Techniques Of Event History Modeling New Approaches To Causal Analysis:

Techniques of Event History Modeling Hans-Peter Blossfeld, Götz Rohwer, 2002 Including new developments and publications which have appeared since the publication of the first edition in 1995 this second edition gives a comprehensive introductory account of event history modeling techniques and their use in applied research in economics and the social sciences demonstrates that event history modeling is a major step forward in causal analysis To do so the authors show that event history models employ the time path of changes in states and relate changes in causal variables in the past to changes in discrete outcomes in the future and introduces the reader to the computer program Transition Data Analysis TDA This software estimates the sort of models most frequently used with longitudinal data in particular discrete time and continuous time event history data Techniques of Event History Modeling can serve as a student textbook in the fields of statistics economics the social sciences psychology and the political sciences It can also be used as a reference for scientists in all fields of research

Causal Analysis with Event History Data Using Stata Hans-Peter Blossfeld, Götz

Rohwer, Gwendolin J. Blossfeld, 2025-07-28 This third edition of *Causal Analysis with Event History Data Using Stata* provides an updated introduction to event history modeling along with many instructive Stata examples Using the latest Stata software each of these practical examples develops a research question points to useful contextual background information gives a brief account of the underlying statistical concepts describes the organization of input data and the application of Stata statistical procedures and assists the reader in interpreting the content of the results obtained Emphasizing the strengths and limitations of continuous time event history analysis in different fields of social science applications this book demonstrates that event history models provide a useful approach to uncover causal relationships or to map a system of causal relationships In particular this book demonstrates how long term processes can be studied how different forms of duration dependencies can be estimated using nonparametric parametric and semiparametric models and how parallel and interdependent dynamic systems can be analyzed from a causal analytical point of view using the method of episode splitting The book also shows how changing contextual information at the micro meso and macro levels can be easily integrated into a dynamic analysis of longitudinal data Finally the book addresses the problem of unobserved heterogeneity of time constant and time dependent omitted variables and makes suggestions for dealing with these sometimes difficult methodological problems *Causal Analysis with Event History Data Using Stata* is an invaluable resource for both novice and experienced researchers from a variety of fields e g sociology economics political science education psychology demography epidemiology management research and organizational studies as well as medicine and clinical applications who need an introductory textbook on continuous time event history analysis and who are looking for a practical handbook for their longitudinal research

Rational Choice Theory And Large-Scale Data Analysis Hans-peter Blossfeld, Gerald Prein, 2019-09-16 The relationship between rational choice theory and large scale data analysis has become an important issue for sociologists Though rational choice theory is well established in both sociology and economics its influence on quantitative empirical sociology has been surprisingly limited This book examines why there is hardly a link between the two

Forecasting Mortality in Developed Countries E. Tabeau, Anneke van den Berg Jeths, Christopher Heathcote, 2006-04-11 Information on future mortality trends is essential for population forecasts public health policy actuarial studies and many other purposes Realising the importance of such needs this volume contains contributions to the theory and practice of forecasting mortality in the relatively favourable circumstances in developed countries of Western Europe In this context techniques from mathematical statistics and econometrics can provide useful descriptions of past mortality The naive forecast obtained by extrapolating a fitted model may give as good a forecast as any but forecasting by extrapolation requires careful justification since it assumes the prolongation of historical conditions On the other hand whilst it is generally accepted that scientific and other advances will continue to impact on mortality perhaps dramatically so it is impossible to quantify more than the outline of future consequences with a strong degree of confidence The decision to modify an extrapolation of a model fitted to

