Technological Perspectives On Behavioral Change:

Technological Perspectives on Behavioral Change Michael Brian Schiffer, 2022-08-30 Human societies have always been characterized by a dependence on artifacts from prehistoric stone tools to modern electronic devices Technology responds to and affects virtually all human behavior yet the interdependence of behavior and artifacts has never been studied intensively Archaeologist Schiffer now draws on his discipline's familiarity with artifacts and the processes of change they reveal to offer new insight into the study of behavioral change Drawing on case studies that deal with changes in architecture ceramics and electronic technology he emphasizes the central idea that the explanations of change must focus on the nexus of behavior and artifacts in the context of activities

Anthropological Perspectives on Technology Michael B. Schiffer, 2001 These fourteen original essays accept a dual premise technology pervades and is embedded in all human activities By taking that approach studies of technology address two questions central in anthropological and archaeological research today accounting for variability and change These diverse yet interrelated chapters show that to understand human lives researchers must deal with the material world that all peoples create and inhabit Therefore an anthropology of technology is not a separate discrete inquiry instead it is a way to connect how people make and use things to any activity studied ranging from religion to enculturation to communication to art Each contributor discusses theories and methods and also offers a substantial case study These detailed inquiries span human societies from the Paleolithic to the computer age By moving beyond the usual approach of examining ancient technologies particularly chipped stone and low fired ceramics this volume probes for the construction of meaning in the material world across millennia The authors of these essays find technology to be an inclusive and flexible topic that merges with studies of everything else in human activity A provocative and powerful discussion of the role of technology in human cultures At a time when archaeology has become less focused on theory and archaeology and social anthropology seem to fracture farther and farther apart the book is a breath of fresh air Professor John Douglas University of Montana

The Persistence of Sail in the Age of Steam Donna J. Souza,2013-06-29 In Archaeology Under Water 1966 19 pioneer nautical archaeologist George Bass pointed out how much easier it is to train someone who is already an archaeologist to become a diver than to take trained divers and teach them to do archaeology While this is generally true there have also been occasions when well trained and enthusiastic sport divers have been willing to accept the training and discipline necessary to conduct good archaeological science becoming first rate scholars in the process Dr Donna Souza s book is the product of just such a transition It shows how a sport diver and volunteer fieldworker can proceed through a rigorous graduate program to achieve research results that are convincing in their own right and point toward new directions in the discipline as a whole What is new in this book for maritime archaeology Perhaps the most obvious and important feature of Dr Souza s archaeological and historical analysis of the wreck at Pulaski Reef and its contemporaries in the Dry Tortugas National Park Florida is the way it serves as a means to a larger end namely an understanding of the social history of the transition from sail to steam in late nineteenth century maritime commerce in America The relationship between changes in technology and culture is a classic theme in anthropology and this study extends t theme into the domain of underwater archaeology

The Promise of New Technologies in an Age of New Health Challenges A.J. Maeder,K. Ho,A. Marcelo,2016-11-24 There is a changed emphasis in many health services with conventional pressures such as budget and workforce constraints combined with the indirect forces of social change and strategic direction bringing about the need for more flexible approaches for the longer term By enabling different care models and delivery channels telehealth offers demonstrably effective and sustainable solutions for issues such as access to and quality of care This book presents 18 papers delivered at the 5th Global Telehealth Conference held in Auckland New Zealand in November 2016 The theme chosen for Global Telehealth 2016 is The Promise of New Technologies in an Age of New Health Challenges and the papers included here cover a wide variety of topics from

theoretical and abstract contributions through to discussions of practical projects and highly specific applied contributions. The book also includes two invited papers which detail recent contributions to two global issues in which telehealth plays a major role: universal health coverage and personal health monitoring. Archaeology Barry W. Cunliffe, Wendy Davies, Colin Renfrew, 2002. Twenty six leading scholars from around the world have come together to celebrate the strengths, the energies and the sheer intellectual excitement of their discipline. They unashamedly proclaim that over the last hundred years archaeology has transformed itself from a genteel antiquarian pursuit deeply rooted in the classical tradition to a rigorous and demanding discipline spanning the humanities and the sciences yet at the same time one widely accessible to the public at large. The contributors show how our understanding of the past has changed, reveal the exciting ideas under current debate and offer their visions of the future. The result is a remarkable overview of world archaeology focusing on new and unexpected themes at the cutting edge of the discipline.
