## **Subnational Democracy In The European Union:**

**Subnational Democracy in the European Union** John Loughlin, 2001-04-05 This book is the result of a research project carried out for the Committee of the Regions and analyses the state of play of democratic practice at the subnational level in all of the European Member states Its initial hypothesis was that liberal democracy is closely associated with the rise of the nation state in the 19th century The nation state however has been significantly changing under the impact of various forces including globalization and regionalization internal reforms of the public administration system such as privatization and deregulation and the emergence of regions and local authorities as actors in their own rights these changes pose challenges for the practice of democracy and in particular for its expression at the regional and local level The book deals with the theoretical implications of these changes in terms of the changing nature of the state and new regionalism However one of the key findings is that there is no one uniform meaning of democracy across member states and there are variations even within a single state depending on whether the national or subnational levels are considered Each country chapter gives the historical and philosophical background to the concept of democracy in each country There is also an exposition of the institutional expression of democracy at the different levels With regard to the practice of democracy at the subnational level the role of pressure groups and policy networks is examined as well as the role of political parties There is a survey of critiques of subnational democracy Finally there is a survey of innovative approaches to improving regional and local democracy through a variety of mechanisms and reforms as ways of responding to the challenge and opportunities facing it today

**Subnational Democracy in the European Union** John Loughlin, Eliseo Aja, 2023 The result of a research project carried out for the Committee of the Regions this work analyses democratic practice at the subnational level in all of the European member states

**Subnational Authorities and the European Union** Stephan Lutzenberger, 2022-02-21 The European Union as a regulatory polity based on integration through law arguably relies more on legal compliance with its policies than any other political system Proceeding from this point of departure this book puts the spotlight on the subnational tier and scrutinizes its role in ensuring compliance Drawing on a dataset of infringement proceedings against federal and regionalized member states the book shows that strong shared rule i.e. strong cooperation between national and subnational authorities can improve national compliance records In contrast policy sectors with strong redistributive consequences impair subnational authorities capacity to comply In short policy and politics matter more than polity

The Role of Regions and Sub-National Actors in Europe Stephen Weatherill, Ulf Bernitz, 2005-06-15 The essays gathered in this collection examine the involvement of self governing sub national and regional actors in the law and policy making of the European Union State power is today exercised in the context of the complex institutional environment of the EU But what of regions and sub national actors Are their interests adequately represented can they advance them or can they at least protect them from unwitting or calculated damage This book surveys the broad questions of law and political science and

investigates the contribution of the EU's Committee of the Regions and also bottom up initiatives launched by the regions themselves. Given that much regional autonomy has been hard won, one would suppose that the centralising influence flowing from the EU's intrusion into the domestic settlement would be treated with extreme caution by the regions. Moreover, among the Member States, there is great diversity in the patterns of political organisation adopted to cope with the tension between the centralisation of power and respect for local autonomy. Case studies including Spain, Germany and Finland reveal that there is no single consistent historical narrative. States change as the UK's recent experience illustrates. The book offers findings that are interesting at a general level in investigating patterns of multi-level governance but is also rich in case specific information.

**The Sub-national Dimension of the EU** Carlo Panara, 2015-03-02 This book is the first monograph form legal study on multilevel governance in the EU and represents a radical change in the approach to this topic. Particularly after the Treaty of Lisbon's entry into force, research on multilevel governance can no longer remain confined to the analysis of political dynamics or of soft law arrangements. Multilevel governance emerges as a constitutional principle in the European constitutional space envisaging a method of governance based on the strong involvement of sub-national authorities in the creation and implementation of EU law and policy. Its foundation is in the mosaic resulting from the constitutional systems of the Union and its Member States. Multilevel governance arrangements play a fundamental part in achieving key Treaty objectives such as subsidiarity, respect for the national identities of the Member States, including regional and local self-government, openness and closeness to the citizen. These arrangements lend legitimacy to EU decision making while also promoting constitutionalism and democracy in the EU.

**Regional and Local Democracy in the European Union** John Loughlin, Committee of the Regions, 1999

*Subnational Authorities in EU Law* Michèle Finck, 2017 This book explores the relationship between EU law and the member states' local and regional authorities. Through a survey of various areas of EU law, the book introduces two narratives of local and regional authorities in EU law. These narratives also point towards different conceptions of the European legal order itself.

EU Environmental Policies in Subnational Regions Antje C.K. Brown, 2017-10-05 This title was first published in 2001. Despite the fact that environmental directives are one of the strongest areas of policy decreed by the EU, it has a much poorer record when it comes to actual implementation of these policies. Instead of focusing on the traditional state-centrist accounts, this book compares two subnational regions within the EU: Scotland and Bavaria, and their role in the policy process. The author offers a multi-layered implementation map which highlights three main government layers involved in the filtering process and identifies various formal and informal determinants which shape EU environmental policies during the process. The book not only compares implementation performances between the two regions and their respective states but also compares the region's processes against the national processes, thereby exposing determinants that would otherwise remain undetected. In doing so, it confirms that subnational regions feature determinants which differ in many respects from national determinants and influence the

effectiveness of EU environmental policies The book contributes to a better understanding of the implementation deficit and presents a more refined picture of the EU environmental policy reality
