Knowledge to Support the Teaching of Reading Catherine Snow, Peg Griffin, M. Susan Burns, 2007-08-17 Basic reading proficiency is key to success in all content areas, but attending to students' literacy development remains a challenge for many teachers, especially after the primary grades. *Knowledge to Support the Teaching of Reading* presents recommendations for the essential knowledge about the development, acquisition, and teaching of language and literacy skills that teachers need to master and use. Handbook of Reading Research, Volume IV Michael L. Kamil, P. David Pearson, Elizabeth Birr Moje, Peter Afflerbach, 2011-03-17 The *Handbook of Reading Research* is the research Handbook for the field. Each volume has come to define the field for the period of time it covers. Volume IV follows in this tradition. The editors extensively reviewed the reading research literature since the publication of Volume III in 2000 as portrayed in a wide array of research and practitioner-based journals and books to identify the themes and topics covered. As in previous volumes, the focus is on reading research rather than a range of literate practices. When taken as a set, the four volumes provide a definitive history of reading research. Volume IV brings the field authoritatively and comprehensively up to date.

School Turnaround Policies and Practices in the US Joseph F. Murphy, Joshua F. Bleiberg, 2018-12-12 This volume provides an analysis of what we know about turning around failing schools in the United States. It starts with an in-depth examination of the barriers that hinder action on turnaround work. The book analyses the reasons why some schools that find themselves in serious academic trouble fail in their efforts to turn themselves around. Beginning with a discussion of what may best be described as lethal reasons or the most powerful explanation for failed reform initiatives, which include an absence of attention to student care and support, a near absence of attention to curriculum and instruction, the firing of the wrong people. Covered in this volume are critical explanations for failed turnaround efforts, such as failure to attend to issues of sustainability and significant explanations for failed turnaround efforts, such as the misuse of test data. The volume concludes by examining what can be done to overcome problems that cause failure for turnaround schools and reviewing ideas in the core technology of schooling: curriculum, instruction, and assessment. As well as exploring problems associated with the leadership and management of schools to see where improvement is possible and an analysis of opportunities found in relationships between schools and their external partners, such as parents and community members.
