Suburban Environment Sweden And The United States:

The suburban environment David Popenoe,1977 **Human Environment in Sweden** ,1977 Suburban Alchemy Nicholas Dagen Bloom,2001 In Suburban Alchemy 1960s New Towns and the Transformation of the American Dream Nicholas Dagen Bloom examines the new town movement of the 1960s which sought to transform the physical and social environments of American suburbs by showing that idealism could be profitable Bloom offers case studies of three of the movement s more famous examples Reston Virginia Columbia Maryland and Irvine California to flesh out his historical account In each case innovative planners mixed land uses and housing types refined architectural graphic and landscape design offered well defined village and town centers and pioneered institutional planning As Bloom demonstrates these efforts did not uniformly succeed and attempts to reshape community life through design notably faltered However despite frequent disappointments and compromises the residents have kept the new town ideals alive for over four decades and produced a vital form of suburban community that is far more complicated and interesting than the early vision promoted by the town planners Lively chapters illustrate efforts in local politics civic spirit social and racial integration feminist innovations and cultural sponsorship Suburban Alchemy should be of interest to scholars of U S urban history planning history and community development as well as the general reader interested in the development of alternative communities in the United States **Land and Housing Policies in Europe and the USA** Graham Hallett,2021-06-29 Originally published in 1988 this book concentrates on urban land policy and was particularly significant when it was originally published because the 1980s were an era when the rich were getting richer and the poor poorer and in which changes in the ownership of and access to real estate contributed to this polarisation The book focusses on some core topics namely The buying selling and holding of land by public agencies the land market including the impact of taxation and subsidisation the control of the land market through town planning controls There are chapters devoted to urban land policy in the former West Germany The Netherlands France the former Yugoslavia the UK and USA **Disturbing the Nest** David Popenoe,2020-10-14 Disturbing the Nest assesses the future of the family as an institution through an historical and comparative analysis of the nature causes and social implications of family change in advanced western societies such as the United States New Zealand and Switzerland by focusing on the one society in which family decline is found to be the greatest Sweden The founding of the modern Swedish welfare state was based in large part on the belief that it was necessary for the state to intervene in society in order to improve the situation of the family Of great concern was the low birthrate which was seen as a threat to the very survival of Swedes as a national population group The Social Democrats pioneered welfare measures that aimed to strengthen the family to alleviate its worst trials and tribulations and to make possible harmonious living With the Social Democrats remaining in power continuously until 1976 a period of almost forty five years Sweden went on to implement governmental family policies that are among the most comprehensive and expensive in the world In view of

this major policy goal of family improvement the actual situation of the Swedish family today presents a genuine irony some have claimed that Swedish welfare state policies have had consequences that are the opposite of those originally intended Comparing contemporary Swedish family patterns with those of other advanced nations one finds a very high family dissolution rate probably the highest in the Western world and a high percentage of single parent female headed families Even marriage seems to have fallen increasingly out of favor with Sweden having the lowest marriage rate and latest age of first marriage and the highest rate of children born out of wedlock The early pronatalist aspirations of the Swedish government have been spectacularly unsuccessful as Sweden continues to have one of the world's lowest birthrates and smallest average family sizes

Dreaming Suburbia Amy Maria Kenyon, 2004-09-17 A multifaceted cultural study of suburbanization in the United States and Detroit in particular during the postwar suburban boom Dreaming Suburbia is a cultural and historical interpretation of the political economy of postwar American suburbanization Questions of race class and gender are explored through novels film television and social criticism where suburbia features as a central theme Although suburbanization had important implications for cities and for the geopolitics of race critical considerations of race and urban culture often receive insufficient attention in cultural studies of suburbia This book puts these questions back in the frame by focusing on Detroit Dearborn and Ford history and the local suburbs of Inkster and Garden City Covering such topics as the political and cultural economy of suburban sprawl the interdependence of city and suburb and local acts of violence and crises during the 1967 riots the text examines the making of a physical place its cultural effects and social exclusions The perspectives of cultural history American studies social science and urban studies give Dreaming Suburbia an interdisciplinary appeal

