(In)-Security? Mr. Christian Bogmans, Mr. Andrea Pescatori, Ervin Prifti, 2021-09-24 We study how two aspects of food
insecurity caloric insufficiency and diet composition are affected by aggregate economic fluctuations The use of cross
country panel data allows us to adopt a global perspective on the identification of the macroeconomic determinants of food
insecurity Income shocks are the most relevant driver of food insecurity displaying high elasticities at the early stages of
economic development The role of food price shocks is more limited Social protection has a direct effect and mitigates the
impact of income shocks Effects are highly heterogeneous across a range of structural characteristics of the economy
highlighting the role of distributional aspects and of food import dependency Handbook of Survey- Based Business Cycle
Analysis Georg Goldrian, 2007-01-01 This Handbook aims to provide an overview of regular survey activities as well as to
show how survey results can be used scientifically in the context of business cycle analysis and forecasting Examples of
various business surveys are described in detail starting with their objectives the questions they pose how they are weighted
and extrapolated and the representativeness of their results A detailed scientific examination of the explanatory value of the
data is also made in order to demonstrate their potential usefulness The Handbook has three parts firstly it presents the
importance of business surveys for empirical research Secondly selected surveys are introduced in detail such as the Ifo
Business Survey and the Ifo Investment Survey and thirdly a broad spectrum of studies on the consequence of the survey
results is presented The significance of the surveys applied equally to business cycle analysis and to forecasting An array of
modern methods of time series analysis and econometric model construction is used in these investigations Economica
