Techniques for Effective Delegation Dionisio Melo, 2024-07-29 In the 16 hour Effective Leadership course I teach to many companies who want to develop leaders among their managers task delegation is a critical skill for managers at any level Delegating involves working with a collaborator to set goals giving them sufficient authority and responsibility to achieve those goals often by providing them with 1 substantial freedom in deciding how the goals will be achieved 2 resources to help them reach the goals 3 an assessment of the quality of their effort and goal achievement 4 addressing performance issues and or rewarding their performance Ultimately the manager is responsible for achieving the goals but chooses to achieve those goals by delegating the task to someone else Delegating is different from directing work When work is directed the manager is telling someone what to do and how to do it There is generally much less freedom in how the collaborator does the task and it is also often much less participation and learning on the part of the collaborators Delegating can sometimes be a big challenge for new managers they are worried about having to give up control or struggle to have confidence in the skills of others Managers who can delegate effectively can free up a lot of their own time help their direct reports cultivate experience in learning and can develop their own leadership skills skills that are fundamental to problem solving goal achievement and learning How can you delegate for the growth and performance of your collaborators I suggest

the following general steps for implementing delegation *Successful Delegation* Frank F. Effective Delegation Skills Gerard Assey, 2022-09-27 One of the most difficult areas of a supervisor s job especially for newly appointed supervisors is that of delegation and one of the fundamental problems that people have when taking the step up to management is their inability to delegate effectively New managers often struggle with this but even more seasoned leaders can default as one of the most difficult transitions for leaders to make is the shift from doing to leading Therefore one of the most important skills that a manager can master is learning how to delegate for the more one progresses up through the levels of management this skill becomes increasingly important enhancing ones productivity to great extents Contrary to popular belief among many being a leader does not mean you must do every task to ensure it is done properly Being a leader includes empowering others to improve the overall organization as well as providing the necessary tools to optimize the performance of the group Empowering typically comes through delegating responsibilities to others As more members get involved and take ownership of projects and assignments the more effective the organization will become Delegating has been shown to improve work efficiency and benefit the organization in ways that aren t obvious initially In the long term however delegating empowers the team builds trust motivates and allows for new and innovative ideas which in turn leads to the development of the team members creative and decision making skills Real and thoughtful delegation with support is a great way to actually stretch and develop people and this is often more powerful than through periodic professional development For leaders it helps you learn how to identify who is best suited to tackle tasks or projects for at its best delegation is empowering people to do the work they are best suited to It allows them to invest themselves more in the work and develop their own skills and abilities It also allows the manager to do other important work that might be more strategic or higher level A study by Harvard Business Review determined that delegating can actually increase organizations income and overall efficiency Not only does delegation empower others in the organization but it also helps optimize the performance of the group The better you are at delegation the more successful you and your team will be The difference between success and failure is often a matter of distancing yourself from a task and delegating Thus good delegation saves time develops people grooms a successor and motivates On the other hand poor delegation will cause you frustration demotivates and confuses the other person fails to achieve the task or purpose itself

and can even cripple organizations As can be seen effective delegation is therefore one of the most valuable yet difficult skills a manager can master as successful delegation certainly takes time and effort but the benefit it gives is enormous and invaluable The best part however is that this skill can be learnt and this is what this little book will help you do hopefully provide a practical guide to boosting your own and your team s productivity through the successful art of delegation The Book covers Preface Objectives of this Book Why People do not Delegate Barriers to Delegating by Manager Subordinate Organization Why Delegate Benefits of Delegation What to Delegate Who to Delegate to When to Delegate What should not be Delegated Support and Resources Achieving the Balance Under Over Delegation Understanding Levels of Control Key Principles of Delegation Practical Steps to Delegate Successfully Monitoring with Appropriate Feedback Tools to Monitor the Delegated Task Reviewing the Delegation Process with Illustrations Exercises **From Ambitious Seller to Successful**
