Technology And Employment Practices In Developing Countries:

Technology and Employment Practices in Developing Countries Hubert Schmitz, 2018-04-09 Originally published in 1985 this book analyses the extent and way in which technological change determines the utilisation of labour in less developed economies The book compares firms which are technologically very advanced with firms which use less sophisticated machinery and equipment and analyses how technology shapes their demand for labour It is concerned with the impact of technological change on the utilisation of labour in terms of number of jobs recruitment training skill requirements labour turnover wages and internal mobility it also investigates the impact on the utilisation of external labour in the form of subcontracting of small producers and employment of outworkers *Technology and Innovation in the International Economy* Charles Cooper, 1994 The two major review essays Jeffrey James on microelectronic technology and Martin Fransman on biotechnology assess the impact of these new technologies on production trade employment and welfare in developing countries **Textile Workers in Brazil and Argentina** Liliana Acero, Claudia Minoliti, Alejandra Rotania, 1991

Hi-Tech for Industrial Development Jose E. Cassiolato, Hubert Schmitz, 2002-01-31 First published in 1992 Routledge is an imprint of Taylor Francis an informa company *Routledge Revivals: The World Electronics Industry (1990)* Daniel Todd, 2018-02-05 First published in 1990 this book provides an overview of the global distribution of the electronics industry and the structural factors which promoted this distribution by the end of the 1980s Regarded as a flagship sector in both advanced and developing countries the electronics industry is encouraged by governments everywhere Covering both the civilian and the military sides of the industry Professor Todd reflects on the future of civilian electronics in the light of its global segmentation and hints at the fundamental role of governments in the unfolding of both civilian and defence electronics developments He also endorses the overwhelming significance of strategies being played by electronics enterprises in both the USA and Japan *The Hope of the Country with a Large Population* Xueyuan Tian, 2014-01-24 China has the largest population in the world However according to the United Nations India and China are expected to simultaneously reach a population of approximately 1.38 billion by 2030 with India taking a slight lead China will be all too happy to surrender its position as the country with the largest population Where does this attitude come from For China this situation is symbolic of the solution to the excessive population and a milestone in the Three Stage population development strategy as well as the people's hope In order to realize this hope it firstly depends on the transformation from the previous high birth rate high death rate and low growth rate of population to a high birth rate low death rate and high growth rate and finally to a low birth rate low death rate and low growth rate It also relies on the post demographic transition to a low fertility level since the 1990s and secondly is closely related to the population change in the future Therefore in depth studies on population and the development of population resources environment economy and society should be conducted on the basis of fresh experiences and theories from the international community in order to move forward with the times to promote

the solution to the population problem and realize the dream of rejuvenating the Chinese nation As a result population change is linked to this great rejuvenation as the great rejuvenation requires the population change and in turn the population change facilitates the great rejuvenation **Entering the 21st Century** Shahid Yusuf,1999 Known as the standard reference for international economic data the twenty second annual edition of the World Development Report provides a set of Selected World Development Indicators as an appendix presenting social and economic statistics for more than 200 countries **Emerging Advancements in AI and Big Data Technologies in Business and Society** Zhao,

Jingyuan,Richards, Joseph,Kumar, V. Vinoth,2024-07-22 Today the convergence of Artificial Intelligence AI and Big Data has revolutionized industries worldwide driving business growth and reshaping societies While these technologies have yielded remarkable benefits many developing countries face challenges in harnessing their potential due to inadequate data collection and availability Emerging Advancements in AI and Big Data Technologies in Business and Society delves into the profound impact of AI and Big Data on the digital landscape and their transformative influence on social economic and political spheres With a historical overview of AI s evolution and its operational definition this book explores interconnected subfields such as problem solving intelligent agents natural language processing computer vision and machine learning AI is hailed as the fourth industrial revolution and the widespread use of AI technologies prompts discussions about their applications performances and societal impact This book serves as a comprehensive guide for academics researchers and students in universities and engineering schools It also caters to policymakers government officers corporate leaders technology directors and managers seeking to understand the potential of AI and Big Data Additionally libraries and information centers catering to the needs of these professionals will find this book an essential resource **Flexible**

Automation in Developing Countries Ludovico Alcorta,2003-09-02 This book examines the extent of and motives for the diffusion of flexible automation FA at global level and then turns to the local and firm level bringing together in depth studies of sixty two firms in Brazil India Mexico Thailand Turkey and Venezuela Research focuses on the impact of computer numerically controlled machine tools on scale and scope by exploring changes in lot sizes and product variety product scale and scope total plant output plant scale and total firm output firm scale Barriers to setting up FA based operations are discussed as are factors which may affect a decision to locate in a developing country The contributed studies reveal a relatively slow diffusion of FA in developing countries and it is demonstrated that while FA possibly increases scope it also requires that plant output be increased in order to maintain efficiency Alcorta concludes that the location in developing countries will probably only be viable for large domestic firms multinationals seeking to relocate simple but labour intensive assembly processes and firms in countries with significant domestic markets This work is unique in addressing the scale and scope issues in developing countries and in the wealth of information regarding machine tools which it provides The data provided in the appendix includes official United Nations data previously unpublished This will be of use for all research into

trends in the use of machine tools **World Development Report 2005** World Bank,2004 Firms and entrepreneurs of all types from microenterprises to multinationals play a central role in growth and poverty reduction Their investment decisions drive job creation the availability and affordability of goods and services for consumers and the tax revenues governments can draw on to fund health education and other services Their contribution depends largely on the way governments shape the investment climate in each location through the protection of property rights regulation and taxation strategies for providing infrastructure interventions in finance and labor markets and broader governance features such as corruption The World Development Report 2005 argues that improving the investment climates of their societies should be a top priority for governments Drawing on surveys of nearly 30 000 firms in 53 developing countries country case studies and other new research the Report explores questions such as What are the key features of a good investment climate and how do they influence growth and poverty What can governments do to improve their investment climates and how can they go about tackling such a broad agenda What has been learned about good practice in each of the main areas of the investment climate What role might selective interventions and international arrangements play in improving the investment climate What can the international community do to help developing countries improve the investment climates of their societies In addition to detailed chapters exploring these and related issues the Report contains selected data from the World Bank s new program of Investment Climate Surveys the Bank s Doing Business Project and World Development Indicators 2004 an appendix of economic and social data for over 200 countries This Report offers practical insights for policymakers executives scholars and all those with an interest in economic development **Appropriate Technology** United States.
