Regional Development in East Asia Henry Wai-chung Yeung, 2013-09-13 Significant historical and geographical differences account for the many processes and trajectories of regional development in East Asia These historical and geographical specificities in East Asia have prompted serious re examination of existing theories in regional development and in particular the new regionalism approach associated with such ideas as the learning region institutional thickness relational assets and regional innovation system This book brings together a group of leading researchers specializing in local and regional development in East Asian economies Through in depth empirical studies of specific regions and localities these authors offer fresh and innovative perspectives on how regions evolve and develop over time in the world s most

dynamic macro regional economy In particular their work points to the critical importance of local and trans local processes in shaping regional development trajectories The book is timely given that the debate on the nature and dynamics of regional development in both academic and policy circles has now moved on From the earlier focus on endogenous regional assets such as localized networks of association and trust scholars and policymakers are now analyzing the complex relationship between economic globalization and regional change This high calibre collection makes a significant contribution to the literature on local and regional development in Asia and provides an important resource for researchers students and policy makers interested in East Asia This book was published as a special issue of Regional Studies **The Internet of**

Elsewhere Cyrus Farivar,2011 Through the lens of culture The Internet of Elsewhere looks at the role of the Internet as a catalyst in transforming communications politics and economics Cyrus Farivar explores the Internet s history and effects in four distinct and to some surprising societies Iran Estonia South Korea and Senegal He profiles Web pioneers in these countries and at the same time surveys the environments in which they each work After all contends Farivar despite California s great success in creating the Internet and spawning companies like Apple and Google in some areas the United States is still years behind other nations Surprised You won t be for long as Farivar proves there are reasons that Skype was invented in Estonia the same country that developed a digital ID system and e voting Iran was the first country in the world to arrest a blogger in 2003 South Korea is the most wired country on the planet with faster and less expensive broadband than anywhere in the United States Senegal may be one of sub Saharan Africa s best chances for greater Internet access The Internet of Elsewhere brings forth a new complex and modern understanding of how the Internet spreads globally with both good and bad effects South Korea in the Fast Lane Young-Iob Chung,2007-07-20 After having been a Japanese colony for more than 35 years until 1945 the miraculous economic development in the southern half of the Korean peninsula has multiplied the nation s output nearly 38 times and expanded per capita income by 16 times from 778 to 12 422 in year 2000 prices and transformed from basically an agrarian economy to that of a major industrial power which is now considered one of a dozen or so of most industrialized countries in the world during the 43 year period between 1953 and 1996 This book is a study of development of the South Korean economy from the time of the cessation of the Korean War to date based on available data with minimal historical description focusing on investment the sources and means of capital formation which is one of the most critical factors that contributed to economic development and the government role of in them for economic growth and structural changes The approach in this study is more analytical without being mathematical statistical or technical but with supporting quantitative data than historical There are a number of studies on some aspects of capital formation and economic development in short articles but there is no comprehensive study analysis book of capital formation and economic development of South Korea since the Korean War other than this authors comprehensive study of capital formation and economic transformation of Korea before 1945 1876 1945 Not only this book fills the void of study of the

subject after the Korean War but it also complement my first volume This study reveals a number of significant though perhaps not all unique patterns and characteristics of capital formation and economic development of South Korea The combination of circumstances approaches and experiences in the country was in many respects unique in comparison to many developing and developed countries including many Asian countries such as Japan and China

Inventing the Electronic Century Alfred Dupont CHANDLER, Takashi Hikino, Andrew Von Nordenflycht, Alfred D Chandler, 2009-06-30 Consumer electronics and computers redefined life and work in the twentieth century In *Inventing the Electronic Century* Pulitzer Prize winning business historian Alfred D Chandler Jr traces their origins and worldwide development From electronics prime mover RCA in the 1920s to Sony and Matsushita s dramatic rise in the 1970s from IBM s dominance in computer technology in the 1950s to Microsoft s stunning example of the creation of competitive advantage this masterful analysis is essential reading for every manager and student of technology

How Universities Promote Economic Growth Shahid Yusuf, Kaoru Nabeshima, 2007 With the competitiveness of firms in an open and integrated world environment increasingly reliant on technological capability universities are being asked to take on a growing role in stimulating economic growth Beyond imparting education they are now viewed as sources of industrially valuable technical skills innovations and entrepreneurship Developed and developing countries alike have made it a priority to realize this potential of universities to spur growth a strategy that calls for coordinated policy actions

Innovative East Asia Shahid Yusuf, 2003 The importance of East Asia in the global economy is now unquestionable and its market expansion driven by a population of nearly 1.9 billion will strongly influence the tempo of international trade and growth of global incomes However while the region s economies have amply demonstrated their potential their future performance is by no means ensured This book offers an in depth analysis of the policy trade offs identified in the recently published *Can East Asia Compete* WB and OUP 2002 The major contribution of the new book to that it shows how stability can be a stepping stone to growth that is led by innovation identifies and analyzes the ingredients of an innovative economy and discusses how these ingredients mesh with government policy and market initiatives

