F. M. Dostoevsky and André Gide Tatiana Vacquier, 1927 The Atlantic Monthly, 1897 The Foul and the Fragrant Alain Corbin, 1986 In a book whose insight and originality have already had a dazzling impact in France Alain Corbin has put the sense of smell on the historical map He conjures up the dominion that the combined forces of smells from the seductress's civet to the ubiquitous excremental odors of city cesspools exercised over the lives and deaths of the French in the eighteenth and nineteenth centuries

Tone Psychology: Volume I Carl Stumpf, 2019-09-17 Carl Stumpf 1848-1936 was a German philosopher and psychologist and a visionary and important academic During his lifetime he ranked among the most prominent scientists of his time Stumpf's intention as evident in his book *Tone Psychology* was to investigate the phenomenon of tone sensation in order to understand the general psychic functions and processes underlying the perception of sound and music It could be argued that modern music psychology has lost or perhaps ignored the epistemological basis that Carl Stumpf developed in his *Tone Psychology* To gain a confident psychological basis the relevance of Stumpf's deliberations on music psychology cannot be overestimated Analyses of the essence of tones complex tones and sounds are fundamental topics for general psychology and epistemology By the end of this two volume work Stumpf had established an epistemology of hearing The subject of Volume I is the sensation of successive single tones Stumpf demonstrates that analysis leads to the realisation of a plurality is there only one tone or are there several tones which is then followed by a comparison an increase may be observed one tone is higher than the other or a similarity may be realised both tones have the same pitch or the same loudness With almost mathematical stringency Stumpf developed a topology of tones Volume II deals with the sensation of two simultaneous tones musical intervals The books are stimulating rewarding and provocative and will appeal to music psychologists music theorists general psychologists philosophers epistemologists and neuroscientists

Enjoyment Anna-Teresa Tymieniecka,2013-03-14 Philosophy art criticism and popular opinion all seem to treat the aesthetics of the comic as lightweight while the tragic seems to be regarded with greater seriousness Why this favouring of sadness over joy Can it be justified What are the criteria by which the significance of comedy can be estimated vis vis tragedy Questions such as these underlie the present selection of studies which casts new light on the comic the joyful and laughter itself This challenge to the popular attitude strikes into new territory relating such matters to the profundity with which we enjoy life and its role in the deployment of the Human Condition In her Introduction Tymieniecka points out that the tragic and the comic might be complementary in their respective sense bestowing modes as well as in their dynamic functions they might both share in the primogenital function of promoting the self individualising progress of human existence For the first time in philosophy laughter mirth joy and the like are revealed as the modalities of the essential enjoyment of life being brought to bear in an illumination of the human condition
