Technological Innovation A Critical Review Of Current Knowledge:

Technological Innovation Patrick Kelly,1975 Technological Innovation: a Critical Review of Current Knowledge ,1975 Cross classified bibliography of literature relating to research and development Innovation and technological change processes Technological Innovation Patrick Kelly,1978 **NASA DoD aerospace knowledge diffusion research project. Report number 6, The relationship between the use of U.S. government technical reports by U.S. aerospace engineers and scientists and selected institutional and sociometric variables** ,1991 A study was undertaken that investigated the relationship between the use of U S government technical reports by U S aerospace engineers and scientists and selected institutional and sociometric variables Survey research is the methodology used for the study Data were collected by means of a self administered mail questionnaire The approximately 34 000 members of the American Institute of Aeronautics and Astronautics AIAA served as the study population The response rate for the survey was 70 percent A dependent relationship was found to exist between the use of U S government technical reports and three of the institutional variables academic preparation years of professional aerospace work experience and technical discipline The use of U S government technical reports was found to be independent of all of the sociometric variables The institutional variables best explain the use of U S government technical reports by U S aerospace engineers and scientists **NASA Technical Memorandum** ,1991 General Technical Report NC. ,1981 Scientific and Technical Aerospace Reports ,1977 **Thinking through Technology** Carl Mitcham,2024-05-31 What does it mean to think about technology philosophically Why try These are the issues that Carl Mitcham addresses in this work a comprehensive critical introduction to the philosophy of technology and a discussion of its sources and uses Tracing the changing meaning of technology from ancient times to our own Mitcham identifies the most important traditions of critical analysis of technology the engineering approach which assumes the centrality of technology in human life and the humanities approach which is concerned with its moral and cultural boundaries Mitcham bridges these two traditions through an analysis of discussions of engineering design of the distinction between tools and machines and of engineering science itself He looks at technology as it is experienced in everyday life as material objects from kitchenware to computers as knowledge including recipes rules theories and intuitive know how as activity design construction and use and as volition knowing how to use technology and understanding its consequences By elucidating these multiple aspects Mitcham establishes criteria for a more comprehensive analysis of ethical issues in applications of science and technology This book will guide anyone wanting to reflect on technology and its moral implications **Official Program Plan for Support of Extramural Research** National R & D Assessment Program (U.S.),1975 **Research Report** ,1980 *Army Training Technology Transfer* Jon S. Freda,1980 Economics of Relative Prices Bela Csikos-Nagy,2016-01-15 **The Long Wave in Economic Life** J.J. Van Duijn,2013-11-05 Of all fluctuations in economic activity the long wave or Kondratieff cycle is easily the most puzzling and least understood one Does it really exist

and if so is it only a cycle in prices or a cycle in economic activity at large What causes it and has it been confined to Europe or does it affect the world economy as a whole These questions which seemed of little relevance in the prosperous years of the postwar growth era have gained new importance since 1973 With the downturn of the long wave interest in it has enjoyed a revival as it did in the 1930s A great number of publications on the long wave have appeared since 1973 many of which have added to our insight of what causes the recurrent alternations of growth acceleration and retardation This book is the first in the English language in which all important long wave theories old as well as recent are brought together It focuses on the long wave as an international phenomenon affecting all industrialised countries It contains new theory as well as empirical evidence and in the final section suggests a number of policy recommendations to generate innovation This book offers an interpretation of long term economic development different from those commonly found in the literature It will be of interest to students and scholars of the economics of growth and change as well as to economic historians and policy makers This book was first published in 1983
