Behavioral Strategy T. K. Das, 2014-06-01 Behavioral strategy continues to attract increasing research interest within the broader field of strategic management. Research in behavioral strategy has clear scope for development in tandem with such traditional streams of strategy research that involve economics, markets, resources and technology. The key roles of psychology, organizational behavior and behavioral decision making in the theory and practice of strategy have yet to be comprehensively grasped. Given that strategic thinking and strategic decision making are importantly concerned with human cognition, human decisions and human behavior, it makes eminent sense to bring some balance in the strategy field by complementing the extant emphasis on the objective, economics based view with substantive attention to the subjective, individual oriented perspective. This calls for more focused inquiries into the role and nature of the individual strategy actors and their cognitions and behaviors in the strategy research enterprise. For the purposes of this book series, behavioral strategy would be broadly construed as covering all aspects of the role of the strategy maker in the entire strategy field. The scholarship relating to behavioral strategy is widely believed to be dispersed in diverse literatures. Cultural Values in Strategy and Organization T. K. Das, 2021-06-01 The field of strategy science has grown in both the diversity of issues it addresses and the increasingly interdisciplinary approaches it adopts in understanding the nature and significance of problems that are continuously emerging in the world of human endeavor These

newer kinds of challenges and opportunities arise in all forms of organizations encompassing private and public enterprises and with strategies that experiment with breaking the traditional molds and contours. The field of strategy science is also perhaps inevitably being impacted by the proliferation of hybrid organizations such as strategic alliances, the upsurge of approaches that go beyond the customary emphasis on competitiveness and profit making, and the intermixing of time honored categories of activities such as business, industry, commerce, trade, government, the professions, and so on. The blurring of the boundaries between various areas and types of human activities points to a need for academic research to address the consequential developments in strategic issues. Hence, research and thinking about the nature of issues to be tackled by strategy science should also cultivate requisite variety in issues recognized for research inquiry, including the conceptual foundations of strategy and strategy making, and the examination of the critical roles of strategy makers, strategic thinking, time and temporalities, business and other goal choices, diversity in organizing modes for strategy implementation, and the complexities of managing strategy, to name a few. This book series on Research in Strategy Science aims to provide an outlet for ideas and issues that publications in the field do not provide either expressly or adequately, especially as regards the comprehensive coverage deserved by certain emerging areas of interest. Challenges and Opportunities Howard F. Didsbury, Jr., 1986-09-17. Challenges and Opportunities. Technology and Strategy Richard Arthur Goodman, Michael W. Lawless, 1994. Technology and Strategy is a comprehensive guide to creating a strategic plan that incorporates technological growth. Using real life examples from industries from electronics to bio technology, the authors present the tools planners need to integrate a firm's technological capabilities with its strategic plan. Importantly, the book also addresses broader questions about the role of technology, clarifying when it aids innovation, when it is evolutionary, and when it is revolutionary. These questions are tested against trends such as Total Quality Management, the resource based view of strategy, and the increase in external acquisition of technology. Offering clear guidance through an increasingly complex area, Technology and Strategy will be a valuable reference for practising executives, general managers, strategic planners, R D executives, and manufacturers.
