Boundaryless Hospital Horst Albach, Heribert Meffert, Andreas Pinkwart, Ralf Reichwald, Wilfried von Eiff, 2016-02-01. This book discusses current health care challenges and new strategies for innovative solutions in this area from an interdisciplinary perspective of health care management, business, economics and medicine. It presents the idea of a boundaryless hospital, a conceptual model of a patient-centric, value-based health network that overcomes typical sectorial, organizational and geographical boundaries and offers greater efficiency and better quality outcomes for patients. Effective health care for a growing and aging population is a major challenge for economies all over the world. New breakthroughs in medical technology and pharmaceuticals, as well as digitization, provide scope for more efficiency and for a better quality of health care. Novel organization forms and management concepts are key for coping with the increasing cost pressure observed in most health care systems. The contributions in this volume present innovative strategies for developing and implementing the concept of a boundaryless hospital. They highlight experiences from various countries and with different treatments. The book project was initiated and carried out by the Center for Advanced Studies in Management (CASiM), the interdisciplinary research center of HHL Leipzig Graduate School of Management for business administration in the 21st century.

Social Justification and Political Legitimacy Luis Antonio Vila-Henninger, 2020-10-16. This volume explores voters' political rationalizations. The author analyzes semi-structured interview data from 120 American voters collected from 2013-2015 about their positions on three economic referenda or direct democratic economic policies (DDEPs) on the Arizona state ballot from 2008-2012. Building on the literature on voter reasoning and rationalization, the author firstly probes how the intersection of economic position and partisan affiliation shapes partisan voters' rationalizations of their DDEP positions. Secondly, he investigates the political and economic discourses that voters use to justify their DDEP positions. This book

extends classic sociological theories of individual level and collective legitimacy along with contemporary theories of voter rationalization The findings also help to build theories of American political ideology and values neoliberalism moral economy and norms of self interest
