Studies in the Economic History of the Middle East M. A. Cook, 2015-12-22 First Published in 2004 Did medieval Muslims have the concept of a social class If not can we usefully employ the term in analysing their society Were there such things as guilds in the medieval Middle East Would we understand the economic decline of Mamluk Egypt better if we used paradigms derived from the study of the economic history of England and Italy in the fourteenth and fifteenth centuries How much can the enormous fiscal archive of the Ottoman Empire tell us about population history Why was the Middle East so backward if indeed it was compared with the rest of the Afro Asian world in the nineteenth century Have Iran and Iraq better prospects for economic growth than otherwise comparable countries thanks to their oil royalties Or are these paradoxically a hindrance rather than a help The study of the economic history of the Middle East in Islamic times is notoriously underdeveloped This volume contains papers discussed at an international conference held at the School of Oriental and African Studies in 1967 together with three short critical essays which attempt to tie them together Some papers are specific contributions to research others survey wider areas The volume is not a comprehensive history or a systematic inventory but it is hoped that in addition to presenting a set of papers which are interesting in themselves it will give the reader a tolerable idea of the state of studies in the field

The New Authoritarianism in the Middle East and North Africa Stephen J. King, 2009-10-28 Ultimately King s forward thinking analysis offers a way to enhance the prospects for democracy in the Middle East and North Africa

SDGs in Africa and the Middle East Region Ismaila Rimi Abubakar, Izael da Silva, Rudi Pretorius, Khaled Tarabieh, 2024-09-01 Africa is one of the most vulnerable regions and one where the implementation of the SDGs is particularly urgent Underinvestments in natural conservation are increasing the

vulnerability of people across many African countries whose well being is endangered by deteriorating socio economic and environmental conditions This volume provides a contribution towards showcasing how natural resources may be more efficiently used and investments may be mobilised to augment the limited public sector funds available to achieve the SDGs This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative

Western Imperialism in the Middle East 1914-1958 D. K. Fieldhouse, 2006-04-06 The term Fertile Crescent is commonly used as shorthand for the group of territories extending around the Rivers Tigris and Euphrates Here it is assumed to consist of Syria Lebanon Jordan Iraq and Palestine Much has been written on the history of these countries which were taken from the Ottoman empire after 1918 and became Mandates under the League of Nations For the most part the histories of these countries have been handled either individually or as part of the history of Britain or France In the first instance the emphasis has normally been on the development of nationalism and local resistance to alien control in a particular territory leading to the modern successor state In the second most studies have concentrated separately on how either France or Britain handled the great problems they inherited seldom comparing their strategies The aim of this book is to see the region as a whole and from both the European and indigenous points of view The central argument is that the mandate system failed in its stated purpose of establishing stable democratic states out of what had been provinces or parts of provinces within the Ottoman empire Rather it generated basically unstable polities and in the special case of Palestine one totally unresolved and possibly unsolvable conflict The result was to leave the Middle East as perhaps the most volatile part of the world in the later twentieth century and beyond The main purpose of the book is to examine why this was so

The Middle East Ellen M. Lust, 2022 In the newly updated Sixteenth Edition of The Middle East Ellen Lust and contributors comprehensively examine regional trends and offer in depth country profiles to illuminate this vital region

Rich And Poor States In The Middle East Malcolm H. Kerr, El Sayed Yassin, Jeswald Salacuse, Ismail Serageldin, 2019-06-04 While oil wealth has enriched some Middle East Arab nations others that lack oil resources have remained poor and are looking now to their oil rich neighbors for development assistance This collection of studies on the economic social and political relationships between the haves and the have nots in the Middle East focuses on Egypt the largest state in the region and on its prospects for change based on financial assistance from other Arab countries The authors have many disagreements about the future of both rich and poor nations in the Middle East and considerable skepticism about the possibility of transforming Egypt but they do agree that the future must be projected in the framework of a new regional order in which oil wealth labor migration and liberalized national economies are fundamental realities

Introduction to the Modern Economic History of the Middle East Zvi Yehuda Hershlag, 1980

The Middle East Water Question Tony Allan, 2001-11-22 Is there enough water on this planet for a global population that will shortly double its present size The answer is of huge importance for people everywhere but particularly to the peoples and political leaders of the Middle East and North Africa Already the region s economies are as dependant on water from outside the region as they are on the renewable waters of the region They will be much more dependant in the future Professor Allan s important new book aims to remove much of the confusion surrounding the issue of water in the Middle East As well as explaining the particular issues of conflict in the region he argues that the answer to these problems lies at the global rather than local level The national water policies of the region political as well as economic can only be properly understood at an international level And it is from this vantage point that solutions from rendering water globally available to addressing the environmental issues to do with its use must be found

The Middle East Water Question is a major book by one of the world s leading authorities on water issues the product of a decade of involvement with officials professionals Middle East and North African governments and international agencies such as the World Bank and FAO
