

An aerial photograph of a dry, cracked landscape, likely a salt flat or a desert. The ground is light-colored and shows deep, irregular cracks. In the center, there is a yellow rectangular box with a black border containing the title text. The background shows a vast, flat expanse of land with some distant, low-lying vegetation or structures.

Social Aspects Of Sustainable Dryland Management:

Social Aspects of Sustainable Dryland Management Daniel Stiles, 1995-06-20 With dryland areas accommodating approximately one billion people in over a hundred countries there is obviously a problem of increased stress being placed on the natural resources of these areas which ultimately contributes to overall land degradation Coupled with this many developing countries particularly in Africa are showing a fall in agricultural production per capita with people migrating away from dryland areas such relocation to marginal lands and forests or to already over populated cities further enhances global land degradation With this in mind Social Aspects of Sustainable Dryland Management attempts to address the overall problem of land degradation and provides ways in which dryland productivity and viability can be increased and managed for future years The volume bases its results on case studies and field research projects and encourages a greater involvement of the local population in developing methods of management of their own natural resources This volume therefore embodies a concept of development far beyond conventional methods It aims to show that land management must develop around the priorities needs and objectives of the people concerned and emphasises the need to involve local people in solving the problems of resource degradation so that future research and modern technologies can be developed with their participation Above all it seeks to recognise the value of indigenous knowledge in sustainable development so that such knowledge systems can become the starting point from which to plan management strategies and new technological adaptations

Combating Desertification Land Degradation and Climate Change: Management of Dry Lands T.S. Chouhan, 2018-06-01 Although much is known about the processes and effects of desertification land degradation and climate change little is understood about the links between them Less still is known about how these processes are likely to interact in different social ecological systems around the world or how societies might be able to adapt to this twin challenge This book identifies key vulnerabilities to the combined effects of climate change and land degradation around the world It identifies triple win adaptations that can tackle both climate change and land degradation whilst supporting biodiversity and ecosystem services Desertification Land Degradation and Climate Change Assessment Mitigation and Remediation research results in sustainable land management land degradation status and mitigation in the world It includes background chapters with continental and international perspectives dealing with desertification land degradation and climate change studies The book assembles various topics of interest for a large audience They include carbon sequestration and stocks modern techniques to trace the trends of land degradation traditional and modern approaches of resource base conservation soil fertility management reforestation rangeland rehabilitation land use planning GIS techniques in desertification risk cartography participatory ecosystem management policy analyses and possible plans for action Various climatic domains in Africa Asia Europe and the Americas are covered The book will be of interest to a variety of environmental scientists agronomists national and international policy makers and a number of organizations dealing with sustainable management of natural

resources **Sustainable Livelihoods in Kalahari Environments** Deborah Sporton, David S. G. Thomas, 2002 This edited collection provides a comprehensive overview of the dynamics of contemporary natural resource based livelihoods and implications for their sustainability in the context of the Kalahari environment of southern Africa a region subject to marked spatial and temporal natural variability Each chapter is written by an active Kalahari researcher and addresses from an environmental or a social perspective the implications of different policies for rural livelihoods and coping strategies In each chapter one or more of the key tenets of environment policy and structural land use change provides the central element around which the sustainable livelihoods theme is considered Although the focus of the book is the Kalahari introductory and concluding chapters in turn contextualise the research and discuss key enviro development issues which resonate across the individual chapters with relevance for wider global debates Human Impact on Environment and Sustainable Development in Africa Michael B.K. Darkoh, 2018-12-20 This title was first published in 2003 Based on a blend of knowledge and perspectives from a variety of disciplines this volume examines the human environment interaction in Africa with a focus on the economic social and political processes that generate environmental change and problems in this region Currently there are controversies over and challenges to such concepts and issues as environment human relationships ecological resilience decertification sustainable development globalization and North South dialogue This book draws upon past and present research findings to discuss these issues It features an examination of the characteristics processes and patterns of environmental crises an analysis of the principal issues and challenges facing policy makers and implementers and the promotion of awareness of theoretical empirical and comparative research The volume not only seeks to answer some of the old questions but also open up new ones for further discussion *Humans, Other Beings and the Environment* Munyaradzi Mawere, 2015-10-05 *Humans Other Beings and the Environment* is an ethnographic study of the possibilities for the mutual symbiotic co existence of human beings a unique species of forest insects and natural forests The result of extensive fieldwork conducted over a period of thirteen months the book highlights the continuum among humans wild insects and environmental conservation outcomes in a specific environment of southeastern Norumedzo in rural Zimbabwe In this respect it describes interactions and relationships between humans other beings and the natural forests to demonstrate how some aspects of the emerging body of literature in the posthumanities and relational ontologies can work to grasp the collaborative interactional space for different social actors in the cosmos through which cognitive and knowledge communities can be extended Furthermore the book raises critical questions for conservation sciences political ecology and environmental anthropology as it demonstrates the extent of relevance and application of the Norumedzo conservation case study with particular regard to conservational problems and asymmetrical relations between humans and other beings in other scenarios in Zimbabwe and beyond Complicating many assumptions about knowledge production nature and culture the book offers independent and critical insights into the interpretation of modernist science posthumanist ideas and

