User Behavior and Technology Development Peter-Paul Verbeek,Adriaan Slob,2006-10-11 Environmental policy has long been determined by a dichotomy between technology and behavior Some approaches stress the importance of technology and technological innovation while others focus on behavioral change Each approach has its limitations however since technology and behavior often appear so closely intertwined Human behavior results not only from intentions and deliberate decisions but also from its interaction with technological artifacts In the area of traffic safety for instance people s driving behavior is determined as much by curves speed bumps and the power of their motors as by considerations of safety and responsibility How can we best describe and understand these interactions between behavior and technology What conceptual frameworks and empirical studies are available and how can they be integrated And how can we bring these interactions to bear on product design and policy making The book User Behavior and Technology Development explores these relationships between technology and behavior from an interdisciplinary perspective This includes contributions from cognitive psychology industrial design public administration marketing sociology ergonomics science and technology studies and philosophy The book aims to create a conceptual basis for analyzing interactions between technology and behavior and to provide insights that are relevant to technology design and environmental policy Birth as an American Rite of Passage Robbie Davis-Floyd,2022-05-05 This classic book first published in 1992 and again in 2003 has inspired three generations of childbearing people birth activists and researchers and birth practitioners midwives doulas nurses and obstetricians to take a fresh look at the standard procedures that are routinely used to manage American childbirth It was the first book to identify these non evidence based obstetric interventions as rituals that enact and transmit the core values of the American technocracy thereby answering the pressing question of why these interventions continue to be performed despite all evidence to the contrary This third edition brings together Davis Floyd s insights into the intense ritualization of labor and birth and the technocratic humanistic and holistic models of birth with new data collected in recent years **Privacy, the Collection, Use, and Computerization of Personal Data** United States. Bulletin of the Atomic Scientists, 1986-01 *The Fate of Labour Socialism* James Naylor, 2016-05-12 Almost a century before the New Democratic Party rode the first orange wave their predecessors imagined a movement that could rally Canadians against economic insecurity win access to necessary services such as health care and confront the threat of war The party they built during the Great Depression the Co operative Commonwealth Federation CCF permanently transformed the country s politics Past histories have described the CCF as social democrats guided by middle class intellectuals a party which shied away from labour radicalism and communist agitation James Naylor s assiduous research tells a very different story a CCF created by working class activists steeped in Marxist ideology who sought to create a movement that would be both loyal to its socialist principles and appealing to the wider electorate *The Fate of Labour Socialism* is a fundamental reexamination of the CCF and Canadian working class politics in the 1930s one that will help historians better understand Canada s political intellectual and labour history *Intellectual and Manual Labour* Alfred Sohn-Rethel, 2020-11-23 Alfred Sohn Rethel s *Intellectual and Manual Labour* is one of the major texts of post war Marxist theory A tremendous influence on the major writers of the Frankfurt School with ongoing relevance to current debates about value abstraction and domination Sohn Rethel s ideas are here presented at their fullest scope and with their greatest theoretical clarity Out of print for many years this new Historical Materialism edition contains a new introduction by Chris O Kane an afterword by Chris Arthur and a compilation of the responses to *Intellectual and Manual Labour* published in the Italian journal *Lotta Continua* including a substantial article by Antonio Negri *Worldviews, Ethics and Organizational Life* Michel Dion, 2021-11-24 This book provides an innovative way to revisit the depth and scope of our moral post moral worldviews while undertaking an ontic reflection about organizational life The ontic dimension of life refers to existing entities lived experiences It has nothing to do with psychological and relational processes The ontic level of analysis mirrors a philosophical outlook on organizational life Unlike moral worldviews post moral worldviews oppose the existence of Truth itself Post moral worldviews rather imply that dialogical relationships allow people to express their own truth claims and welcome others truth claims The purpose of this book is to explain the philosophical implications of moral and post moral worldviews and the way to move from a moral to a post moral worldview Moreover this book explores the possibility to transcend the moral post moral dualism through moral deliberation processes and a reinterpretation of the Presence of the Infinite in all dimensions of human life This book could eventually help to better grasp the basic philosophical challenges behind ethical reflection about organizational issues

Expertise Mirko Farina,Andrea Lavazza,Duncan Pritchard,2024 This is a collective study of philosophical questions to do with experts and expertise such as What is an expert Who decides who the experts are Should we always defer to experts How should expertise inform public policy What happens when the experts disagree Must experts be unbiased Does it matter what the source of the expertise is *Little America* Erik Paul,2006-09-20 Australia is one of the US s most staunch supporters Australia has sent troops to Iraq and is an ally in the war on terror Australian domestic policy also follows the US economic model as state industries and services have been privatised Erik Paul dissects the relationship between Australia and the US He explores how Australia has become a key player in maintaining American dominance in South East Asia and looks critically at the contrast between the Australian wealth and the comparative poverty of surrounding nations Examining the influence of neoconservative imperialism on Australia s economic and military strategies he draws some startling conclusions about future Australian relationships in East Asia in particular its relationship with China **Agricultural Economics Literature** ,1937 *Agricultural Economics Literature* United States. Sage,2016-04-29 In this innovatory book Daniel Sage analyses how and why American space exploration reproduced and transformed American cultural and political imaginations by appealing to and to an extent organizing the transcendence of spatial and temporal frontiers In so doing he traces the development of a seductive and powerful yet complex and unstable American geographical imagination the transcendental state Historical and indeed contemporary space exploration is despite some recent notable exceptions worthy of more attention across the social sciences and humanities While largely engaging with the historical development of space exploration it shows how contemporary cultural and social and indeed geographical research themes including national identity critical geopolitics gender technocracy trauma and memory can be informed by the study of space exploration

Everyday Life in the Modern World Henri Lefebvre,2023-09-28 Philosopher sociologist and urban theorist Henri Lefebvre 1901 1991 was one of the great social theorists of the twentieth century and pioneered the theorization of everyday life and space In this fascinating book which became a manifesto for urban activism upon its first publication in the 1960s Lefebvre poses a major question what gives a society undergoing constant change the illusion of stability For Lefebvre the answer is that our everyday lives are the product of decisions from which we are alienated resulting in what he memorably describes as terror enforced passivity Modern capitalism produces and controls the space around us the buildings we work in the roads we drive on and even the parks surrounding us are artificial and controlled isolating the individual in a life of repetition Lefebvre rejects such a world of control and monotony urging instead a spontaneous utopian creativity in which human beings can engage in meaningful work and leisure Profound and prophetic for its insights into the impact of capitalism and urbanization *Everyday Life in the Modern World* remains a classic work by a towering thinker and essential reading today This Routledge Classics edition includes a new Foreword by Claire Revol and Rob Shields