historical data or conversely choosing not to modify it in order to obtain a forecast is therefore strongly influenced by subjective and judgmental elements with the quality of the latter dependent on demographic epidemiological and indeed perhaps more general considerations The thread running through the book reflects therefore the necessity of integrating demographic epidemiological and statistical factors to obtain an improvement in the prediction of mortality *Cradle to Grave: Life-Course Change in Modern Sweden* Jan O. Jonsson, Colin Mills, 2021-04-14 The empirical study of individuals life course is one of the most promising areas of research within sociology today Increased availability of large scale longitudinal data and improved statistical methods have made it possible to address theoretically relevant questions about events such as entrance into the labour market job mobility divorce and death This book consists of studies capturing the life course from the cradle to the grave The research questions include long term consequences of childhood conditions family formation and school careers work and parental leave gender discrimination in job promotion divorce and occupational career persistence in poverty and the intriguing question of why the highly educated tend to survive everyone else The studies shed light on the relation between family and work on gender inequality social class differences welfare state redistribution and labour market processes They do this in a particular context namely Sweden in the post war period that is during the decades that formed one of the most advanced welfare states in modern history One chapter provides a descriptive account of institutional and life course change in Sweden during that period Most authors use the Swedish level of living surveys a unique data set providing ample opportunity to study social processes in a longitudinal perspective The book will therefore be of relevance to those with interests in the Swedish welfare state as well as those with theoretical and research interests in the reproduction of inequality *Modern Classification and Data Analysis* Krzysztof Jajuga, Grażyna Dehnel, Marek Walesiak, 2022-10-16 This volume presents a selection of peer reviewed papers that address the latest developments in the methodology and applications of data analysis and classification tools to micro and macroeconomic problems The contributions were originally presented at the 30th Conference of the Section on Classification and Data Analysis of the Polish Statistical Association SKAD 2021 held online in Pozna Poland September 8 10 2021 Providing a balance between methodological and empirical studies and covering a wide range of topics the book is divided into five parts focusing on methods and applications in finance economics social issues and to COVID 19 data The book is aimed at a wide audience including researchers at universities and research institutions PhD students as well as practitioners data scientists and employees in public statistical institutions

Who Marries Whom? Hans-Peter Blossfeld, A. Timm, 2012-12-06 Marriage and social inequality are closely interrelated Marriage is dependent on the structure of marriage markets and marriage patterns have consequences for social inequality This book demonstrates that in most modern societies the educational system has become an increasingly important marriage market particularly for those who are highly qualified Educational expansion in general and the rising educational participation of women in particular unintentionally have increased the rate of assortative meeting and assortative mating

across birth cohorts Rising educational homogamy means that social inequality is further enhanced through marriage because better and worse educated single men and women pool their economic and sociocultural advantages and disadvantages within couples In this book we study the changing role of the educational system as a marriage market in modern societies from a cross national comparative perspective Using life history data from a broad range of industrialized countries and longitudinal statistical models we analyze the process of spouse selection in the life courses of single men and women step by step The countries included in this book vary widely in important characteristics such as demographic behavior and institutional characteristics The life course approach explicitly recognizes the dynamic nature of partner decisions the importance of educational roles and institutional circumstances as young men and women move through their life paths and the cumulation of advantages and disadvantages experienced by individuals

Sequence Analysis Marcel Raab, Emanuela Struffolino, 2022-04-11 Sequence analysis SA was developed to study social processes that unfold over time as sequences of events It has gained increasing attention as the availability of longitudinal data made it possible to address sequence oriented questions This volume introduces the basics of SA to guide practitioners and support instructors through the basic workflow of sequence analysis In addition to the basics this book outlines recent advances and innovations in SA The presentation of statistical substantive and theoretical foundations is enriched by examples to help the reader understand the repercussions of specific analytical choices The extensive ancillary material supports self learning based on real world survey data and research questions from the field of life course research Data and code and a variety of additional resources to enrich the use of this book are available on an accompanying website

Events in Social Networks Christoph Stadtfeld, 2012 Interactions between people are ubiquitous When people make phone calls transfer money connect on social network sites or visit each other these actions can be collected as dyadic directed relational events Each of those events can be understood as driven by multiple individual decisions that at least partially involve rational considerations This book aims at developing models that allow to understand individual event decisions in the context of large social networks

