enabling Shelley Stone to reconstruct the working techniques and materials of the local craftsmen, the range of ceramics they produced and how their products were influenced by pottery imported to the site from elsewhere on Sicily, the Italian mainland and even more distant centers. The volume also presents new information about the sources of the clay used by the Morgantina potters as revealed by X ray fluorescence analysis of selected vases.

Hellenistic Pottery Sarah A. James, 2018-08-20. Using deposits recently excavated from the Panayia Field, this volume substantially revises the absolute chronology of Corinthian Hellenistic pottery as established by G. Roger Edwards in *Corinth VII* 3 (1975). This new research, based on quantitative analysis of over 50 deposits, demonstrates that the date range for most fine ware shapes should be lowered by 50-100 years. Contrary to previous assumptions, it is now possible to argue that local ceramic production continued in Corinth during the interim period between the destruction of the city in 146 B.C. and when it was refounded as a Roman colony in 44 B.C. This volume includes detailed shape studies and a comprehensive catalogue. With its presentation of this revised Panayia Field chronology, *Corinth VII* 7 is a long awaited and much needed addition to the Corinth series.

An Island Economy Scott Gallimore, 2016. This book offers the first presentation of Hellenistic and Roman

period ceramic assemblages from the city of Hierapytna located on the southeast coast of Crete Recovered from three rescue excavations in the heart of the ancient city this pottery records a diachronic history of Hierapytna from the third century B C to the seventh century A D Through meticulous analysis of these assemblages including a detailed catalogue of all of the major ceramic categories encountered on Greco Roman sites and an exhaustive economic synthesis that places Hierapytna in regional and international contexts Scott Gallimore documents the growth and decline of this ancient city An evolving role in numerous exchange networks enabled Hierapytna to grow from a promising Hellenistic center into a major Roman metropolis before it succumbed to pressures that led to a steady decline throughout the Late Roman period An Island Economy outlines the historical trajectory of an eastern polis and demonstrates that its rise and fall are connected to pan Mediterranean exchange networks a subject that will be of great interest to archaeologists ceramicists economic historians and students of the Greco Roman world Late Classical, Hellenistic, and Roman Pottery John W.
