Correspondence of John Wallis (1616-1703) Philip Beeley,Christoph J. Scriba,2014-07-31 The Correspondence of John Wallis 1616 1703 is a critically acclaimed resource in the history of early modern science Volume IV covers the period from 1672 to April 1675 and

contains over eighty previously unpublished letters It documents Wallis's role in the crucial debate over the method of tangents involving figures such as Sluse James Gregory Hudde Barrow Newton and Christiaan Huygens In this way it illuminates further an important part of the history of the calculus Wallis's letters also provide valuable new insights into mathematical book production and the importance of the international exchange of books in the growth and dissemination of mathematical knowledge We learn more about the part played by the intelligencer John Collins and the astronomer royal John Flamsteed in the edition of Jeremiah Horrocks's Opera posthuma published by Wallis in 1673 There are also new insights on the background to Wallis's early work on equations and the reasons why he criticized Gaston Pardies's proposed tract on motion The causes of the breakdown in Wallis's epistolary relation to Christiaan Huygens following the publication of the Horologium oscillatorium in 1673 are also revealed Many letters reflect Wallis's active involvement in the Royal Society Through the medium of correspondence the Savilian professor participated in numerous debates such as those over the anomalous suspension of mercury in the Torricellian tube or Hevelius's use of plain sights in positional astronomy The volume allows us to gain a deeper understanding of the background to these debates Furthermore the volume throws important new light on the history of the University of Oxford and of the University Press in the early modern period As keeper of the University Archives Wallis was one of the institution's highest officers Scarcely any event of note concerning the University did not require his involvement in some way and this is reflected in numerous letters and documents which the volume publishes for the first time
