School-based Prevention Programs for Children and Adolescents Joseph A. Durlak, 1995 **Successful Prevention and Youth Development Programs** Laura

Ferrer-Wreder, Håkan Stattin, Carolyn Cass Lorente, Jonathan G. Tubman, Lena Adamson, 2012-02-02 From a European Perspective This book charts territory that is profoundly important and yet rarely fully understood The authors have attempted a task that has relevance to the widest possible range of professionals working with children and adolescents In describing and assessing the fields prevention and promotion they have performed an immense service to researchers in this field but also to practitioners across the spectrum from mental health nurses and doctors to teachers and psychologists from social work professionals to psychiatrists and youth counselors There are two other key elements that should be emphasized from the outset The first is that the approach in this book is truly multi disciplinary with the authors making a genuine attempt to draw upon knowledge and practice derived from all the relevant disciplines The second element which makes this book so important is that the authors have worked across countries to ensure that work in the field of intervention from both North America and from Europe should be included This is as welcome as it is refreshing There appear to be so many barriers to true collaboration between the two continents and so many examples of either North American to what is going on across the or European social scientists appearing blind border that the approach taken here should be wholeheartedly commended This book is essentially a review but a rather special review Abnormal Child and Adolescent Psychology

Linda Wilmschurst, 2017-03-03 Written from a developmental perspective *Abnormal Child and Adolescent Psychology* is organized around five prominent and recurring themes the course of normal development proceeds in an orderly and predictable direction maladaptive behaviors represent deviations from the normal path maladaptive behavior is represented by a continuum of severity symptoms syndromes disorders based on the degree to which behaviors deviate from the norm individual interpersonal contextual and cultural factors interact in a reciprocal way to influence normal development and abnormal deviations theoretical input from diverse perspectives can guide our understanding of underlying processes that precipitate and maintain behaviors and the different developmental pathways that might result The revision will be divided into 5 sections all integrating the DSM 5 and will include a new chapter on child maltreatment and self injurious behavior

Handbook of Community Psychology Julian Rappaport, Edward Seidman, 2012-12-06 As a field progresses people write

about their own work in journals chapters and books but periodically the work needs to be collected and organized It needs to be brought together in a format that can both introduce new members to the field and reacquaint continuing members with the work of their colleagues Such a collection also affords an opportunity for the growing number of people with particular expertise to provide a reference for others whose work is related but differs in focus This is the first Handbook of Community Psychology It contains contributions from 106 different authors in addition to our editorial introductions Its thirty eight chapters including two that are divided into multiple individually authored parts are concerned with conceptual frameworks empirically grounded constructs intervention strategies and tactics social systems design assessment and analysis cross cutting professional issues and contemporary intersections with community psychology Although interrelated each chapter stands on its own as a statement about a particular part of the field and the volume can serve as a reference for those who may want to explore an area about which they are not yet familiar To some extent community psychologists eschew the distinction between researcher and practitioner and regardless of one's primary work environment university small college practice setting government or grassroots organization there is something of interest for anyone who wants to explore the community psychology approach

Promoting Children's Health Thomas J. Power, 2003-03-21 This book presents a framework for systematically addressing the health needs of children by integrating health mental health and educational systems of care From leading scientist practitioners the volume is grounded in cutting edge research as well as public policy mandates on health promotion and prevention for at risk students Strategies are delineated for developing and evaluating evidence based programs targeting a variety of goals including successfully integrating children with health problems into school bolstering adherence to health interventions and planning and monitoring pharmacological interventions Multidisciplinary approaches to prevention are also discussed in detail The book's concluding section provides guidelines for preparing professionals for health related careers

Taking Stock of Programs to Develop Socioemotional Skills Maria Laura Sánchez Puerta, Alexandria Valerio, Marcela Gutiérrez Bernal, 2016-08-17 This book represents a systematic review of the documented impacts of programs aimed at fostering socio emotional skills in developed and developing countries It uses a life cycle approach to organize the findings from rigorous evaluations of more than 80 programs This includes programs for toddlers and young children before primary school programs for students enrolled in formal education and programs targeted at the out of school population The book develops a conceptual framework that helps to identify the program characteristics and participants profiles associated with a range of program outcomes These include health related behavioral academic or cognitive and economic related outcomes The review finds that few of the programs studied focus exclusively on the development of socio emotional skills In fact most efforts to

develop socio emotional skills are embedded within innovative education and training curricula as well as pedagogical and classroom practices Evidence shows that programs are particularly effective when targeted to highly vulnerable populations and in particular to young children Overall findings indicate that high quality programs for young children tend to foster cognitive abilities in the short run and to impact socio emotional skills over the long run Programs for students enrolled in formal education primary and secondary levels show positive and significant impacts on the outcomes reviewed The most successful of these programs are implemented school wide and follow the SAFE approach that is they are appropriately sequenced active focused and explicit Finally the review finds that programs for out of school children and youth are usually designed as a means of achieving immediate labor market outcomes e g job placement formal employment and higher wages While some of these programs show positive and statistically significant impacts on socio emotional skills the impacts tend to be small
