Subtle Destruction:

Subtle Suicide Michael A. Church, Charles I. Brooks, 2009-07-23 This volume offers a description and analysis of subtle suicide a psychological condition whose victims don't care if they live or die and thus act in self-defeating self-damaging ways. Over their extensive careers, psychotherapists Michael Church and Charles Brooks have developed the concept of subtle suicide a development of risky behavior where the subject does not care if he/she lives or dies. Now in this urgent and informative new work, Church and Brooks present their findings on a condition that is often misdiagnosed as a symptom of addictive or mood disorders when in fact subtle suicide is the real underlying problem. Based on thousands of hours of sessions with real clients and filled with dramatic case studies, *Subtle Suicide: Our Silent Epidemic of Ambivalence about Living* will help professionals, families, and friends to realize when someone may be suffering from subtle suicide. The authors also provide a number of strategies for helping those exhibiting subtle suicidal behavior, including how to react to specific types of comments and how to avoid being pulled into the sufferer's emotional whirlpool. **Meals That Heal Inflammation,**

Fantasies of the New Class Stephen Schryer, 2011-03-15 America's post World War II prosperity created a boom in higher education expanding the number of university educated readers and making a new literary politics possible. Writers began to direct their work toward the growing professional class and the American public in turn became more open to literary culture. This relationship imbued fiction with a new social and cultural import allowing authors to envision themselves as unique cultural educators. It also changed the nature of literary representation: writers came to depict social reality as a tissue of ideas produced by knowledge elites. Linking literary and historical trends, Stephen Schryer underscores the exalted fantasies that arose from postwar American writers' new sense of their cultural mission. Hoping to transform capitalism from within, writers and critics tried to cultivate aesthetically attuned professionals who could disrupt the narrow materialism of the bourgeoisie. Reading Don DeLillo, Marge Piercy, Mary McCarthy, Saul Bellow, Ursula K. Le Guin, Ralph Ellison, and Lionel Trilling among others, Schryer unravels the postwar idea of American literature as a vehicle for instruction while highlighting both the promise and flaws inherent in this vision.

The Physicist Mitchell Frogge, 2000-09 The world is shocked by the Nobel Prize Massacres. The lone survivor is rushed to surgery where time splits into two different dimensions: one where he lives and one where he dies. Brian's Dimension: Brian Field is rushed back to the United States under government protection. At Nellis AFB he is held practically as a prisoner while the military forces him to work on weapons technology. After two years he escapes with the help of the FBI and creates Field Corporation. Field Corp. used technology developed by Brian to fight terrorism and prepare to fight World War III, which is rapidly overtaking the entire planet. Sandy's Dimension: Sandy Williams inherits Brian's research and discovers a shocking truth: World War III was coming and no one left alive could stop it. The research also said that no one would survive unless Sandy followed Brian's instructions precisely. The plan leads Sandy to Yale, then to an isolated spot in northern Canada where she creates a colony designed to allow humanity to survive. But their survival was questionable even using Brian's greatest secret.

Individuation and Liberty in a Globalized World Stefano Carpani, 2022-06-07 What is the best way to understand the narratives of self-identity at the beginning of the 21st century? This interdisciplinary collection brings together perspectives from analytical psychology, sociology, psychiatry, psychosocial studies, and psychoanalysis to consider questions about individuation and freedom in our unhinged world. The contributors discuss the meaning of and need for individuation in individualized and liquid societies. The book begins with a comparison of three approaches: C. G. Jung's individuation, Ulrich Beck's individualization, and Zygmunt Bauman's liquidity. This sets the tone for further consideration of topics including guilt, social media, global nomads, and surveillance. Theoretical reflections are enhanced by clinical material, and the book emphasizes the connections between sociology and psychoanalysis, offering significant insights into the importance of psychosocial approaches. This timely work will be of great interest to academics and scholars of psychosocial studies, Jungian studies, sociology, and politics.