Democracy in Suburbia J. Eric Oliver, 2021-01-12 Suburbanization is often blamed for a loss of civic engagement in contemporary America How justified is this claim Just what is a suburb How do social environments shape civic life Looking beyond popular stereotypes Democracy in Suburbia answers these questions by examining how suburbs influence citizen participation in community and public affairs Eric Oliver offers a rich engaging account of what suburbia means for American democracy and in doing so speaks to the heart of widespread debate on the health of our civil society Applying an innovative unusually rigorous mode of statistical analysis to a wealth of unique survey and census data Oliver argues that suburbs by institutionalizing class and racial differences with municipal boundaries transform social conflicts between citizens into ones between political institutions In reducing the incentives for individual political participation suburbanization has negated the benefits of small town government and deprived metropolitan areas of valuable civic capacity This ultimately increases prospects of serious social conflict Oliver concludes that we must reconfigure suburban governments to allow seemingly intractable issues of common metropolitan concern to surface in local politics rather than be ignored as cross jurisdictional And he believes this is possible without sacrifice of local government's advantages Scholars and students of political science sociology and urban affairs will prize this book for its striking findings

its revealing scrutiny of the commonplace and its insights into how the pursuit of the American dream may be imperiling American democracy **Toward a More Perfect Union** Ralph Wendell Conant, Daniel J. Myers, 2006 **Perfect Communities** Edward Berenson, 2025-04-22 The rise and fall of William J Levitt the man who made the suburban house a mass commodity Two material artifacts defined the middle class American lifestyle in the mid twentieth century the automobile which brought gas stations highways commercial strips and sprawl and the single family suburban home the repository of many families long term wealth While the man who did the most to make the automobile a mass commodity Henry Ford is well known few know the story of the man who did the same for the suburban house Edward Berenson describes the remarkable career of William Levitt who did more than anyone else to create the modern suburb In response to an unprecedented housing shortage as veterans returned home from World War II his Levittown developments provided inexpensive mass produced housing that was wildly popular prospective buyers would camp out in line for two days for the chance to put down a deposit on a Levitt house He was a celebrity a life changing hero to tens of thousands and the pitchman of a renewed American Dream But Levitt also shared Ford's dark side He refused to allow Black people to buy or rent in his developments and doggedly defended this practice against legal challenges Leading the way for other developers who emulated his actions he helped ensure that suburbs nationwide remained white enclaves These legacies are still with us Levitt made a major contribution to the stubborn wealth disparity between white families and Black families and his solution to the housing crisis of the 1940s the detached house and surrounding yard is a primary cause of the housing crisis today As a person Levitt was a strangely guileless and tragic figure He accumulated vast wealth but after losing control of his building company surrendered it all through foolish investments and a lavish lifestyle that included a Long Island mansion and a two hundred foot yacht Just weeks before his death as a charity patient in a hospital to which he had once given millions he was still imagining his great comeback *Catalog of Copyright Entries. Planning New Towns U.S./U.S.S.R. New Towns Working Group, United States. Department of Housing and Urban Development. Office of International Affairs, 1981 **Suburban Affiliations** Mary P. Corcoran, Jane Gray, Michel Peillon, 2010-05-27 Since the mid 1990s Ireland has experienced an extraordinary phase of economic and social development Housing estates have mushroomed around towns and cities most notably around the environs of Dublin Seeking to understand the impact of these recent developments Corcoran Gray and Peillon initiated the New Urban Living study a detailed research project focused on four suburbs of Dublin Suburban Affiliations represents the culmination of that research offering an invaluable contribution to the study of suburbanization and to our understanding of the process of social change that has come to Ireland **Swedish-American Borderlands** Dag Blanck, Adam Hjorthén, 2021-08-24 Reframing Swedish American relations by focusing on contacts crossings and convergences beyond migration Studies of Swedish American history and identity have largely been confined to separate disciplines such as history literature or politics In Swedish