indigenous epistemologies and relates these to existing studies As such it will be of interest not only to anthropologists but also to political scientists environmentalists and policy makers in Zimbabwe southern Africa and beyond

Managing Natural Resources for Development in Africa Washington Odongo Ochola,P. C. Sanginga,Isaac Bekalo,2010 The complex and dynamic interlinks between natural resource management NRM and development have long been recognized by national and international research and development organizations and have generated voluminous literature However much of what is available in the form of university course books practical learning manuals and reference materials in NRM is based on experiences from outside Africa Managing Natural Resources for Development in Africa A Resource Book provides an understanding of the various levels at which NRM issues occur and are being addressed scientifically economically socially and politically The book s nine chapters present state of the art perspectives within a holistic African context The book systematically navigates the tricky landscape of integrated NRM with special reference to Eastern and Southern Africa against the backdrop of prevailing local national regional and global social economic and environmental challenges The authors wide experience the rich references made to emerging challenges and opportunities and the presentation of different tools principles approaches case studies and processes make the book a rich and valuable one stop resource for postgraduate students researchers policymakers and NRM practitioners The book is designed to help the reader grasp in depth NRM perspectives and presents innovative guidance for research design and problem solving including review questions learning activities and recommended further reading The book was developed through a writeshop process by a multi disciplinary team of lecturers from the University of Nairobi Egerton University Kenyatta University the University of Zimbabwe the University of Malawi Makerere University and the University of Dar es Salam In addition selected NRM experts from regional and international research organizations including the World Agroforestry Center ICRAF the Africa Forest Forum RUFORUM IIRR and the International Development Research Centre IDRC participated in the writeshop and contributed material to the book

The Socio-Economic Causes and Consequences of Desertification in Central Asia Roy Behnke,2008-08-19 This book contains a selection of papers presented at the Advanced Research Workshop on The Socio economic causes and consequences of desertification in Central Asia held in Bishkek Kyrgyzstan in June 2006 The meeting provided a forum for twenty six scientists from Central Asia and NATO countries to discuss the human dimensions of the desertifi tion process Papers presented to the meeting examined recent scientific evidence on the impact of desertification on livestock production public health and biodiversity and contributed to the formulation of coh ent national and regional policies for the management of watersheds rangelands and irrigated agriculture The meeting was co directed by Roy Behnke of the Macaulay Institute UK and by Lapas Alibekov of the Samarkand State University Uzbekistan Both the workshop and this subsequent publication have been financed by the NATO Scientific Affairs Division and we gratefully acknowledge this support The Bishkek meeting was ably hosted by the Kyrgyz Sheep Breeders Association under the dir tion of Akylbek

