A Study of the Comparison of the Amount Or Frequency in the Use of Technology in the Music Classroom, as it Correlates to the Amount of Teachers Experience Jennifer Frazier, 2012 The purpose of this study was to determine if there is a correlation between the number of years of experience of music teachers and the frequency of their use of technology in the elementary music classroom The group selected for this study was several music teachers from various locations in the state of Missouri These locations included rural areas in Northwest Missouri urban and suburban areas in Kansas City Saint Joseph and the Saint Louis areas The group was emailed surveys and was asked to fill out and return The data collected in this study was number of years of teaching experience the amount of technology used by the individual teachers as well as their expressed comfort and confidence level in using technology in the music classroom So after surveying the teachers it seems that experienced educators use the technology more and seem to be more comfortable incorporating it in to their daily lessons However after doing the t Test the results were different than what I had previously thought The t Test showed that there wasn't any significant difference between the inexperienced and experienced and the usage of technology

Technology and the Gendering of Music Education Dr Victoria Armstrong, 2013-01-28 Critical of technologically determinist assumptions underpinning current educational policy Victoria Armstrong argues that this growing technicism has grave implications for the music classroom where composition is often synonymous with the music technology suite The use of computers and associated compositional software in music education is frequently decontextualized from cultural and social relationships thereby ignoring the fact that new technologies are used and developed within existing social spaces that are always already delineated along gender lines Armstrong suggests these gender technology relations have a profound effect on the ways adolescents compose music as well as how gendered identities in the technologized music classroom are constructed Drawing together perspectives from the sociology of science and technology studies STS and the sociology of music Armstrong examines the gendered processes and practices that contribute to how students learn about technology the repertoire of teacher and student talk its effect on student confidence and the issue of male control of technological knowledge Even though girls and female teachers have technological knowledge and skill the continuing material and symbolic associations of technology with men and masculinity contribute to

the perception of women as less able and less interested in all things technological In light of the fact that music technology is now central to many music making practices across all sectors of education from primary secondary through to higher education this book provides a timely critical analysis that powerfully demonstrates why the relationship between gender and music technology should remain an important empirical consideration