Asian Firms Frank B. Tipton, 2008-01-01 This book appeals to a wide range of readers who might be interested in the historical development of Asian economies evolutionary trajectories of Asian firms institutional change and dynamics in Asia and management and organization of Asian firms For readers who are interested in specific Asian economies this book will also

be useful because it provides a comparative perspective that examines different Asian economies and their forms in a single work Henry Wai chung Yeung National University of Singapore Tipton provides a fresh approach to understand how Asian firms differ from their western counterparts Paul Beamish University of Western Ontario Canada Frank Tipton s book is a comparative study of the management structures of Asian firms As Asian economies continue to expand the management of Asian firms becomes ever more important whether they are suppliers customers partners or rivals As the author argues Asian firms are very different from their Western counterparts and these differences reflect the variations in national history and institutions within which they operate Asian Firms compares Chinese Japanese Korean and Southeast Asian management structures and sets them in their historical and institutional context Based on a wide range of interviews and material drawn from a variety of disciplines the argument is framed by the sayings of the legendary strategist Sun Tzu and the renowned businessman Tao Zhu gong A series of case studies illustrate the strengths and weaknesses of the approaches of managers in each of the national traditions Asian Firms asks in each case what Western managers can learn from Asian firms and what Asian firms can learn from each other With a multidisciplinary approach and emphasis on practical lessons and tools the book will be of great use and interest for managers It will also appeal to students and researchers of international business postgraduate management students in courses with a comparative or Asian emphasis as well as academics and researchers of Asian studies

Strategic Coupling Henry Wai-chung Yeung, 2016-04-22 In Strategic Coupling Henry Wai chung Yeung examines economic development and state firm relations in East Asia focusing in particular on South Korea Taiwan and Singapore As a result of the massive changes of the last twenty five years new explanations must be found for the economic success and industrial transformation in the region State assisted startups and incubator firms in East Asia have become major players in the manufacture of products with a global reach Taiwan s Hon Hai Precision has assembled more than 500 million iPhones for instance and South Korea s Samsung provides the iPhone s semiconductor chips and retina displays Drawing on extensive interviews with top executives and senior government officials Yeung argues that since the late 1980s many East Asian firms have outgrown their home states and are no longer dependent on state support as a result the developmental state has lost much of its capacity to steer and direct industrialization We cannot read the performance of national firms as a direct outcome of state action Yeung calls for a thorough renovation of the still dominant view that states are the primary engine of industrial transformation He stresses action by national firms and traces various global production networks to incorporate both firm specific activities and the international political economy He identifies two sets of dynamics in these national global articulations known as strategic coupling coevolution in the confluence of state firm and global production networks and the various strategies pursued by East Asian firms to attain competitive positions in the global marketplace Journal of Economic Literature , 2002

Making a Semiconductor Superpower Dong-Won Kim, 2023-09-29 This book provides real stories about the South Korean semiconductor community It explores the lives and

careers of six influential semiconductor engineers who all studied at Korea Advanced Institute of Science and Technology KAIST under the mentorship of Dr Kim Choong Ki the most influential semiconductor professor in South Korea during the last quarter of the twentieth century Kim's students became known as Kim's Mafia because of the important positions they went on to hold in industry government and academia This book will be of interest to semiconductor engineers and electronics engineers historians of science and technology and scholars and students of East Asian studies They were called Kim's Mafia Kim Choong Ki himself wouldn't have put it that way But it was true what semiconductor engineers in South Korea whispered about his former students They were everywhere Kim was the first professor in South Korea to systematically teach semiconductor engineering From 1975 when the nation had barely begun producing its first transistors to 2008 when he retired from teaching Kim trained more than 100 students effectively creating the first two generations of South Korean semiconductor experts Source IEEE Spectrum October 2022

Changes by Competition Hyeong-ki Kwon, 2021-02-11 By tracing the evolution of South Korean state led capitalism and comparing it with other economies this book critiques prevalent theories including neoliberalism the developmental state and institutionalism and proposes a theoretical alternative focusing on endogenous changes through elites competition within and outside the state Unlike the arguments of neoliberals this volume asserts that the state can still play an active role in reconstituting the national economy through globalization The Korean state successfully fosters economic growth by nurturing industrial commons through globalization rather than by adopting a neoliberal free market system This volume asserts that the Korean economy has successfully grown over the past 50 years because it has moved toward a new version of state led developmentalism In order to better account for the evolution of state led developmentalism this book proposes changes by competition within as well as outside the state in order to bring about changes in developmentalism and the ability to adjust to new contexts Unlike prevalent accounts of developmental state theory *Changes by Competition* argues that the state is neither unitary nor cohesive but a locus of competition *Rutgers Computer & Technology Law Journal*, 2003

Small Firm Dynamism in East Asia Farrukh Iqbal, Shujiro Urata, 2002-05-31 This book presents a collection of papers which examine the evolution of small and medium enterprises hereafter SMEs in East Asia over the past quarter century or so East Asia is of interest because this region has experienced on average the highest economic growth rates in the world during this period This has been accompanied by dramatic transformations in sectoral output and employment in patterns of domestic and international trade and in demographic flows within countries It is of interest to see to what extent these transformations have affected or have been influenced in turn by industrial structure as reflected in the evolution of small firms At the same time not all countries in East Asia have grown at similar rates nor has there been uniformity in public policies across the region So there is a background of diversity in both performance and policy How smaller firms have coped with the different policy environments and patterns of economic transformation that have characterized the region in the recent past could be of potential importance

to the formulation of public policy in other developing countries Small firms are important instruments for economic development This book examines the factors that influence their evolution and performance **Schumpeterian Analysis of Economic Catch-up** Keun Lee, 2013-10-31 One of the puzzles about why some countries have stronger economic growth than others revolves around the so called middle income trap the situation in which a country that has grown strongly gets stuck at a certain level In this book Keun Lee explores the reasons why examples of successful catching up are limited and in particular why the Asian economies including China have managed to move or are moving beyond middle income status but economic growth has stalled in some Latin American countries This is one of the first studies to demonstrate using patent analysis that the secret lies in innovative systems at the firm sector and country levels which promote investment in what the author calls short cycle technologies and thereby create a new path different from that of forerunning countries With its comprehensive policy framework for development as well as useful quantitative methods this is essential reading for academic researchers and practitioners
