**Science, Agriculture and the Politics of Policy** Ian Scoones,2006 Science Agriculture and the Politics of Policy examines the intersections of globalisation technology and politics through a detailed empirically based examination of agricultural biotechnology in India The focus is on Bangalore and Karnataka a part of India which has seen a massive growth in biotech enterprises experimentation with GM cotton and a contested policy debate about the role biotechnology should play in economic development The book asks what does this new suite of technologies mean for society for politics and for the way agriculture food and rural livelihoods are thought about Can biotech deliver a second Green Revolution and so transform agriculture and rescue the countryside and its people from crisis and poverty Or is it more complex than this Through a detailed case study the aim of the book is to discuss question and refine these broader debates locating an understanding of biotechnology firmly within an understanding of society and politics *International Organization as Technocratic Utopia* Jens Steffek,2021 This volume examines the development of the idea of technocratic internationalism the promotion of the involvement of experts in the workings of international relations especially in international organizations such as the United Nations and European Union **Research Handbook on Political Representation**

Maurizio Cotta,Federico Russo,2020-12-25 At a time when political representation can be said to be facing its ultimate crisis this crucial work clarifies the terms of the debate providing an up to date analysis of the main conceptual and institutional controversies that have arisen surrounding this topic Written by leading scholars in the field contributions focus on how

representation is conceptualised and its relation to democracy      **Politics of Last Resort** Jonathan White,2020 The book examines how a certain way of governing invoking exceptional measures for exceptional times has become central to the workings of the European Union      The Power of Systems Eglė Rindzevičiūtė,2016-12-15 In The Power of Systems Eglė Rindzevičiūtė introduces readers to one of the best kept secrets of the Cold War the International Institute of Applied Systems Analysis IIASA an international think tank established by the US and USSR to advance scientific collaboration From 1972 until the late 1980s IIASA was one of the very few permanent platforms where policy scientists from both sides of the Cold War could work together to articulate and solve world problems A rare zone of freedom communication and negotiation East West scientists co produced computer simulations of the long term world future using global modeling to explore the possible effects of climate change and nuclear winter Their concern with global issues also became a vehicle for transformation inside the Soviet Union The Power of Systems explores how computer modeling cybernetics and the systems approach challenged Soviet governance by undermining the linear notions of control on which Soviet governance was based and creating new objects and techniques of government      **The Politics of Think Tanks in Europe** Jesper Dahl Kelstrup,2016-05-20 In the 21st century think tanks have become more than a buzzword in European public discourse They now play important roles in the policy making process by providing applied research building networks and advocating policies The book studies the development of think tanks and contemporary consequences in the United Kingdom Germany Denmark and at the EU level A Continental think tank tradition in which the state plays a pivotal role and an Anglo American tradition which facilitates interaction in public policy on market like terms have shaped the development of think tanks On the basis of a typology of think tanks quantitative data and interviews with think tank practitioners the interplay between state and market dynamics and the development of different types of think tanks is analysed Although think tanks develop along different institutional trajectories it is concluded that the Anglo American tradition has had a significant cross cutting impact in Europe in recent years The contention over the politics of think tanks runs deeper at the EU level than in the member states and reflects disagreement over how the EU should develop in the future This text will be of key interest to scholars students and practitioners of political communication public policy European politics and comparative politics      **Why International Organizations Hate Politics** Marieke Louis,Lucile Maertens,2021-04-05 Building on the concept of depoliticization this book provides a first systematic analysis of International Organizations IO apolitical claims It shows that depoliticization sustains IO everyday activities while allowing them to remain engaged in politics even when they pretend not to Delving into the inner dynamics of global governance this book develops an analytical framework on why IOs hate politics by bringing together practices and logics of depoliticization in a wide variety of historical geographic and organizational contexts With multiple case studies in the fields of labor rights and economic regulation environmental protection development and humanitarian aid peacekeeping among others this book shows that depoliticization is enacted in a series of overlapping

sometimes mundane practices resulting from the complex interaction between professional habits organizational cultures and individual tactics By approaching the consequences of these practices in terms of logics the book addresses the instrumental dimension of depoliticization without assuming that IO actors necessarily intend to depoliticize their action or global problems For IO scholars and students this book sheds new light on IO politics by clarifying one often taken for granted dimension of their everyday activities precisely that of depoliticization It will also be of interest to other researchers working in the fields of political science international relations international political sociology international political economy international public administration history law sociology anthropology and geography as well as IO practitioners