American Borderlands this collection edited by Dag Blanck and Adam Hjorth n seeks to reconceptualize and redefine the field of Swedish American relations by reviewing more complex cultural social and economic exchanges and interactions that take a broader approach to the international relationship ultimately offering an alternative way of studying the history of transatlantic relations Swedish American Borderlands studies connections and contacts between Sweden and the United States from the seventeenth century to today exploring how movements of people have informed the circulation of knowledge and ideas between the two countries The volume brings together scholars from a wide range of disciplines within the humanities and social sciences to investigate multiple transcultural exchanges between Sweden and the United States Rather than concentrating on one way processes or specific national contexts Swedish American Borderlands adopts the concept of borderlands to examine contacts crossings and convergences between the nations featuring specific case studies of topics like jazz architecture design genealogy and more By placing interactions entanglements and cross border relations at the center of the analysis Swedish American Borderlands seeks to bridge disciplinary divides joining a diverse set of scholars and scholarship in writing an innovative history of Swedish American relations to produce new understandings of what we perceive as Swedish American and Swedish American Contributors Philip J Anderson North Park U Jennifer Eastman Attebery Idaho State U Marie Bennedahl Linnaeus U Ulf Jonas Bj rk Indiana U Indianapolis Thomas J Brown U of South Carolina Margaret E Farrar John Carroll U Charlotta Forss Stockholm U Gunl g Fur Linnaeus U Karen V Hansen Brandeis U Angela Hoffman Uppsala U Adam Kaul Augustana College Maaret Koskinen Stockholm U Merja Kyt Uppsala U Svea Larson U of Wisconsin Madison Franco Minganti U of Bologna Frida Rosenberg KTH Royal Institute of Technology Stockholm Magnus Ull n Stockholm U

Best Development Practices Reid Ewing, 2019-12-17 The author draws upon case examples of some of today s most acclaimed developments in this book and recommends best practice guidelines to help developers create vibrant livable communities and still make money For years Florida s planners and developers have had to deal with some of the most difficult growth management problems Now planners and developers across the nation can benefit from the valuable lessons Florida offers on combating urban sprawl Ewing first searched the state for the best contemporary developments then distilled their lessons into guidelines for directing new development and assessing the quality of existing development The 43 practices outlined in this exciting book cover four areas of development land use transportation the environment and housing They apply to a broad range of development projects including small planned communities residential subdivisions and commercial centers The book s recommendations are based upon the experiences of successful developers and supported by empirical research The proof lies in the compelling real world examples Ewing highlights throughout the text Illustrated with dozens of photographs and written in a lively style this book is must reading for all those seeking better ways to plan and design communities Developers will find proven feasible land development regulations and benchmarks against which to evaluate development proposals

The Public Realm Lyn H. Lofland, 2017-07-12 This book is

about the public realm defined as a particular kind of social territory that is found almost exclusively in large settlements. This particular form of social psychological space comes into being whenever a piece of actual physical space is dominated by relationships between and among persons who are strangers to one another as often occurs in urban bars, buses, plazas, parks, coffee houses, streets and so forth. More specifically, the book is about the social life that occurs in such social psychological spaces, the normative patterns and principles that shape it, the relationships that characterize it, the aesthetic and interactional pleasures that enliven it, and the forces—anti-urbanism, privatism, post-war planning and architecture—that threaten it. The data upon which the book's analysis is based are diverse: direct observation, interviews, contemporary photographs, historic etchings, prints, and photographs, and historical maps, histories of specific urban public spaces or spatial types, and the relevant scholarly literature from sociology, environmental psychology, geography, history, anthropology, and architecture and urban planning and design. Its central argument is that while the existing body of accomplished work in the social sciences can be reinterpreted to make it relevant to an understanding of the public realm, this quintessential feature of city life deserves much more than it deserves to be the object of direct scholarly interest in its own right. Choice noted that the author's writing style is unusually accessible and the often fascinating narrative is generously supported by well-chosen photos.

