Successful Strategies For Computer Assisted Report:

Successful Strategies for Computer-assisted Reporting Bruce Garrison, 2013-10-18 Computers have changed the landscape of both gathering and disseminating information throughout the world As journalists quickly move toward the 21st century and perhaps a new era of electronic journalism resources are needed to understand the newest and most successful computer based news reporting strategies Written to serve that purpose this book is designed to show both professional journalists and students which of the newest personal computing tools are being used by the nation s leading news organizations and top individual journalists It further describes how these resources are being used on a daily basis and for special projects In recent years computers have taken on new and dominating roles in the process of news analysis newsgathering and news processing Today s forward thinking journalists often seek guidance over what they can do to strengthen their ability to be society s information processors and managers This volume focuses upon how successful journalists are using computers through a major national computer assisted reporting CAR study of daily newspapers The study included two national surveys and a series of personal interviews with many of the nation s leading CAR specialists Several current examples of stories used for successful database and online oriented news assignments are provided as part of a series of case studies incorporated throughout the book The additional depth of description and the presentation of portions of stories themselves should help readers to understand the complete process involving CAR oriented journalism Substantial analytical detail is used to discuss the extent of computer use in newsrooms computer training CAR projects CAR in daily reporting hardware and software most commonly used levels and types of online services used in news research and portable hardware and software The book concludes with the author s assessment of the effects and impact of personal computing in the newsroom and the future of personal computer applications in newsgathering Explaining and defining advanced applications or terminology for readers the approach to the book assumes a minimal familiarity with computers but no advanced knowledge of computer operation

Computer-assisted Reporting Bruce Garrison, 2020-07-20 Reporters in the newsroom are becoming more involved in computer assisted reporting and online news research than ever before This edition introduces readers to computer assisted reporting and to describe how leading journalists are using personal computers for news gathering in modern print broadcast and online newsrooms It provides a thorough discussion of technology and its applications to news reporting Computer Assisted Reporting focuses on the computerization of newsgathering highlighting the fact that the computer assists journalists by making writing easier and also makes gathering and organizing information more efficient As it begins the book demonstrates methods for journalists to get more from their computers such as data retrieval data analysis information storage and dissemination of that information in both processed and unprocessed forms It concludes with a refined proposal originally proposed in the first edition for five stages for development of computer literacy in the newsroom

Journalism, Reporting, Writing and Editing Rowan Kidd, 2018-01-25

The present book has been brought into being in view of incessant demand pertaining to the subject Journalism inherently requires that stories be told in depth Many newspapers have cut out long articles even before the Internet They have followed the example set by television news They have been hit by the rising price of newsprint and the renewed emphasis on cost cutting They are convinced that readers are pressed for time impatient with detail and conditioned to ingest the news in pellet like form The bulk of broadcast news is reporting in the sense that is used is different rather than journalism It is epitomized by the two minute wire service radio bulletin on the hour already a fast disappearing format In this incisive and well presented work the book has synthesized the findings to lay down principles of sound journalism for both those in the industry and the citizens who rely on the free press as a fundamental element of democracy First and foremost among these principles is journalism s obligation to the truth It will immensely benefit students teachers mass communicators theoreticians and practitioners alike Something usable today a ready reckoner for years to come and a collector s item for all times A must read enduring and preservable

Introduction to Journalism and Mass Communication Finlay Webb, 2018-11-20 Mass communication is an interdisciplinary domain It can t be understood as a stand alone subject because it deals with society and culture at one hand and technology at the other Thus this book was needed that could give a comprehensive explanation of terms concepts theories and principles at one place In recent times mass media has grown as a widespread industry which is working all over the world Here in this book it is the sincere effort of the author to put the matter and facts myths and realities all in a lucid manner This book is designed keeping in view the average reader and beginners as well This book will quench the thirst of knowledge in this field and it is the sincere hope of the author If it proves to be of little value to the readers all efforts and hardships of the author will amply be rewarded This book is created for the needs of students relating to the area of journalism and mass communication As social contexts and milieus undergo changes and get increasingly complex journalism too undergoes transformations and gets ever more crucial to the running of a society In such a scenario it becomes imperative that one considers the import journalism carries and how the issues and problems in it are central to how we perceive the world

Democracy and New Media Henry Jenkins, David Thorburn, Brad Seawell, 2004 Essays on the promise and dangers of the Internet for democracy

News and the Net Barrie Gunter, 2015-07-16 Originally published in 2003 This book examines the growth of news provision on the internet and its implications for news presentation journalism practice news consumers and the business of running news organizations Much of the focus is placed on the migration of newspapers onto the internet but references are also made to the establishment of news websites by other organizations The book examines the growth of online technology as a source of information and entertainment and considers how this development can be framed within models of communication and comments on the apparent shortage of new models to explain the use role effectiveness and impact of online communications
