Technology Strategies:

Technology and Engineering Strategies P.J. Moar, 2024-08-01 This pioneering book is the first ever practical guide to developing and communicating technology and engineering strategies. It presents a unique step by step method for creating robust evidence based strategy known as the Five Dimensions Process or 5DP. The book also introduces a host of original insights including a new theory of technology, a novel approach to product innovation and groundbreaking contributions to our understanding of technological risk. It describes many easy to use tools both new and established for supporting activities such as solution design, system monitoring, risk identification, project management, the development of personnel and ethical decision making. The book brims with strategic and tactical advice on such topics as university collaboration, technical compatibility, data utilisation, product design, project cancellations, outsourcing, knowledge management and risk mitigation. It is essential reading for technologists and engineers across all disciplines, technology and engineering leaders and professional strategy consultants.

Technology and Strategy Richard Arthur Goodman, Michael W. Lawless, 1994. *Technology and Strategy* is a comprehensive guide to creating a strategic plan that incorporates technological growth. Using real life examples from industries from electronics to bio technology, the authors present the tools planners need to integrate a firm's technological capabilities with its strategic plan. Importantly, the book also addresses broader questions about the role of technology, clarifying when it aids innovation, when it is evolutionary and when it is revolutionary. These questions are tested against trends such as Total Quality Management, the resource based view of strategy and the increase in external acquisition of technology. Offering clear guidance through an increasingly complex area, *Technology and Strategy* will be a valuable reference for practising executives, general managers, strategic planners, R D executives and manufacturers.