Policy and Politics in Sweden Hugh Heclø, Henrik Madsen, 1987 *Suburbia* Donald N. Rothblatt, Daniel J. Garr, 2021-06-29 Originally published in 1986 and drawing on material from the USA, The Netherlands, and Israel, this book addresses the question of whether suburban environments enhance the quality of life and which factors influence this quality. It examines whether suburbs really provide improved housing and community services compared to the central city and whether they foster rewarding social patterns and psychological well-being. It also analyses precisely what characteristics suburban areas offer and how congruent these characteristics are with the preferences of suburban residents.

Readings in Urban Analysis Robert W. Lake, 2017-07-05 This important work brings together a range of perspectives in contemporary urban analysis. The field of urban analysis is characterized by the multiplicity of approaches, philosophies, and methodologies employed in the examination of urban structure and urban problems. This fragmentation of perspectives is not simply a reflection of the multifaceted and complex nature of the city as subject matter. Nor is it a function of the variety of disciplines such as geography, planning, economics, history, and sociology. Cross-cutting all of these issues and allegiances has been the emergence in recent years of a debate on fundamental issues of philosophy, ideology, and basic assumptions underlying the analysis of urban form and structure. The notion of urban analysis, Robert W. Lake discusses, focuses on the spatial structure of the city, its causes, and its consequences. At issue is the city as a spatial fact, a built environment with explicit characteristics and spatial dimensions, a spatial distribution of population and land uses, a nexus of locational decisions, an interconnected system of locational advantages and disadvantages, amenities and disamenities. Beginning with landmark articles in neo-classical and ecological theory, the reader covers the latest departures and developments. Separate sections cover political

approaches to locational conflict institutional influences on urban form and recent Marxist approaches to urban analysis Among the topics included are community strategies in locational conflict the political economy of place the role of government and the courts institutional influences in the housing market and the relationship between urban form and capitalist development This is a valuable introductory text for courses in urban planning urban geography and urban sociology

New Towns for the Twenty-First Century Richard Peiser, Ann Forsyth, 2021-01-01 New towns large comprehensively planned developments on newly urbanized land boast a mix of spaces that in their ideal form provide opportunities for all of the activities of daily life From garden cities to science cities new capitals to large military facilities hundreds were built in the twentieth century and their approaches to planning and development were influential far beyond the new towns themselves Although new towns are notoriously difficult to execute and their popularity has waxed and waned major new town initiatives are increasing around the globe notably in East Asia South Asia and Africa *New Towns for the Twenty First Century* considers the ideals behind new town development the practice of building them and their outcomes A roster of international and interdisciplinary contributors examines their design planning finances management governance quality of life and sustainability Case studies provide histories of new towns in the United States Asia Africa and Europe and impart lessons learned from practitioners The volume identifies opportunities afforded by new towns for confronting future challenges related to climate change urban population growth affordable housing economic development and quality of life Featuring inventories of classic new towns twentieth century new towns with populations over 30 000 and twenty first century new towns the volume is a valuable resource for governments policy makers and real estate developers as well as planners designers and educators Contributors Sandy Apgar Sai Balakrishnan Jaap Jan Berg Paul Buckhurst Felipe Correa Carl Duke Reid Ewing Ann Forsyth Robert Freestone Shikyo Fu Pascaline Gaborit Elie Gamburg Alexander Garvin David R Godschalk Tony Green Cheng He Guan Rachel Keeton Steven Kellenberg Kyung Min Kim Gene Kohn Todd Mansfield Robert W Marans Robert Nelson Pike Oliver Richard Peiser Michelle Provoost Peter G Rowe Jongpil Ryu Andrew Stokols Adam Tanaka Jamie von Klemperer Fulong Wu Ying Xu Anthony Gar On Yeh Chaobin Zhou

Making Cities Work: The Dynamics Of Urban Innovation David Morley, 2019-03-13 This book is an outcome of the conference Urban Innovation Working Solutions to the Problems of Human Settlement held in 1977 It focuses on urban innovations as working alternatives that reflect an institutional capacity to adapt complex human systems in response to basic environmental change

Suburban Environment Sweden And The United States Book Review: Unveiling the Power of Words
