Substance abuse is one of society's most serious problems. Drugs seem to be readily available even in elementary schools which attests to the success of the drug purveyors and the failure of law enforcement officials, education administrators and parents. As an example in the U.S. in 2003 there were nearly 1.7 million admissions to publicly funded substance abuse treatment programs. Most admissions 23.2 percent were for alcohol treatment. Marijuana accounted for the largest percentage of illicit drug admissions 15.4 percent followed by heroin 14.4 percent. This book presents new and important research dealing with treatments and treatment programs aimed at alleviating the misery and losses to society of this vicious behavioural disorder.      *Study Guide to Substance Abuse Treatment* Robert E. Hales, James A. Bourgeois, M.D., Narriman C. Shahrokh, 2008. *Study Guide to Substance Abuse Treatment* is a question and answer companion that allows you to evaluate your mastery of the subject matter as you progress through *The American Psychiatric Publishing Textbook of Substance Abuse Treatment Fourth Edition*. The Study Guide is made up of 292 questions divided into 49 individual quizzes of 4-9 questions each that correspond to chapters in the Textbook. Questions are followed by an Answer Guide that references relevant text including the page number in the Textbook to allow quick access to needed information. Each answer is accompanied by a discussion that not only addresses the correct response but also explains why other responses are not correct. The Study Guide's companion, the fourth edition of *The American Psychiatric Publishing Textbook of Substance Abuse Treatment* has been fully updated to present the most current scientific and clinical information on a wide range of substance use disorders from tobacco and alcohol to methamphetamine and club drug abuse. The text offers a comprehensive view of the basic science and psychology underlying addiction as well as extensive coverage of all treatment approaches and specialty topics. Highlights of this new edition include chapters on the biology and clinical management for each of the drug categories, new material on the role of buprenorphine in treating opioid addiction, extensive coverage of cognitive behavioral therapy, motivational enhancement and contingency management, and new research on the role of 12-step programs in addiction treatment.      **Enhancing Motivation for Change in Substance Abuse Treatment** William R. Miller, 1999. This report is based on a rethinking of the concept of motivation which is redefined here as purposeful, intentional, positive, directed toward the person's best interests. This report shows how substance abuse treatment staff can influence change by developing a therapeutic relationship that respects, builds on the client's autonomy, makes the treatment clinician a partner in the change process. Describes motivational interventions that can be used at all stages of the change process from pre-contemplation, preparation to action, maintenance. Informs readers of the research results, tools, assessment instruments related to enhancing motivation.      **Encyclopedia of Substance Abuse Prevention, Treatment, and Recovery** Gary L. Parenting and Substance Abuse Nancy E. Suchman, Marjukka Pajulo, Linda C. Mayes, 2013-02-15 Historically there has been little integration of theoretical or applied research on addiction treatment and parenting intervention development. Rather the fields of addiction and developmental research have progressed on largely separate trajectories even though their focus powerfully and often tragically intersects each time a parent is diagnosed with a substance use disorder. Parenting and Substance Abuse is the first book to report on pioneering efforts to move the treatment of substance abusing parents forward by embracing their roles and experiences as mothers and fathers directly and continually across the course of treatment. The chapters in this volume represent important new strides among researchers and clinicians to address and close the increasingly recognizable gap between addiction and developmental science. Chapters focus on current state of the art treatment models for parents primarily pregnant and parenting women including descriptions of innovative treatments currently being developed and evaluated that focus on parental addiction and the parent child relationship within a developmental framework. Part I covers the theoretical understandings of how addiction impacts the developmental processes of parenting. Part II discusses risk assessment evaluation and a variety of interventions and therapies. This unique volume will be of importance to clinicians, researchers, students and trainees in the health professions who develop, implement and evaluate interventions for parental addiction including in well baby clinics, primary care settings, pediatric clinics and residential and outpatient drug treatment programs.      Women in Substance Abuse Treatment , 2005      Substance Abuse Comorbidity in Schizophrenia , 1990      *Encyclopedia of Substance Abuse Prevention, Treatment, and Recovery* Gary L.