Rakaev who contributed substantially to the successful running of the workshop Deliberations at the workshop emphasized that policy failures at national level had promoted desertification within the region The End of Desertification? Roy H. Behnke, Michael Mortimore, 2016-04-12 The question in the title of this book draws attention to the shortcomings of a concept that has become a political tool of global importance even as the scientific basis for its use grows weaker The concept of desertification it can be argued has ceased to be analytically useful and distorts our understanding of social environmental systems and their resiliency particularly in poor countries with variable rainfall and persistent poverty For better policy and governance we need to reconsider the scientific justification for international attempts to combat desertification Our exploration of these issues begins in the Sahel of West Africa where a series of severe droughts at the end of the 20th century led to the global institutionalization of the idea of desertification It now seems incontrovertible that these droughts were not caused primarily by local land use mismanagement effectively terminating a long standing policy and scientific debate There is now an opportunity to treat this episode as an object lesson in the relationship between science the formation of public opinion and international policy making Looking beyond the Sahel the chapters in this book provide case studies from around the world that examine the use and relevance of the desertification concept Despite an increasingly sophisticated understanding of dryland environments and societies the uses now being made of the desertification concept in parts of Asia exhibit many of the shortcomings of earlier work done in Africa It took scientists more than three decades to transform a perceived desertification crisis in the Sahel into a non event This book is an effort to critically examine that experience and accelerate the learning process in other parts of the world Alternative Irrigation Christopher J Barrow, 2014-02-04 An introduction to runoff agriculture a form of agricultural irrigation this text describes how the use of surface and subsurface water often overlooked and wasted enables both small farmers and commercial agriculturists to improve yields and the security of harvest even in harsh and remote environments The text introduces the techniques and strategies as well as the challenges and the potential of the crucial approach which can contribute so much to reducing land degradation and improving conservation and sustainability The Dictionary of Physical Geography David S. G. Thomas, Andrew S. Goudie, 2013-05-28 The third edition of this comprehensive encyclopedic dictionary covers the whole field of physical geography and provides an essential reference for all students and lecturers in this field *African Environmental Crisis* Gufu Oba, 2020-03-13 This book explores how and why the idea of the African environmental crisis developed and persisted through colonial and post colonial periods and why it has been so influential in development discourse From the beginnings of imperial administration the idea of the desiccation of African environments grew in popularity but this crisis discourse was dominated by the imposition of imperial scientific knowledge neglecting indigenous knowledge and experience African Environmental Crisis provides a synthesis of more than one and a half century s research on peasant agriculture and pastoral rangeland development in terms of soil erosion control animal husbandry grazing

schemes large scale agricultural schemes social and administrative science research and vector disease and pest controls Drawing on comparative socio ecological perspectives of African peoples across the East African colonies and post independent states this book refutes the hypothesis that African peoples were responsible for environmental degradation Instead Gufu Oba argues that flawed imperial assumptions and short term research projects generated an inaccurate view of the environment in Africa This book s discussion of the history of science for development provides researchers across environmental studies agronomy African history and development studies with a lens through which to understand the underlying assumptions behind development projects in Africa The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Animal Welfare and Meat Production Neville G. Gregory, Temple Grandin, 2007-03-12 Animal welfare issues are becoming increasingly prominent in animal production for both economic and moral reasons This book presents a clear understanding of the relationship between the welfare of major food animal species and their physiology and the direct impact this has on meat quality This new edition focuses on recent research and developments and also looks into welfare in aquaculture

The Archaeology of Drylands Graeme Barker, David Gilbertson, 2003-09-02 Many dryland regions contain archaeological remains which suggest that there must have been intensive phases of settlement in what now seem to be dry and degraded environments This book discusses successes and failures of past land use and settlement in drylands and contributes to wider debates about desertification and the sustainability of dryland settlement

New Space Markets G. Haskell, Michael J Rycroft, 2013-03-07 Space is no longer the special protected domain that it was in the past Because of the importance of its practical applications it is becoming integrated into the mainstream of economic activity Technology push is giving way to the assessment of market opportunities and demand pull Funding from the public sector is declining while interest in private financing is steadily growing The value added and service industries are increasing in importance New technologies will be developed in a context of privatisation deregulation and globalization An international and interdisciplinary Symposium was organized by the International Space University to bring together a diverse group of people technical and non technical engaged in the creation of new approaches to space applications in order to share experiences and to exchange ideas on the way forward The Proceedings of this Symposium make stimulating reading for all who are engaged in the market place of space and its applications

Combating Desertification with Plants D. Pasternak, Arnold Schlissel, 2012-12-06 The conference Combating Desertification with Plants was held in Beer Sheva Israel from November 2-5 1999 and was attended by 70 participants from

30 countries and or international organisations Desertification the degradation of soils in drylands is a phenomenon occurring in scores of countries around the globe The number of people in semiarid regions affected by the steady decline in the productivity of their lands is in the hundred millions The measures required to halt and reverse the process of desertification fall into many categories policy institutional sociological anthropological and technical Although technical solutions are not currently in vogue the conference organizers felt that perhaps the pendulum had swung too far in the direction of participatory approaches Hence IPALAC The International Program for Arid Land Crops whose function is to serve as a catalyst for optimizing the contribution of plant germplasm to sustainable development in desertification prone regions felt the time was opportune for providing a platform for projects where the plant driven approach to development finds expression Some 45 papers were delivered at the conference falling into the categories of this volume Overview Potential Germplasm for Arid Lands Introduction Domestication and Dissemination of Arid Land Plants Land Rehabilitation and Mechanisms of Plant Transfer The conference was funded by UNESCO Division of Ecological Sciences the Ministry of Foreign Affairs of Finland and MASHAV Israel s Center for International Development Cooperation
