environmental studies cultural studies psychology and politics      Resilience in the Pacific and the Caribbean Simon Hollis, 2020-10-26 This book critically examines the global diffusion and local reception of resilience through the implementation of Disaster Risk Reduction DRR programmes in Pacific and Caribbean island states Global efforts to strengthen local disaster resilience capacities have become a staple of international development activity in recent decades yet the successful implementation of DRR projects designed to strengthen local resilience remains elusive While there are pockets of success a gap remains between global expectations and local realities Through a critical realist study of global and local worldviews of resilience in the Pacific and Caribbean islands this book argues that the global advocacy of DRR remains inadequate because of a failure to prioritise a person orientated ethics in its conceptualization of disaster resilience This regional comparison provides a valuable lens to understand the underlying social structures that makes resilience possible and the extent to which local governments communities and persons interpret and modify their behaviour on risk when faced with the global message on resilience This book will be of much interest to students of resilience risk management development studies and area studies      **Migration and Development in the South Pacific** John Connell, 1990

Genz, 2018-02-28 On the atoll of Rongelap in the northern seas of the Marshall Islands apprentice navigators once learned to find their way across the ocean by remotely sensing how islands transform the patterning of swell and currents Renowned for their instructional stick charts that model and map the interplay of islands and waves these students of wave piloting techniques embarked on trial voyages to ruprup jo kur a Marshallese expression roughly translated as breaking the shell of the turtle which would confer their status as navigators These traditional practices already in decline with imposing colonial occupations came to an abrupt halt with the Cold War era nuclear weapons testing program conducted by the United States The residents and their descendants are still trying to recover from the myriad environmental biological social and psychological impacts of the nuclear tests Breaking the Shell presents the journey of Captain Korent Joel who having been forced into exile from the near apocalyptic thermonuclear Bravo test of 1954 has reconnected to his ancestral maritime heritage and forged an unprecedented path toward becoming a
