**A Theory of Employment Systems** David Marsden, 1999-09-16 A Theory of Employment Systems considers why there are such great international differences in the way employment relations are organized within the firm Taking account of the growing evidence that international diversity persists despite globalization it sets out from the theory of the firm first developed by

Coase and Simon and explains why firms and workers should use the employment relationship as the basis for their economic cooperation The originality of the employment relationship lies in its flexibility It gives managers the authority to organize work but it also establishes limits on employees obligations The nature of these limits is fundamental to our understanding of the employment relationship and its international diversity The author argues that they are provided by four basic types of employment rule Which one predominates in a given environment is the source of international diversity in employment relations Drawing upon evidence from the US Japan France Germany and Britain the theory is developed to show why such diversity extends deep into key areas of human resource management such as performance management incentive pay and skill development It also explains why the open ended employment relationship continues to dominate work despite the growth of market mediated work relations
