**Formes**, 1929      **Pikillacta** Gordon F. McEwan, 2009-05 The origin of the first Andean imperial state has been the subject of lively debate for decades Archaeological sites dating to the Peruvian Middle Horizon time period A D 540 to 900 appear to give evidence for the emergence of an expansive empire that set the stage for the development of the later Inca state This archaeological investigation of Pikillacta the largest provincial site of Peru s pre Inca Wari empire provides essential background for interpreting the empire s political and cultural organization With engineering skills rivaling those of the builders of Cuzco itself the Wari at Pikillacta erected more than seven hundred buildings covering nearly two square kilometers with a fresh water supply and an elaborate underground sewage system but enigmatically only seven short streets and a near total lack of windows In this long awaited volume Gordon McEwan and his colleagues report on the labor costs of construction nearly 6 million man days the typology of Pikillacta s enigmatic architecture and the site s spectacular hydraulic system as well as its ceramics and chronology human remains and metal artifacts In the final section building on his years of

research and excavation McEwan develops a hypothetical model of Wari provincial administration in the Cuzco region arguing that the Wari were innovators of techniques of statecraft that explain the function of and the labor investment in the Pikillacta complex His book not only substantively contributes to our understanding of when and exactly how and why Pikillacta was built and what it was used for it also illuminates the political and cultural antecedents of the Inca state

Killebrew, 2012-09-01 Ancient Israel did not emerge within a vacuum but rather came to exist alongside various peoples including Canaanites Egyptians and Philistines Indeed Israel's very proximity to these groups has made it difficult until now to distinguish the archaeological traces of early Israel and other contemporary groups Through an analysis of the results from recent excavations in light of relevant historical and later biblical texts this book proposes that it is possible to identify these peoples and trace culturally or ethnically defined boundaries in the archaeological record Features of late second millennium B C E culture are critically examined in their historical and biblical contexts in order to define the complex social boundaries of the early Iron Age and reconstruct the diverse material world of these four peoples Of particular value to

scholars archaeologists and historians this volume will also be a standard reference and resource for students and other readers interested in the emergence of early Israel

**Regional Archaeology in the Inca Heartland** R. Alan Covey, 2014-01-01 The Cuzco region of highland Peru was the heartland of the Inca empire the largest native state to develop in the Americas Archaeologists have studied Inca monumental architecture for more than a century but it is only in recent decades that regional survey work has systematically sought to reconstruct patterns of settlement subsistence and social organization in the region This monograph presents the results of regional surveys conducted from 2000 to 2008 to the north and west of the city of Cuzco a region of approximately 1200 square kilometers that was investigated using the same field methodology as other systematic surveys in the Cuzco region The study region referred to as Hanan Cuzco in this volume encompasses considerable environmental variations ranging from warm valley bottom lands to snow capped mountains The chapters in this volume present settlement pattern data from all periods of pre Columbian occupation from the arrival of the first hunter gatherers to the transformation of valley bottom fields by the last Inca emperors A chapter on the colonial period discusses how Spanish colonial practices transformed an imperial landscape into a peripheral one Together the chapters in this volume contribute to the archaeological understanding of several central issues in Andean prehistory

Continuity and Change in the Native American Village Robert A. Cook, 2017-11-02 Two common questions asked in archaeological investigations are where did a particular culture come from and which living cultures is it related to In this book Robert A Cook brings a theoretically and methodologically holistic perspective to his study on the origins and continuity of Native American villages in the North American Midcontinent He shows that to affiliate archaeological remains with descendant communities fully we need to unaffiliate some of our well established archaeological constructs Cook demonstrates how and why Native American villages formed and responded to events such as migration environment and agricultural developments He focuses on the big picture of cultural relatedness over broad regions and the amount of social detail that can be gleaned from archaeological and biological data as well as oral histories
