Canadian Suburban Cheryl Cowdy, 2022-04-15 Though a large proportion of Canadians live in suburban communities the Canadian cultural imaginary is filled with other landscapes The wilderness the prairie cityscapes and small towns are the settings by which we define our nation rather than the strip mall the single family home and the developing subdivision which for many are ubiquitous features of everyday life *Canadian Suburban* considers the cultures of suburbia as they are articulated in English Canadian fiction published from the 1960s to the present Cheryl Cowdy begins her excursion through novels set between 1945 and 1970 the heyday of modern suburban development with works by canonical authors such as Margaret Laurence Richard B Wright Margaret Atwood and Barbara Gowdy Her investigation then turns to the meaning of the suburbs within fiction set after the 1970s when a more corporate model of suburbanization prevailed and ends with an investigation of how writers from immigrant and racialized communities are radically transforming the suburban imaginary Cowdy argues there is no one authentic suburban imaginary but multiple at times contradictory representations that disrupt

prevalent assumptions about suburban homogeneity Canadian Suburban provides a foundation for understanding the literary history of suburbia and a refreshing reassessment of the role of space and place in Canadian culture and identity

I Would Do It Again - Perhaps Simon Glustrom, 2000-10-05 Before packing away his robes Simon Glustrom was a practicing rabbi for forty three years One of the compelling reasons for deciding to write a memoir was in response to the endless variety of questions about the interior life of a rabbi Who influenced him to enter the rabbinate Can a rabbi have religious doubts and still be true to his calling Would he repeat such a rigorous life if he knew from the beginning the demands that would be made upon him This book provides the reader with some uncommon answers The author does not hesitate to reveal some of his lingering doubts regrets and fears even as he refers with pride to his skills and strengths Rabbi Glustrom reaches back to his early youth in Atlanta He recalls some of the unheralded personalities who influenced him during his most impressionable years and impacted on his life in college in rabbinical school and in the broader community The author feels the need to sing on behalf of his unsung heroes Much of this memoir deals with the human and spiritual problems the author encountered in a new suburban congregation in Fair Lawn New Jersey where he served as the first rabbi Nostalgically he recalls those pioneering years in the Fifties and documents some of the monumental changes that took place over four decades including some of the unresolved crises such as the problem of egalitarianism in synagogue life Clergy and lay people will identify with much of the rich anecdotal material from the humorous to the pathetic that is so candidly expressed in this memoir

Stewardship Across Boundaries Richard L. Knight, Peter Landres, 2013-06-17 Every piece of land no matter how remote or untrammelled has a boundary While sometimes boundary lines follow topographic or biological features more often they follow the straight lines of political dictate and compromise Administrative boundaries nearly always fragment a landscape resulting in loss of species that must disperse or migrate across borders increased likelihood of threats such as alien species or pollutants and disruption of natural processes such as fire Despite the importance and ubiquity of boundary issues remarkably little has been written on the subject Stewardship Across Boundaries fills that gap in the literature addressing the complex biological and socioeconomic impacts of both public and private land boundaries in the United States With contributions from natural resource managers historians environmentalists political scientists and legal scholars the

book develops a framework for understanding administrative boundaries and their effects on the land and on human behavior examines issues related to different types of boundaries wilderness commodity recreation private public presents a series of case studies illustrating the efforts of those who have cooperated to promote stewardship across boundaries synthesizes the broad complexity of boundary related issues and offers an integrated strategy for achieving regional stewardship Stewardship Across Boundaries should spur open discussion among students scientists managers and activists on this important topic It demonstrates how legal social and ecological conditions interact in causing boundary impacts and why those factors must be integrated to improve land management It also discusses research needs and will help facilitate critical thinking within the scientific community that could result in new strategies for managing boundaries and their impacts **Trends**, 1992

The Nature Book, 1909 *The Nature of Being Human* Harold Fromm, 2009-05-04 Although the physical relationship between the natural world and individuals is quantifiable the psychosocial effect of the former on the latter is often less tangible What for instance is the connection between the environment in which we live and our creativity How is our consciousness bounded and delimited by our materiality And from whence does our idea of self and our belief in free will derive and when do our surroundings challenge these basic assumptions Ecocritic Harold Fromm s challenging exploration of these and related questions twines his own physical experiences and observations with insights gathered from both the humanities and the sciences Writing broadly and personally Fromm explores our views of nature and how we write about it He ties together ecology evolutionary psychology and consciousness studies to show that our perceived separation from our surroundings is an illusory construct He argues for a naturalistic vision of creativity free will and the literary arts unimpeded by common academic and professional restraints At each point of this intellectual journey Fromm is honest engaging and unsparing Philosophical critical often personal Fromm s sweeping interdisciplinary and sometimes combative essays will change the way you think about your place in the environment **Nature, Temporality and Environmental Management** Lesley Head, Katarina Saltzman, Gunhild Setten, Marie Stenseke, 2016-08-05 How are different concepts of

nature and time embedded into human practices of landscape and environmental management And how can temporalities that entwine past present and future help us deal with challenges on the ground In a time of uncertainty and climate change how much can we hold onto ideals of nature rooted in a pristine and stable past The Scandinavian and Australian perspectives in this book throw fresh light on these questions and explore new possibilities and challenges in uncertain and changing landscapes of the future This book presents examples from farmers gardens and Indigenous communities among others and shows that many people and communities are already actively engaging with environmental change and uncertainty The book is structured around four themes environmental futures mobile natures indigenous and colonial legacies heritage and management Part I includes important contributions towards contemporary environmental management debates yet the chapters in this section also show how the legacy of older landscapes forms part of the active production of future ones Part II examines the challenges of living with mobile natures as it is acknowledged that environments natures and people do not stand still An important dimension of the heritage and contemporary politics of Australia Sweden and Norway is the presence of indigenous peoples As is clear in part III the legacies of the colonial past both haunt and energise contemporary land management decisions Finally part IV demonstrates how the history and heritage of landscapes including human activities in those landscapes are entwined with contemporary environmental management The rich empirical content of the chapters exposes the diversity of meanings practices and ways of being in nature that can be derived from cultural environmental research in different disciplines The everyday engagements between people nature and temporalities provide important creative resources with which to meet future challenges
