Suffer the Little Children Tamara Starblanket, 2020-04-28 Originally approved as a master of laws thesis by a respected Canadian university this book tackles one of the most compelling issues of our time the crime of

genocide and whether in fact it can be said to have occurred in relation to the many Original Nations on Great Turtle Island now claimed by a state called Canada It has been hailed as groundbreaking by many Indigenous and other scholars engaged with this issue impacting not just Canada but states worldwide where entrapped Indigenous nations face absorption by a dominating colonial state Starblanket unpacks Canada's role in the removal of cultural genocide from the Genocide Convention though the disappearance of an Original Nation by forced assimilation was regarded by many states as equally genocidal as destruction by slaughter Did Canada seek to tailor the definition of genocide to escape its own crimes which were then even ongoing The crime of genocide to be held as such under current international law must address the complicated issue of mens rea not just the commission of a crime but the specific intent to do so This book permits readers to make a judgment on whether or not this was the case Starblanket examines how genocide was operationalized in Canada focused primarily on breaking the intergenerational transmission of culture from parents to children Seeking to absorb the new generations into a different cultural identity English speaking Christian Anglo Saxon termed Canadian Canada seized children from their parents and oversaw and enforced the stripping of their cultural beliefs languages and traditions replacing them by those still in process of being established by the emerging Canadian state **Still Not Equal M.** Christopher Brown, 2007 Still Not Equal Expanding Educational Opportunity in Society addresses the successes and failures of Brown v Board of Education and the Civil Rights Act of 1964 as well as the continuing challenge of expanding educational opportunity in the United States and across the Black diaspora The educational political and social influence resulting from Brown the Civil Rights Act and their progeny have shaped the dynamics of the collective educational and social experiences of people of color Notwithstanding the obstacles barriers and enablers of educational occupational and economic status outcomes impact the formation and interpretation of public policy specifically and public perception generally about racialized notions of schooling and learning The pursuit of educational access attendance and attainment is intertwined with the implications of academic research and public policy to improve local practices in school settings Inasmuch as a diverse research agenda priorities and activities become situated to critically address status and attainment outcomes in education from preschool through adulthood for African Americans in the United States and abroad the resulting complexities in education and other settings will continue to behave in ways that cross racial lines International Handbook of Urban Education William T. Pink, George W. Noblit, 2008-09-03 It is evident that urban education has become the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of

understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education. An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region. An important question to be answered for example is what it takes in terms of resources, political will and policy actions to improve urban education.

Suffer the Little Children Carol Camp Yeakey, Judith Brooks-Buck, Jeanita W. Richardson, 2004-12-01 Examines the burden of poverty that children and young adults disproportionately share throughout the world. This book contains contributions from international researchers that examine some of the issues that serve to inhibit the chances of children and young adults to education and social mobility in an international context.

Urban Ills Carol Camp Yeakey, Vetta L. Sanders Thompson, Anjanette Wells, 2013-11-05 *Urban Ills: Twenty First Century Complexities of Urban Living in Global Contexts* is a collection of original research focused on critical challenges and dilemmas to living in cities. Volume 1 examines both the economic impact of urban life and the social realities of urban living. The editors define the ecology of urban living as the relationship and adjustment of humans to a highly dense, diverse and complex environment. This approach examines the nexus between the distribution of human groups with reference to material resources and the consequential social, political, economic and cultural patterns which evolve as a result of the sufficiency or insufficiency of those material resources. They emphasize the most vulnerable populations suffering during and after the recession in the United States and around the world. The chapters seek to explore emerging issues and trends affecting the lives of the poor, minorities, immigrants, women and children.
