The Anaesthetics of Architecture Neil Leach, 1999 Leach examines the consequences of the growing preoccupation with images and image making in contemporary architectural culture arguing that focusing on images dulls the senses 30 illustrations

New Japan Architecture Geeta Mehta, Deanna MacDonald, 2012-07-09 Featuring dozens of high quality photographs schematic designs and insightful commentary this Japanese architecture book is a must have for architects or collectors The past five years are widely considered to have been the most innovative period in contemporary Japanese design history The projects featured in New Japan Architecture were completed during this extraordinarily fertile time Featuring breathtaking images of modern Japan this volume presents forty eight extraordinary projects by forty two of the world's leading architects including Hitoshi Abe Ward Kishi Tadao Ando Chiba Manabu Architects Toyo Ito Kengo Kuma Kazuyo Sejima This architecture book features a wide range of buildings some exhibiting the ultimate ideal of the white Zen cube while others exemplify the search for the new wow factor in iconic design In many cutting edge modernity is counterbalanced by a concern for sustainability an issue that has motivated many architects to rethink and reintroduce concepts drawn from traditional Japanese architecture Projects big and small private and public residential and commercial are included Insightful text by two leading experts in the field of Japanese architecture highlights the remarkable aspects of each building and places these developments within the wider context of world architecture Offering an essential overview of current trends New Japan Architecture points the way to modern architecture's future

Automatic Architecture Sean Keller, 2018-02-12 In the 1960s and 70s architects influenced by recent developments in computing and the rise of structuralist and poststructuralist thinking began to radically rethink how architecture could be created Though various new approaches gained favor they had one thing in common they advocated moving away from the traditional reliance on an individual architect's knowledge and instincts and toward the use of external tools and processes that were considered objective logical or natural Automatic architecture was born The quixotic attempts to formulate such design processes extended modernist principles and tried to draw architecture closer to mathematics and the sciences By focusing on design methods and by examining evidence at a range of scales from institutions to individual buildings Automatic Architecture offers an alternative to narratives of this period that have presented postmodernism as a question of style as the methods and techniques traced here have been more deeply consequential than the many stylistic shifts of the past half century Sean Keller closes the book with an analysis of the contemporary condition suggesting future paths for architectural practice that work through but also beyond the merely automatic

Virtual Aesthetics in Architecture Sara Eloy, Anette Kreutzberg, Ioanna Symeonidou, 2021-08-30 Virtual Aesthetics in Architecture Designing in Mixed Realities presents a curated selection of projects and texts contributed by leading international architects and designers who are using virtual reality technologies in their design process It triggers discussion and debate on exploring the aesthetic potential and establishing its language as an

expressive medium in architectural design Although virtual reality is not new and the technology has evolved rapidly the aesthetic potential of the medium is still emerging and there is a great deal more to explore The book provides a comprehensive overview of the current use of virtual reality technologies in the architectural design process Contributions are presented in six parts fully illustrated with over 150 images Recent projects presented are distributed in five themes introduction to mixed realities space and form context and ambiguity materiality and movement body and social Each theme includes richly illustrated essays by leading academics and practitioners including those from Zaha Hadid Architects and MVRDV detailing their design process using data driven methodologies Virtual Aesthetics in Architecture expands the use of technology per se and focuses on how architecture can benefit from its aesthetic potential during the design process A must read for practitioners academics and students interested in cutting edge digital design

Boredom, Architecture, and Spatial Experience Christian Parreno, 2021-02-11 Boredom is a ubiquitous feature of modern life Endured by everyone it is both cause and effect of modernity and of situations spaces and surroundings As such this book argues boredom shares an intimate relationship with architecture one that has been seldom explored in architectural history and theory Boredom Architecture and Spatial Experience investigates that relationship showing how an understanding of boredom affords us a new way of looking at and understanding the modern experience It reconstructs a series of episodes in architectural history from the 19th century to the present to survey how boredom became a normalized component of the everyday how it infiltrated into the production and reception of architecture and how it serves to diagnose moments of crisis in the continuous transformations of the built environment Erudite and innovative the work moves deftly from architectural theory and philosophy to literature and psychology to make its case Combining archival material scholarly sources and illuminating excerpts from conversations with practitioners and thinkers including Charles Jencks Rem Koolhaas Sylvia Lavin and Jorge Silvetti it reveals the complexity and importance of boredom in architecture

Homing the Machine in Architecture Galo Canizares, Zach Cohen, 2024-03-11 Homing the Machine in Architecture is a series of conversations on the ways designers practitioners historians and theorists orient themselves within the world of architectural digital fabrication To home a digital fabrication machine is to send it back to its origin point a point that can be specified by the fabricator in advance of the fabrication process or by the defaults that are pre programmed into the machine The homing process is necessary and productive since it determines the physical point at which the machine and the maker begin making every time that architectural designers begin to digitally fabricate something new they first need to home the machine This book gathers first and second hand accounts of the origins of individual digi fab practices from the emergence of advanced prototyping tools to the contemporary moment It features interviews essays and case studies organized around three questions What are the possible histories of digital fabrication in architecture How do designers orient themselves in this emergent discipline What conceptual original points do architectural designers return to when they home their machines The discourse that

emerges from this collection aims to reach practicing architects using digital fabrication as well as upper level students and academics of digital architecture architectural theory and architectural history
