Asteroids, Comets, and Meteorites Jon

Erickson,2014-05-14 Looks at asteroids comets and meteorites including what they are how they are formed how they have affected the history of Earth and definitions of related terms *Lunar Meteoroid Impacts and How to Observe Them* Brian Cudnik,2010-03-10 The genesis of modern searches for observable meteoritic phenomena on the Moon is the paper by Lincoln La Paz in Popular Astronomy magazine in 1938 In it he argued that the absence of observed fashes of meteoritic impacts on the Moon might be interpreted to mean that these bodies are destroyed as luminous meteors in an extremely rarefed lunar atmosphere The paper suggested the possibility of systematic searches for such possible lunar meteors With these concepts in mind I was surprised to note a transient moving bright speck on the Moon on July 10 1941 It appeared to behave very much as a lunar meteor would except that the poorly estimated duration would lead to a strongly hyperbolic heliocentric velocity Thus the idea of systematic searches for both p sible lunar meteors and meteoritic impact fashes was born It was appreciated that much time might need to be expended to achieve any positive results Systematic searches were carried out by others and myself chiefly in the years 1945 1965 and became a regular program at the newly founded Association of Lunar and Planetary Observers or ALPO **It Happened in Alabama** Jackie Sheckler Finch,2011-05-03 This book offers an inside look at over 25 interesting and unusual episodes that shaped the history of the Cotton State **The Anker-Holth Ether Pressure and Atomic Volume Theories** S.
