Cataloging Policy and Support Office,2004 Social Control and Social Change Liddell Henry,2019-08-24 Socialization is predominately an unconscious process by which a new born child learns the values beliefs rules and regulations of society or internalizes the culture in which it born Social control is described in detail at the end of the book It is intended as a book for undergraduate and postgraduate students of sociology and a reference tool to the researchers and academic professionals this comprehensive and well structured book presents in a systematic way the Social Control and Social Change The book is undoubtedly a valuable asset for the students researchers as well as teachers of sociology In addition general readers concerned with social aspects and social progress will find it extremely informative *Global History with Chinese Characteristics* Manuel Perez-Garcia,2020-11-02 This open access book considers a pivotal era in Chinese history from a global perspective This book s insight into Chinese and international history offers timely and challenging perspectives on initiatives like Chinese characteristics The New Silk Road and One Belt One Road in broad historical context Global History with Chinese Characteristics analyses the feeble state capacity of Qing China questioning the so called High Qing sh ng q ng

era's economic prosperity as the political system was set into a power paradox or supremacy dilemma This is a new thesis introduced by the author demonstrating that interventionist states entail weak governance Macao and Marseille as a new case study aims to compare Mediterranean and South China markets to provide new insights into both modern eras rising trade networks non official institutions and interventionist impulses of autocratic states such as China's Qing and Spain's Bourbon empires *How Change Happens* Roman Krznaric, 2007 The author argues that current development thinking uses only a narrow range of approaches to change and the result is that most development strategies are limited excessively reformist and insensitive to underlying power and inequality and largely ignore environmental issues that confront our societies and planet *The Illusions of Progress* Georges Sorel, 2023-11-15 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1969 *History and Social Theory* Peter Burke, 2005 What is the use of social theory to historians and of history to social theorists In clear and energetic prose a pre eminent cultural historian here offers a far reaching response to these deceptively simple questions In this classic text now revised and updated in its second edition Peter Burke reviews afresh the relationship between the fields of history and the social sciences and their tentative convergence in recent decades Burke first examines what uses historians have made or might make of the models methods and concepts of the social sciences and then analyzes some of the intellectual conflicts such as the opposition between structure and human agency which are at the heart of the tension between history and social theory Throughout he draws from a broad range of cultures and periods to illustrate how history in turn has been used to create and validate social theories This new edition brings the book up to date with the addition of examples and discussions of new topics such as social capital globalization and post colonialism The second edition of *History and Social Theory* will continue to stimulate both students and scholars across a range of disciplines with its challenging assessment of the roles of history and social science today *Event History Analysis With Stata* Hans-Peter Blossfeld, Katrin Golsch, Gotz Rohwer, 2007-02-02 *Event History Analysis With Stata* provides an introduction to event history modeling techniques using Stata version 9 a widely used statistical program that provides tools for data analysis The book emphasizes the usefulness of event history models for causal analysis in the social sciences and the application of continuous time models T **Technen: Elements of Recent History of Information Technologies with Epistemological Conclusions** Andrzej Piotr Wierzbicki, 2014-07-25 The book expresses the conviction that the art of creating tools Greek techne changes its character together with the change of civilization epochs and co determines such changes This does not mean that tools typical for a civilization epoch determine it completely but they change our way of perceiving and interpreting the world There might have been many such epochs in the history of human civilization much more than the

three waves of agricultural industrial and information civilization This is expressed by the title *Technen* of the book where *n* denotes a subsequent civilization epoch During last fifty years we observed a decomposition of the old episteme understood as a way of creating and interpreting knowledge characteristic for a given civilization epoch of modernism which was an episteme typical for industrial civilization Today the world is differently understood by the representatives of three different cultural spheres of strict and natural sciences of human and social sciences especially by their part inclined towards postmodernism and technical sciences that have a different episteme than even that of strict and natural sciences Thus we observe today not two cultures but three different episteme The book consists of four parts First contains basic epistemological observations second is devoted to selected elements of recent history of information technologies third contains more detailed epistemological and general discussions fourth specifies conclusions The book is written from the cognitive perspective of technical sciences with a full awareness and discussion of its differences from the cognitive perspective of strict sciences or human and social sciences The main thesis of the book is that informational revolution will probably lead to a formation of a new episteme The book includes discussions of many issues related to such general perspective such as what is technology proper what is intuition from a perspective of technology and of evolutionary naturalism what are the reasons for and how large are the delays between a fundamental invention and its broad social utilization what is the fundamental logical error using paradoxes that are not real only apparent of the tradition of sceptical philosophy what are rational foundations and examples of emergence of order out of chaos whether civilization development based on two positive feedbacks between science technology and the market might lead inevitably to a self destruction of human civilization etc

**Organisation Institutionnelle de la Gestion de L'eau Aux XIXe Et XXe Siecles** J. C. N. Raadschelders, 2005 Water management has become a major issue for public policies at any latitude How and why this happened could not be assessed efficiently without developing a longitudinal and comparative analysis such as the one in this book Institutional arrangements for the provision and the use of water are peculiarly persistent as well as remarkably resilient This makes them an ideal subject of an historical account Not that history is worth writing about only when it treats immutable phenomena On the contrary its main purpose is to record changes and possibly explain them But long lasting continuity urges the scholar to venture into the remote past since only there are to be discovered the initial causes and the deeper meanings of the institutions under scrutiny Also continuity makes the strength of path dependency all the more evident and consequently underlines the weight of history
