*Technology and Economic Interdependence* Harry G. Johnson, 1975-12-01      **Technology and Economic Interdependence** Harry Gordon Johnson, 1975      *Theories and Issues in International Politics* Dr. Salma Ab. Sattar, 2023-08-01 International politics explores global political dynamics including theories e g realism liberalism issues e g conflict diplomacy globalization and actors e g states NGOs shaping international relations and policies      *Technology Transfer and Economic Growth in Sub-Sahara African Countries* Nathaniel O. Agola, 2016-03-21 This book provides a pragmatic analytical model grounded on the solid idea that technologies and the accompanying implementation efforts only make sense if they are successfully deployed in markets The analytical model also provides an exhaustive analysis of all critical variables at the global regional and national levels which contribute to failure or success of technology transfer efforts The model is validated by an incisive analysis of technology transfer experiences of Japan Korea Singapore Taiwan province of China and Malaysia While this book finds that these East Asian countries have had both diverging and converging models and experiences with technology transfer the enduring and fundamental aspects of technology transfer in specific industrial sectors and economic growth in these countries is then used to draw lessons for African countries This book therefore is a timely and compelling piece of research work that provides valuable answers to the increasingly urgent question of how African countries can industrialize through technology transfer to meet their economic development and growth ideals      **Global Economic and Technological Change: Former Soviet Union and Central and Eastern Europe, and China** United States. Congress. Joint Economic Committee. Subcommittee on Technology and National Security, 1992      **Global Economic and Technological Change** United States. Congress. Joint Economic Committee. Subcommittee on Technology and National Security, United States. Congress. Joint Economic Committee. Subcommittee on Economic Goals and Intergovernmental Policy, United States. Congress. Joint Economic Committee, 1991      *Global Economic and Technological Change* United States. Congress. Joint Economic Committee. Subcommittee on Economic Goals and Intergovernmental Policy, 1993      **Staples and Beyond** Mel Watkins, 2006-10-06 This collection brings together Watkins most important scholarly articles In *Staples and Beyond* Watkins addresses the staple thesis of Canadian economic and political development and in particular the effort to extend Harold Innis work by giving more explicit consideration to class relations and the role of the state He considers the historical nature of Canada s economic dependency in relation to tariff barriers foreign investment the multi national corporation and wide ranging free trade and investment agreements He also examines the evolution of economics and political economy as academic disciplines and reflects on the relationship between intellectual scholarship and political activism      *Defense Issues ,      The Political Economy of Globalization* Satya Dev Gupta, 2012-12-06 Globalization is transforming the world at an accelerated pace Integration of the world continues widening and intensifying international linkages in economic political and social relations Liberalization of trade and finance lubricated

by revolutionary changes in information technology has resulted in significant economic growth at the global level On the other hand the process of globalization is changing the nature of production relations threatening the traditional roles of the nation state and carrying with it far reaching implications for sustainable growth development and the environment Although both developed and developing countries are actively participating in this saga of globalization nearly ninety countries as the United Nations Human Development Report 1996 indicates are worse off economically than they were ten years ago leading to global polarization between haves and have nots The report further indicates that the gap between the per capita incomes of the industrialized world and the developing countries far from narrowing has more than tripled during the last thirty years Further a majority of the countries benefitting from this globalization drive have seen a rise in inequality and poverty This failure of market driven globalization to reward the benefits equitably led the United Nations to proclaim 1996 as the International Year for the Eradication of Poverty IYEP and the decade of 1997 2006 as the international decade for the eradication of poverty and to promote people centered sustainable development
