Sublime Is Now:

The Sublime is Now Jeremy Strick, Barnett Newman, 1994 *~THEæ SUBLIME IS NOW: THE EARLY WORK OF BARNETT NEWMAN.* , 1994 **Multicultural Dialogue** Randi Gressgård, 2010 As cross cultural migration increases democratic states face a particular challenge how to grant equal rights and dignity to individuals while recognizing cultural distinctiveness In response to the greater number of ethnic and religious minority groups state policies seem to focus on managing cultural differences through planned pluralism This book explores the dilemmas paradoxes and conflicts that emerge when differences are managed within this conceptual framework After a critical investigation of the perceived logic of identity indicative of Western nation states and at the root of their pluralistic intentions the author takes issue with both universalist notions of equality and cultural relativist notions of distinctiveness However without identity is it possible to participate in dialogue and form communities Is there a way out of this impasse The book argues in favor of communities based on nonidentitarian difference developed and maintained through open and critical dialogue What Is the Present? Michael North, 2025-06-17 A provocative new look at concepts of the present their connection to ideas about time and their effect on literature art and culture The problem of the present what it is and what it means is one that has vexed generations of thinkers and artists Because modernity places so much value on the present many critics argue that people today spend far too much time in the here and now but how can we tell without first knowing what the here and now actually is What Is the Present takes a provocative new look at this moment in time that remains a mystery even though it is always with us Michael North tackles puzzles that have preoccupied philosophy neuroscience psychology history and aesthetic theory and examines the complex role of the present in painting fiction and film He engages with a range of thinkers from Aristotle and Augustine to William James and Henri Bergson He draws illuminating examples from artists such as Fra Angelico and Richard McGuire filmmakers like D W Griffith and Christopher Nolan and novelists such as Elizabeth Bowen and Willa Cather North offers a critical analysis of previous models of the present from the experiential present to the historical period we call the contemporary He argues that the present is not a cosmological or experiential fact but a metaphor a figurative relationship with the whole of time Presenting an entirely new conception of the temporal mystery Georg Lukács called the unexplained instant What Is the Present explores how the arts have traditionally represented the present and also how artists have offered radical alternatives to that tradition **The Myth of Abstraction** Andrea Meyertholen, 2021 An alternative genealogy of abstract art featuring the crucial role of 19th century German literature in shaping it aesthetically culturally and socially Once upon a time or more specifically in 1911 there was an artist named Wassily Kandinsky who created the world's first abstract artwork and forever altered the course of art history or so the traditional story goes A good story but not the full story The Myth of Abstraction reveals that abstract art was envisioned long before Kandinsky in the pages of nineteenth century German literature It originated from the written word described by German writers who portrayed in

language what did not yet exist as art Yet if writers were already writing about abstract art why were painters not painting it To solve the riddle this book features the work of three canonical nineteenth century authors Heinrich von Kleist Johann Wolfgang von Goethe and Gottfried Keller who imagine theorize and describe abstract art in their literary writing sometimes warning about the revolution it will cause not just in art but in all aspects of social life Through close readings of their textual images and visual analyses of actual paintings Andrea Meyertholen shows how these writers anticipated the twentieth century birth of abstract art by establishing the necessary conditions for its production reception and consumption The first study to bring these early descriptions of abstraction together and investigate their significance The Myth of Abstraction writes an alternative genealogy featuring the crucial role of literature in shaping abstract art in aesthetic cultural and social terms mes warning about the revolution it will cause not just in art but in all aspects of social life Through close readings of their textual images and visual analyses of actual paintings Andrea Meyertholen shows how these writers anticipated the twentieth century birth of abstract art by establishing the necessary conditions for its production reception and consumption The first study to bring these early descriptions of abstraction together and investigate their significance The Myth of Abstraction writes an alternative genealogy featuring the crucial role of literature in shaping abstract art in aesthetic cultural and social terms mes warning about the revolution it will cause not just in art but in all aspects of social life Through close readings of their textual images and visual analyses of actual paintings Andrea Meyertholen shows how these writers anticipated the twentieth century birth of abstract art by establishing the necessary conditions for its production reception and consumption The first study to bring these early descriptions of abstraction together and investigate their significance The Myth of Abstraction writes an alternative genealogy featuring the crucial role of literature in shaping abstract art in aesthetic cultural and social terms e first study to bring these early descriptions of abstraction together and investigate their significance The Myth of Abstraction writes an alternative genealogy featuring the crucial role of literature in shaping abstract art in aesthetic cultural and social terms

Animated Landscapes Chris Pallant, 2015-08-27 Winner of the 2017 McLaren Lambart Award for Best Book on the Subject of Animation Studying landscape in cinema isn t quite new it d be hard to imagine Woody Allen without New York or the French New Wave without Paris But the focus on live action cinema leaves a significant gap in studying animated films With the almost total pervasiveness of animation today this collection provides the reader with a greater sense of how the animated landscapes of the present relate to those of the past

Including essays from international perspectives *Animated Landscapes* introduces an idea that has seemed literally to be in the background of animation studies The collection provides a timely counterpoint to the dominance of character be that either animated characters such as Mickey Mouse or real world personalities such as Walt Disney that exists within animation scholarship and film studies more generally Chapters address a wide range of topics including history case studies in national contexts including Australia Japan China and Latvia the traversal of animated landscape the animation of fantastical landscapes and the animation of interactive landscapes *Animated Landscapes* promises to be an invaluable addition to the existing literature for the most overlooked aspect of animation

