Represented Brenna Wynn Greer, 2019-06-14 In 1948 Moss Kendrix a former New Deal public relations officer founded a highly successful Washington D C based public relations firm the flagship client of which was the Coca Cola Company As the first black pitchman for Coca Cola Kendrix found his way into the rarefied world of white corporate America His personal phone book also included the names of countless black celebrities such as bandleader Duke Ellington singer actress Pearl Bailey and boxer Joe Louis with whom he had built relationships in the course of developing marketing campaigns for his numerous federal and corporate clients Kendrix along with *Ebony* publisher John H. Johnson and *Life* photographer Gordon Parks recognized that in the image saturated world of postwar America media in all its forms held greater significance for defining American citizenship than ever before For these

imagemakers the visual representation of African Americans as good citizens was good business In Represented Brenna Wynn Greer explores how black entrepreneurs produced magazines photographs and advertising that forged a close association between blackness and Americanness In particular they popularized conceptions of African Americans as enthusiastic consumers a status essential to postwar citizenship claims But their media creations were complicated subject to marketplace dictates they often relied on gender class and family stereotypes Demand for such representations came not only from corporate and government clients to fuel mass consumerism and attract support for national efforts such as the fight against fascism but also from African Americans who sought depictions of blackness to counter racist ideas that undermined their rights and their national belonging as citizens The story of how black capitalists made the market work for racial progress on their way to making money reminds us that the path to civil rights involved commercial endeavors as well as social and political activism

The Rules of Success Karsten Drath,2018-08-13 This book is about the rules of long term professional success The international study on which this book is based suggests that success is above all one thing the quest for a combination of happiness and satisfaction coupled with economic independence However the data also suggest that the definition of success varies significantly from person to person And furthermore it seems like success is not an objective quality but at least partly it results from a process of comparison with a peer group which means in turn that the selection of your peer group is crucial for your perceived level of success in life The author argues that in fact certain success factors do exist and that they are fewer in number than one might think But above all if we look thoroughly at the lives of truly successful people it soon becomes apparent that success primarily has to do with overcoming setbacks failure and crisis This ability to effectively process adversity is also known as resilience Because of its criticality for success this concept is discussed in greater depth using the FiRE model Factors improving Resilience Effectiveness as a structure This concept has been developed by the author through many years of research It differs from existing models due to its holistic approach including analysing different disciplines of science such as biology medicine brain research epigenetics sociology psycho neuro immunology etc

Gill,Cathy J. Schlund-Vials,2016-05-23 Disability studies scholars and activists have long criticized and critiqued so termed charitable approaches to disability where the capitalization of individual disabled bodies to invoke pity are historically socially and politically circumscribed by paternalism Disabled individuals have long advocated for civil and human rights in various locations throughout the globe yet contemporary human rights discourses problematically co opt disabled bodies as evidence of harms done under capitalism war and other forms of conflict while humanitarian non governmental organizations often use disabled bodies to generate resources for their humanitarian projects It is the connection between civil rights and human rights and this concomitant relationship between national and global which foregrounds this groundbreaking book s contention that disability studies productively challenge such human rights paradigms which troublingly eschew disability rights in favor of exclusionary humanitarianism It relocates disability from the margins to the center of academic and activist debates over the vexed relationship between human rights and humanitarianism These considerations thus productively destabilize able bodied assumptions that undergird definitions of personhood in civil rights and human rights by highlighting intersections between disability race gender ethnicity and sexuality as a way to interrogate the possibilities and limitations of human rights as a politicized regime Contemporary Issues in Primary Education Mark Brundrett,Gary Beauchamp,Paul