Sex Offenders Arjan A. J. Blokland, Patrick Lussier, 2015-07-29 An authoritative and in depth treatment of the latest research into the criminal careers of sex offenders providing background and investigating the policies used to combat one of society's most intractable public issues Features chapters based on original research from the most prominent scholars in the field of sex offender and criminal career research Deals with the entire criminal careers of sex offenders from youth to adulthood Illustrates the significance of the criminal career approach for theory treatment research and policy regarding sex offenders Covers a wider breadth of topics than existing texts and uses data from various studies and countries including the U S Canada the U K and the Netherlands Features an introductory chapter charting the origins of the criminal career perspective as well as the history of sex offender research pinpointing the most important research questions and current debates in both fields

Mixed Methods in Comparative Politics D. Berg-Schlosser, 2012-09-26 This book approaches current

controversies concerning qualitative and quantitative procedures in the social sciences and incorporates new methods showing how they can supplement each other. It is based on a comprehensive international research project that readers can apply to their findings through the data set provided on the author's home page. The Transition to Motherhood in Japan Hideko Matsuo, 2003. This study is about the extent of and reasons for postponement of first birth in Japan. And in order to answer this research question, the nature of the Second Demographic Transition in Japan will be assessed. The first objective is to document the postponement of first birth in Japan and compare this with the Netherlands. The second objective is to explain the reasons for postponement of first birth taking an approach which is multi-level macro-micro perspective and process context and life courses approaches comparative comparing with the Netherlands and historical cohort and period and linking this with the study of the Second Demographic Transition. **Advising on research methods** Herman Ader, Gideon J. Mellenbergh, 2014-01-31. This reader contains a collection of articles based on presentations held at the KNAW Colloquium Advising on research methods held in March 2007 in Amsterdam. Contribution by Janice Derr, Hilde Tobi, Gerald van Belle, Victor van Daal, Robert Pool, Jules Ellis, Bo Lu, and Herman Ader on a variety of topics but all related to statistical advising. For a table of contents see <http://www.knaw.nl/colloquia/advising/index.cfm> proceedings. *Quantitative Narrative Analysis* Roberto Franzosi, 2010. Quantitative Narrative Analysis focuses on the following issues: 1. the fundamental features of narrative as a specific type of text genre with certain invariant linguistic properties; 2. how the invariant properties of narrative can be used to structure narrative information in ways that basic qualitative information can then be analyzed quantitatively; story grammars or Subject-Action-Object and respective modifiers such as Time and Space of Action; 3. reliability and how the computer and linguistic framework of the approach greatly increase data reliability; 4. data analysis. The book does not focus on general problems of data analysis; it will show how textual data can be analyzed with numbers.

Developmental Psychopathology, Theory and Method Dante Cicchetti, 2015-12-22. The seminal reference for the latest research in developmental psychopathology. Developmental Psychopathology is a four-volume compendium of the most complete and current research on every aspect of the field. Volume One: Theory and Method focuses on the theoretical and empirical work that has contributed to dramatic advancements in understanding of child and adult development, including findings in the areas of genetics and neurobiology as well as social and contextual factors. Now in its third edition, this comprehensive reference has been fully updated to reflect the current state of the field and its increasingly multilevel and interdisciplinary nature and the increasing importance of translational research. Contributions from expert researchers and clinicians provide insight into how multiple levels of analysis may influence individual differences, the continuity or discontinuity of patterns, and the pathways by which the same developmental outcomes may be achieved. Advances in developmental psychopathology have burgeoned since the 2006 publication of the second edition ten years ago, and keeping up on the latest findings in multiple avenues of investigation can be burdensome to the busy professional and researcher.

from psychology and related fields This reference solves the problem by collecting the best of the best as edited by Dante Cicchetti a recognized leader in the field into one place with a logical organization designed for easy reference Get up to date on the latest research from the field Explore new models emerging theory and innovative approaches Learn new technical analysis and research design methods Understand the impact of life stage on mental health The complexity of a field as diverse as developmental psychopathology deepens with each emerging theory and new area of study as made obvious by the exciting findings coming out of institutions and clinics around the world Developmental Psychopathology Volume One Theory and Method brings these findings together into a cohesive broad reaching reference