Social Theory: Volume II Roberta Garner, Black Hawk Hancock, 2014-05-29 The organization of this popular social theory reader which pairs classical articles with contemporary theoretical and empirical studies highlights the historical flow of social theory and demonstrates how disagreements and confrontations shape theory over time Written in clear down to earth language the introductions to each selection link theorists to one another illustrating how theoretical traditions are not rigidly separate but are always in conversation addressing and challenging each other Volume II From Modern To Contemporary Theory uses key transitional theorists to illustrate how contemporary theory emerged from the past New chapters on race on culture and on media as well as a significantly reworked gender chapter deepen coverage As well new contextual and biographical materials surround each reading and each chapter includes a study guide with key terms and innovative discussion questions and classroom exercises The result is a volume of readings that offers instructors flexibility in how they approach teaching and students an affordable and accessible introduction to the most important contemporary social theorists

The Sublime Now Luke White, Claire Pajaczkowska, 2009 The Sublime has been considered an archaic concept the relevance of which was limited to eighteenth century discourses on art literary criticism and aesthetics But it is becoming obvious that contemporary culture requires of us a response that is at once emotional critical powerful and meaningful and recently the issue of the sublime has found its way back onto the critical agenda This book asks a series of critical questions about this resurgence What is the legacy of the discourse of the sublime for us today In what ways has it acquired an added urgency in our new millennium To what extent is this concept a useful or dangerous tool for the understanding of contemporary culture and history How does the Sublime follow the Post Modern To what uses can and should it be put Why the Sublime now The editors have collected writings from many contemporary thinkers who bring the critical concept of the sublime into their discussions of contemporary cultures Spanning philosophy religion ecology politics literature avant garde art popular cinema comic books humour and digital cultures these essays consider the relevance of the sublime now The authors make provocative readings of the original writings on the sublime from Longinus Burke Kant and Nietzsche to Freud Lyotard Derrida Kristeva and others whilst bringing these writings to bear on today s cultural issues

(Old School),1847 Embodying Data Qi Li,2020-06-19 This book investigates a new interactive data visualisation concept that employs traditional Chinese aesthetics as a basis for exploring contemporary digital technological contexts It outlines the aesthetic approach which draws on non Western aesthetic concepts specifically the Yijing and Taoist cosmological principles and discusses the development of data based digital practices within a theoretical framework that combines traditional Taoist ideas with the digital humanities The book also offers a critique of the Western aesthetics underpinning data visualisation in particular the Kantian sublime which prioritises the experience of power over the natural world viewed at a distance Taoist philosophy in contrast highlights the integration of the surface of the body and the surface of nature as a Taoist body rather than promoting an opposition of mind and body The book then explores the transformational potential between the human body and technology particularly in creating an aesthetic approach spanning traditional Chinese aesthetics and gesture based technology Representing a valuable contribution to the digital humanities the book helps readers understand data based artistic practices while also bringing the ideas of traditional Chinese aesthetics to Western audiences In addition it will be of interest to practitioners in the fields of digital art and data visualisation seeking new models **Key Concepts** Trevor Pateman,2016-05-05 First published in 1991 The arts can only thrive in a culture where there is conversation about them This is particularly true of the arts in an education context Yet often the discussion is poor because we do not have the necessary concepts for the elaboration of our aesthetic responses or sufficient familiarity with the contending schools of interpretation The aim of Key Concepts is to engender a broad and informed conversation about the arts By means of over sixty alphabetically ordered essays the author offers a map of aesthetics critical theory and the arts in education The essays are both informative and argumentative with cross references a supporting bibliography and suggestions for further reading

Seven Essays on the Genealogy of Uncertainty Stephen Nash,Liza Rybak,2024-09-30 Uncertainty is critical to economic theory mainly because it either supports or undermines many significant debates within economic theory Despite the significance of uncertainty this book represents the first attempt to comprehensively trace the genealogy of uncertainty which is a procedure that Nietzsche used in relation to morality one of the subjects that become logically redundant in the absence of uncertainty On the one hand this logical redundancy is problematic when considered in isolation given the

practical importance of morality On the other hand this logical redundancy becomes even more problematic given that at one time uncertainty was widely accepted as an important part of the philosophical system Here uncertainty played a pivotal role in terms of explaining practical decision making Such an appreciation of uncertainty has recently been set aside by modern philosophy which argues quantities of human labour provide virtually all economic value Such an explanation of economic value excludes uncertainty the many qualitative contributions of nature and morality even when one acknowledged the contribution to the understanding of uncertainty as proposed by Frank Knight in 1921 However in contrast to Knight who looked toward recent philosophy so as to support the existence of uncertainty this genealogy looks to support the significance of uncertainty by understanding the philosophy that supported the idea of uncertainty for thousands of years before the philosophy of John Locke Specifically Locke excludes uncertainty from the analysis of practical decision making in general and from economic decision making in particular Accordingly it can be anticipated that the enclosed genealogy will assist economists to more adequately develop the idea of uncertainty within economic theory

Nuclear Fictions Michael Gardiner, 2024-11-30 In this book Michael Gardiner suggests that the conception of the war ending weapon was tied up with a longer commitment to unified space and singular progress The mission for total weapons can be seen rising with the highly technical defensive war of the later nineteenth century and passing through twentieth century atomic research then the targeting of the outsides of commercial empire and the post war consensus with deterrence as its foundation The end of the Cold War brought an opportunity to fully naturalise deterrence but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out If the world unifying role of deterrence has always been undermined by the rise of rival empires it has also been questioned by critical communities including the consensus sceptics of the 1950s 60s 1980s 90s Nuclear Criticism and readers of nuclear ism millennial campaigns for Scottish independence and twenty first century descriptions of nuclear colonialism Recently it has become more obvious that an Anglosphere concept of worldly deterrence was bound to a singular and ultimately nihilistic idea of progress bio Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick
